Presentation Outline

- 1. Understanding Informality in the **Recycling Supply Chain**
- Kabadiwalla Connects' approach to 2. informal sector integration
- 3. Q&A

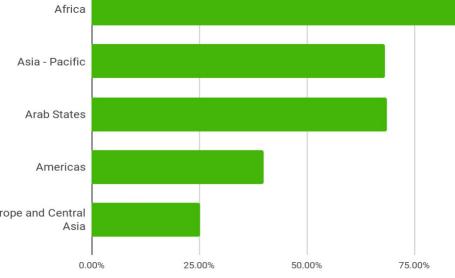

Understanding Informality | Two billion people – more than 61 per cent of the world's employed population – work in the informal economy.

There is an urgent need to tackle informality. For hundreds of millions of workers, informality means a lack of social protetion, rights at work and decent working conditions, and for enterprises it means low productivity and lack of access to finance. Data on those is a re crucial for designing appropriate and integrated policies that are tailored to the diversity of situations and needs.

93 per cent of the world's informal employment is in emerging and developing countries

Major cities in SE Asia, Africa & Latin America with informal sector

Informal employment across the globe

There is a lack of consensus on how the informal supply -chain is defined

Most studies have focused mainly on waste-pickers when speaking about the informal supply chain, leaving out the informal small scrap shops and large scrap shops. Currently, there is no standardised naming conventions that refer to the different players in the informal supply chain

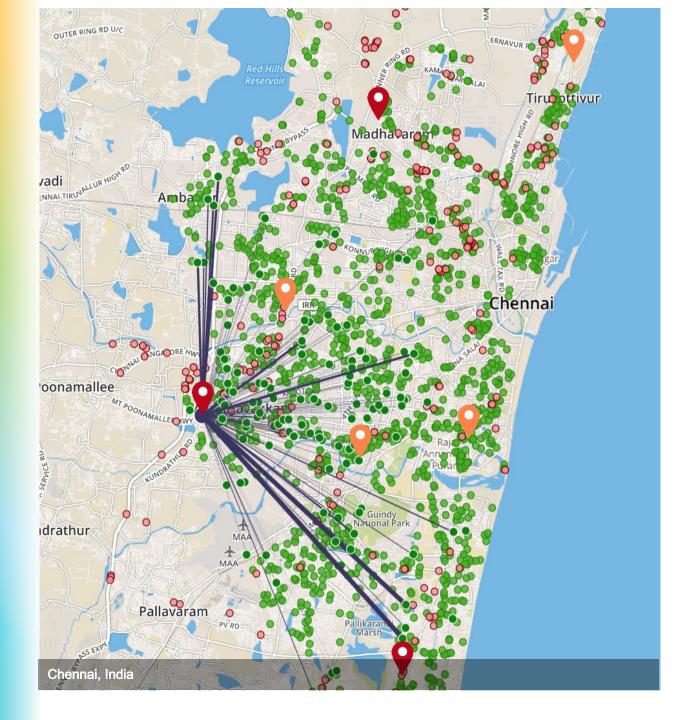

A word cloud showing the use of naming conventions used to describe the informal sector in India

A graph showing the use of naming conventions used to describe the informal sector in India

Visualised using the top 30 cited papers on the informal sector in Indiahttps://docs.google.com/spreadsheets/d/16hzisOWhbt84GEvDEL0pXegbwL5XES_RQ7kEHEHnt9l/edit?usp=sharing

A summary of volumes handled by Chennai's informal recycling sector

Total recyclables generated in the city: 542,000 tons/year Total Recyclables collected by IS: 130,000 tons/year (24%)

Material types and volumes

Material	Volume recovered (tons/year)
Paper	42000
Plastic	20000
Glass	30000
Metal	38000
Total	130000

Plastic types handled

- **PP & PE** (Called Bommai by the informal sector and includes detergent bottles, lubricants & toiletries containers, milk packets, and LD Covers etc)
- **PET** (Called as PET by the informal sector and includes water & soft drink bottles and 20L water cans)
- ABS/HIPS (Called Odappu by the informal sector and includes plastic parts covering appliances such as TV, AC, Washing Machine, Fridge etc.)
- **PVC** (Called PVC/hard piece by informal sector and includes PVC pipes, PVC joints, electric cables insulation layer, water hose etc.)
- PC (Called as CD/PC sheet by informal sector and includes roofs made of polycarbonate, CD, DVD, Blu ray discs)

Kabadiwalla Connects classification of the Informal Sector in India

Level 0 Aggregators (Waste-pickers)

Informal sector workers who may or may not have a means of transportation and incur zero or minimal input cost. These stakeholders primarily collect from roadside dustbins, landfills, and, in the case of those owning a vehicle, from households

Material Source: Street picking and dump sites

Procurement Philosophy: Material agnostic Tech Adoption: Low Average Volume: 307 kg/month Material currently sourced: Paper, Plastics, Glass, Metal

Level 1 Aggregators (Small Scrap shops)

Informal sector workers who have a storage space and aggregate material from L0 aggregators and residents. They do minimal or no processing of the material.

Material Source: L0 Aggregators Procurement Philosophy: Material agnostic Tech Adoption: High Processing: Manual Segregation Average shop size: 127 sq. ft Average monthly income: \$384 Smartphone: 49 % Average Volume: 9293 kg/month

Level 2 Aggregators (Large Scrap shops)

Informal sector workers who buy material directly from L1 aggregators and other commercial sources in bulk. They typically specialise in a single super category of material and process it to produce secondary raw materials as well.

