# Non-Revenue Water

22 March 2023

8am Manila / 11am Sydney / 12pm Suva

**REGISTER:** <https://us06web.zoom.us/meeting/register/tZEkcOCrrj0rG9OuYS8Elz131CslpeMzWHdG>

**Facilitator:** Maria Tran, Senior Project Officer (Urban Development), Pacific Liaison and Coordination Office, Asian Development Bank

Reducing water losses and improving the efficiency of water supply is a top priority for water utilities around the world.

Tackling non-revenue water (NRW)—the water ‘lost’ through leaks, illegal connections, or other inefficiencies, requires targeted long-term efforts and good baseline information to understand where to allocate resources.

Join us this World Water Day—22 March, as we explore Non-Revenue Water in the Pacific. The webinar will cover the fundamentals of NRW, including how to complete a water balance, and include case studies from Tonga Water Board and Samoa Water Authority on their experience with addressing Non-Revenue Water.
