

3rd Asian Sanitation Dialogue
27–29 May 2014 • Asian Development Bank, Manila, Philippines

Day 1, Session 2:

Navigating the Paradigm Shift

A stylized illustration of a rural landscape. On the left, there are two blue houses with white outlines. In the center, a blue water truck is parked on a green field, with a person standing next to it. To the right, a blue net is draped over a structure. In the background, there are several palm trees. The bottom of the image shows a blue body of water with a white boat.

The views expressed in this presentation are the views of the author/s and do not necessarily reflect the views or policies of the Asian Development Bank, or its Board of Governors, or the governments they represent. ADB does not guarantee the accuracy of the data included in this presentation and accepts no responsibility for any consequence of their use. The countries listed in this presentation do not imply any view on ADB's part as to sovereignty or independent status or necessarily conform to ADB's terminology.

Navigating the Paradigm Shift

Chair: Amy Leung, Director, SEUW, ADB

✦ Institutional Reforms

A. Nepal and South Asia: Triggering and sustaining behavior change

Kishore Thapa, Secretary, Ministry of Urban Development, Nepal

B. Viet Nam: Meeting the MDGs, policies and city sanitation strategies

Hubert Jenny, Principal Urban Development Specialist, SEUW, ADB

C. Indonesia: Capacity development of sanitation service operators

Jose Cordovilla, Water and Sanitation Development Expert, Solvere

Navigating the Paradigm Shift

Objectives:

- To share experiences, key outcomes and lessons learned in promoting behavior change in sanitation and wastewater management.
- Provide examples of programs and actions, including incentives, supporting policies and enabling conditions that overcome barriers and challenges in increasing access to sanitation and improving service delivery.

Points for Discussion

- Are the MDGs for sanitation reasonable targets? Can we meet these targets?
- Given the successes, what can other countries that are struggling with the sanitation goal and targets learn?
- Same for the failures – what can the countries with new programs learn?

Points for Discussion

- NEPAL: We often learn by example – how can we get the word out better about these successful examples?
 - VIET NAM: Is meeting the MDGs enough? Are the MDGs the government goals? Or should governments be more aggressive and focus on wastewater management as well?
 - INDONESIA: Can more capacity development be done using more inter-Asia resources?
-