Material Source: L1 Aggregators Procurement Philosophy: Specialised Material

Tech Adoption: High Processing: Baling,Grinding,Segregation Average shop size: 5213 sq. ft Average monthly income: \$955 Smartphone: 69 % Average Volume: 45,966 kg/month

Processor/ Recyclers

These are stakeholders who buy specific grades of post-consumer scrap material from L1s and L2s and convert them to usable secondary raw material for the manufacturing industry.

Material Source: L2 Aggregators Procurement Philosophy: Specialised Material

Tech Adoption: High

Processing: End of life recycling of the material

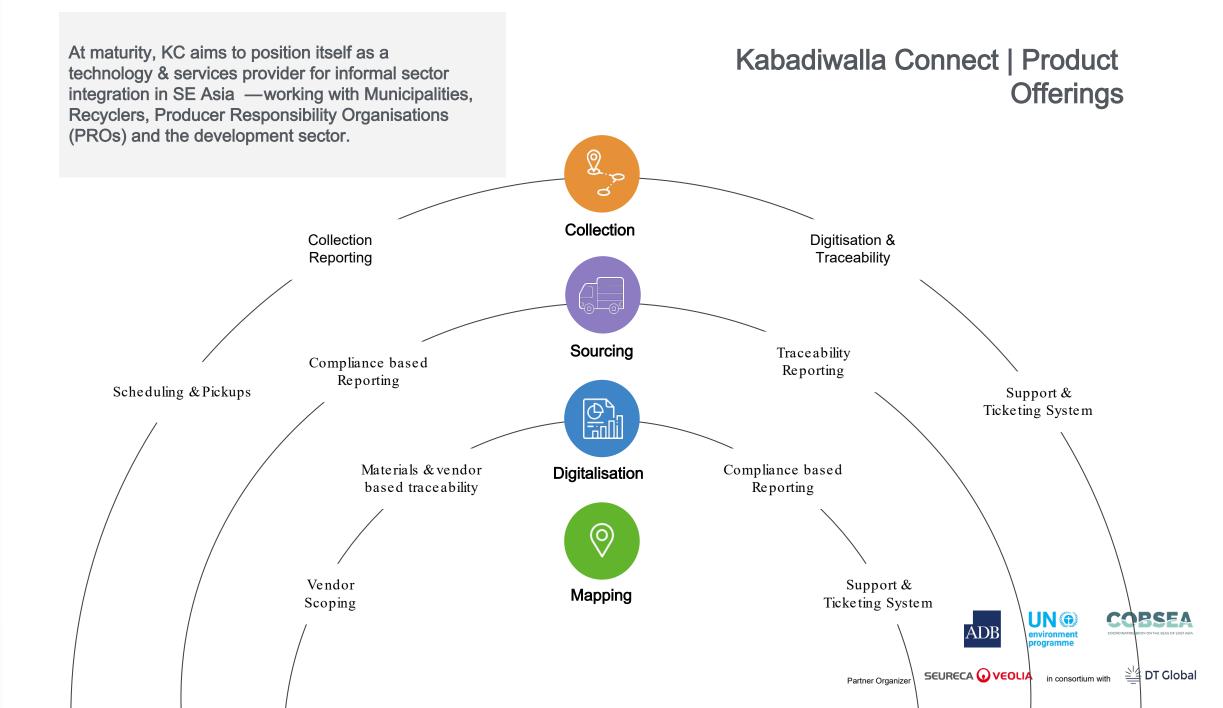

High volume offtakers drive incredible collection rates by the informal sector

Wards across Cooum River			
Plastic Type	Generation Volume/month	IS collection volume/month	
PP/PE	1986.0 MT	271.1 MT	
Low Value Plastics	429.9 MT	48.9 MT	
PET	110.2 MT	98.0 MT	
PVC	73.9 MT	108.8 MT	
PS	68.2 MT	103.1 MT	
Other	18.5 MT	5.0 MT	
Total	2686.7 MT	634.9 MT	

Wards across Adyar River			
Plastic Type	Generation Volume/month	IS collection volume/month	
PP/PE	2310.6 MT	327.3 MT	
Low Value Plastics	500.1 MT	43.5 MT	
PET	128.2 MT	188.9 MT	
PVC	86.0 MT	115.3 MT	
PS	79.4 MT	87.7 MT	
Other	21.6 MT	1.8 MT	
Total	3125.8 MT	764.5 MT	

Proposed integration pathway for the informal waste sector

Enumeration

One of the key steps in the integration of the informal sector is to collect data on their operations and infrastructure. This will help understand the gaps and challenges in integration before preparing an integration plan

Social Protection

Stakeholders in the informal supply chain lack any form of social protection to ensure stability in their work. For successful integration it is important that they are provided with health insurance and stable income

Compliance & Digitalisation

It important to implement basic site and labour compliance in informal scrap shops to ensure safer work environments. Digitalisation provides an added layer of traceability in the material supply chain which is currently lacking

Dignified Collection

Integration of waste-pickers and small scrap shops to organise last mile collection of municipal waste directly from households.

Registration of informal scrap shops

Registration of informal scrap shops for compliance is also an key step in formalisation of the supply chain.
