# Some Perspectives of Education Landscape

**Basic Education:**  
Overall, enrollment rates have improved toward universal primary education. However, problems of quality and completion are persistent.

**Secondary Education:**  
Expansion and transformation of basic education toward universal secondary education.

**Skills Development:**  
From TVET to workforce skills development, with greater role of industry in training provision, to improve relevance and cost-efficiency. Demand for both cognitive and non-cognitive skills ("soft skills").

**Lifelong Learning:**  
Sound formal education is necessary but no more sufficient. Boundaries between formal, nonformal, and informal learning become blurred.

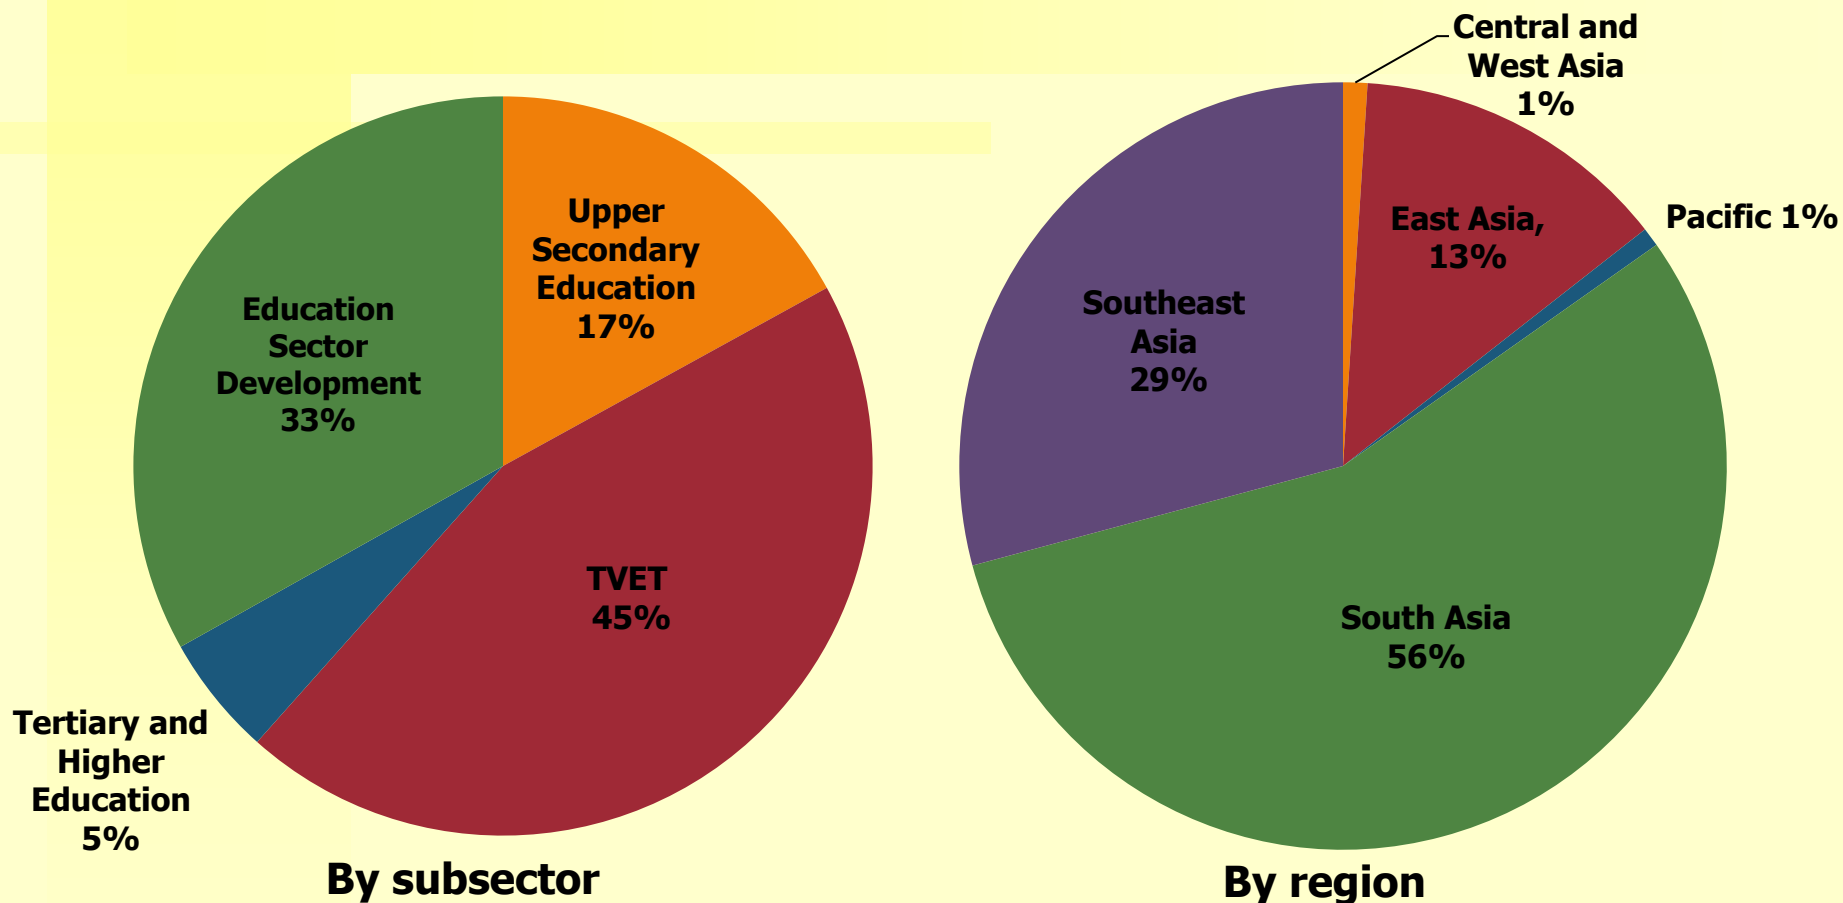

**Higher Education:**  
Countries expand and diversify higher education to support economic development and improve competitiveness.
