

## International Seminar Management for Development Results: "Inclusive Development"

Seoul-Korea, July 4<sup>th</sup>-8<sup>th</sup>, 2016 Venue: The Plaza Hotel, Seoul

## Background

In the international development field, Managing for Development Results(MfDR) has emerged as a global initiative for the effective "results-oriented" management system. When it comes to its implementation, the MfDR accepts tenets of "good governance" described as "clear objectives, evidence-based decision-making, transparency, and continuous adaptation and improvement" at all phases of the national development process. In the mid 2000's, three main CoPs (Communities of Practices) from each region, Latin-America and Caribbean, Asia, and Africa, were established as "peer-to-peer collaborative networks" to achieve the successful fulfillment of MfDR.

## Objectives and Target Audience

In this seminar, under the collaboration with the Development Banks(IDB, AfDB, and ADB) and the CoPs(CoPLAC, CoPAsia, and CoPAfrica), each session has been designed to deliver and share practical knowledge and different perspectives of South Korea, Latin-America, Asia, and Africa about MfDR for public management experts, government officials, policymakers, opinion leaders, think-tanks, and development partners like below:
