4th ADB Business Opportunities Fair

Manila, Philippines : 20 - 21 March 2013

Water & Municipal Infrastructure in the Asia-Pacific: What is ADB Doing?

Jingmin Huang Senior Urban Development Specialist Asian Development Bank

ADB

Asia-Pacific Region's Challenges

Drinking Water

About 400 million without access to safe water supply

Sanitation

1.7 billion without improved sanitation

Municipal Infrastructure1.8 billion urban dweller61% world slum population in Asia

ADB's Water Investments

Total investment portfolio (1968-2011):

Rural Water Urban Water Basin Water \$8.14 billion\$12.58billion\$8.84 billion

2012-2013 Pipeline \$7 billion

Rural Water: rural water supply and sanitation; irrigation and drainage Urban Water: urban water supply, sanitation, and wastewater management Basin Water: water resources development and management; flood management; wetlands, watershed, and ecosystem protection and preservation; and hydropower generation

ADB's Urban Infrastructure Investments

Total in 2012 Pipeline \$3.9 billion

CWRD is the biggest

Different regions: EARD SERD SARD CWRD PARD

But ... two major issues remain in water sector

- Huge gap in water supply coverage
- Sanitation lagging way behind water supply

Huge Gap in Water Service Coverage: ADB's Response

- Aggressive reduction of nonrevenue water
- Public utilities to go the corporate way

Sanitation Lagging Behind Water Supply: ADB's Response

- Expand sanitation and wastewater management, plus reuse
- Take advantage of advances in technologies
- Do major river clean-ups

ADB's Water Operators Partnerships (WOPS) Program

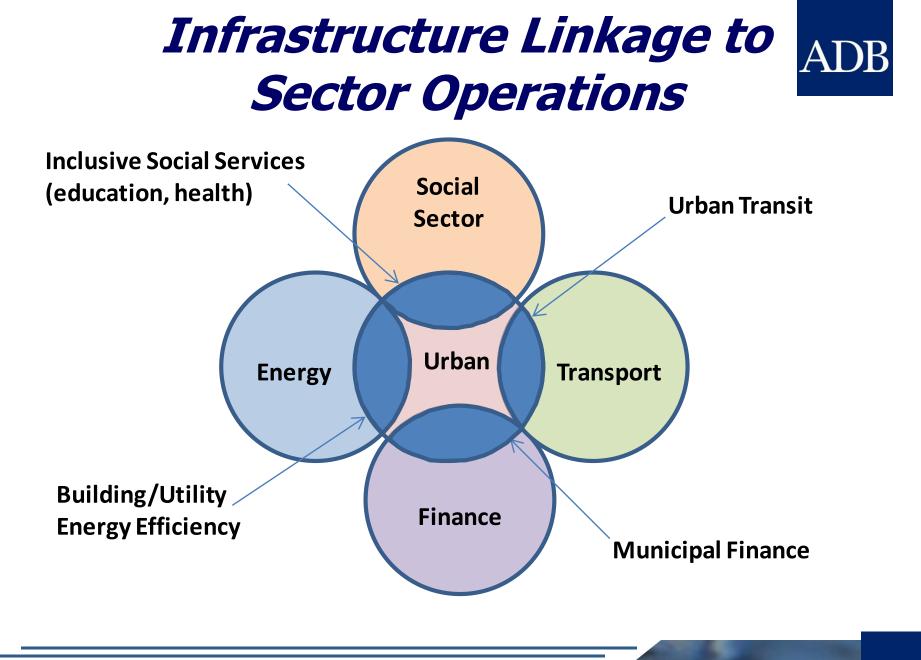

Helping uplift performance of water utilities for more sustainable water supply and sanitation services

Focus of New Urban Portfolio ADB

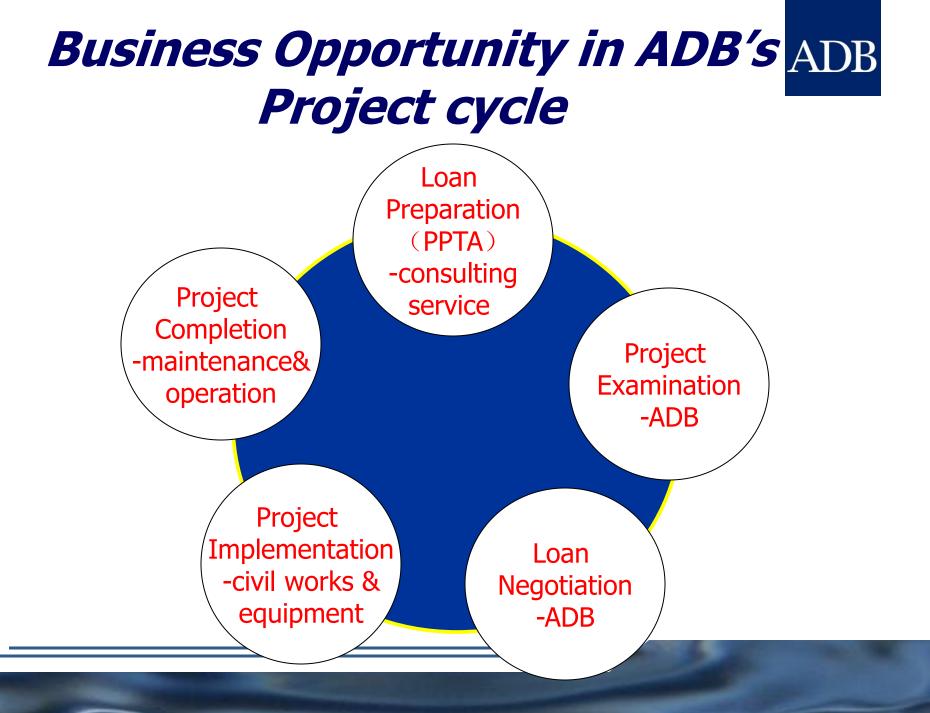

Towards inclusive, green and competitive

More to come: ADB's 2013 Urban & Water Lending Pipeline

Thank you!
