

Webinar

Delivery of COVID-19 booster and paediatric vaccines - Lessons from Malaysia, Philippines and the UK

Register your place now  **Friday 18 February 2022, Zoom meeting**
8:00 London | 13:30 Delhi | 16:00 Manila

As COVID-19 vaccines continue to be deployed around the world, countries are now planning for and actively administering booster doses and vaccines for their paediatric populations. What has the experience been in different countries? What have been the successes and challenges?

Join BMJ, in partnership with the Asian Development Bank, the UK Government's Better Health Programme and UK National Health Service (NHS), for a webinar on Friday 18 February 2022, with an expert panel of speakers from Malaysia, Philippines and the United Kingdom.
