**Cyber Risks
Zero Trust Framework**

ADB's Digital Transformation Game Changers

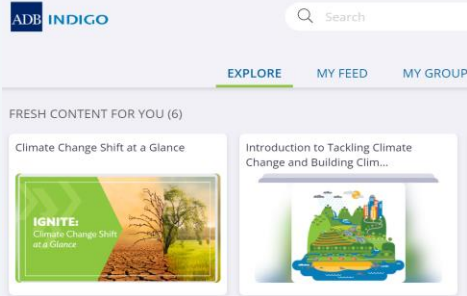

Insight-Driven

Dashboards that help monitor performance and make real-time adjustments

Digital Twins

Using AI to create virtual models of buildings to compare costs, environmental impact and safety

One ADB

Enabling ADB's digital shift to empower new ways of working and enhance digital capabilities.

Cybersecurity against digital disruptions

Strengthening protection against cyber threats

Knowledge Insights

Using Generative AI to help advisors evaluate projects and provide recommendations in various thematic groups and sectors

Climate AI and Predictive Analytics

Using AI to predict impact scenarios based on collected data

ADB's capacity to deliver is continuously enhanced through:

- capacity building of leadership
- governance reform
- smart sourcing

Business Opportunities in ADB's Digital Transformation

We invite partners to explore these opportunities and contribute to ADB's digital future.

Focus Areas for Digital Transformation 2025-2027

Operations

– empowering ADB's workforce to deliver its mission in developing member countries

Client Management and Engagement

– improving interactions and engagement with ADB clients

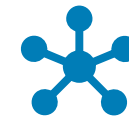

Sustainability Reporting

– advanced sustainability reporting tools and systems

Enterprise Resource Planning (ERP) Modernization

– a more modern and efficient platform to streamline internal processes and improve data accuracy

Intranet

– enhancing internal communication and collaboration
