Ionate

AI Tools to Enhance
Infrastructure Management
LEO ALDER
AIM Group

The knowledge event is the 12th of a series organized by the Emerging Areas Team, Energy Sector Office. The Emerging Areas created under ADB's New Operating Model aims to operationalize frontier technologies and integrated solutions, foster and drive innovation in policy and operational issues, catalyze thought leadership and future looking look wide initiatives for future business, collaborate across departments for innovative solutions, identify and develop knowledge and flagship events, and mobilize financing.
