# Do Community-Managed Schools Facilitate Social Capital Accumulation?

## Evidence from COGES Project in Burkina-Faso

**Yasuyuki Sawada**

**JICA Research Institute and Univ of Tokyo**

**with Eiji Kozuka, Takeshi Aida, Drew Griffen,  
Haruko Noguchi, and Yasuyuki Todo**

# Background

---

- ▶ Achieving **universal primary education (MDG #2)**
  - ▶ **A variety of policy instruments** proposed on both supply and demand sides (deworming, information sharing, free school lunch, free school uniform, and CCT)
  - ▶ **School-Based Management (SBM)** as the key to deliver effective education services (Barrera-Osorio, Fasih, and Patrinos, 2009)
  - ▶ **Estimated policy effects of SBM still mixed:**
    - Proponents: Barrera-Osorio et al. (2009), Gertler et al. (2006, 2007), Blimbo and Evans (2011), Bruns, Filmer, and Patrinos (2011), Pradhan et al. (2011), Duflo, Dupas, and Kremer (2012)
    - Opponents: Banerjee et al. (2010) De Laat, Kremer, and Vermeersch (2008), Pradhan et al. (2011),
- ▶ **Sustainability of voluntary provision of local public goods**
  - ▶ A number of interventions such as local cost-sharing and verbal commitment intervention are all ineffective (Kremer and Miguel, 2007 “**illusion of sustainability**”)
  - ▶ **Formation of user committees by donors effective?**

# Goals

---

- ▶ **Formal evaluation** of a SBM program in Burkina Faso, “**COGES**”
  - ▶ **A hybrid method** of artefactual field experiments and RCT
- ▶ Explore the **channels** at least partially
  - ▶ By utilizing panel data
- ▶ Examine **fiscal sustainability** of SBM
  - ▶ In theory, SBM can enable local cost recovery
  - ▶ By using artefactual field experiments

# Novelties

- ▶ A hybrid evaluation method of AFE and RCT (NFE)
- ▶ The first RCT-based evaluation of SBM itself (not sub-components of SBM)

*S.D. Levitt, J.A. List / European Economic Review 53 (2009) 1–18*

|     | Controlled Data |     | Naturally-Occurring Data |                  |
|-----|-----------------|-----|--------------------------|------------------|
| Lab | AFE             | FFE | NFE                      | NE, PSM, IV, STR |

- Lab: Lab experiment
- AFE: Artefactual field experiment
- FFE: Framed field experiment
- NFE: Natural field experiment
- NE: Natural experiment
- PSM: Propensity score estimation
- IV: Instrumental variables estimation
- STR: Structural modeling

**Fig. 1.** A field experiment bridge.

# Presentation Outline

---

- ▶ **COGES** project in Burkina Faso
- ▶ **Evaluation** Strategy
- ▶ **Data** and empirical **results**
- ▶ **Remarks** and future **tasks**

# COGES as a new innovation to improve education

---

- ▶ **COGES** (Comites de Gestion dans des Ecoles Primaires):
- ▶ **Purposes:**
  - ▶ To improve **child education, health, and nutrition** and to empower parents and community (to accumulate **social capital**)
- ▶ **Ingredients:**
  - ▶ **Decisions are delegated to a school management committee** (a director, teachers, and **elected** members by community voting)
  - ▶ **Training** provided by the gov't w/ help of JICA
  - ▶ **Activity plans** constructed by COGES
    - ▶ School lunch programs
    - ▶ Improvements in toilets
    - ▶ Better knowledge about diseases

# School-Based Management (SBM)

- ▶ **COGES** is a replication of **EDUCO** in El Salvador and a “**weak form**” SBM

Figure 1.2 The Autonomy-Participation Nexus, Selected Countries

# COGES as a new innovation to improve education

---

## ▶ Timeline under COGES:

- 1) **Election training (one day, to the school principal)** to select a school management committee (a director, teachers, and community members)
  - 2) With all village residents, **elections** by secret voting (**two community-wide meetings**)
- 
- 3) **Activity training (2.5 days) for COGES members** on fiscal management, activity plans, monitoring
  - 4) Design of **activity plans**
- 
- 5) **Implementation of school activities**
  - 6) **Collective** monitoring

# JICA's COGES Project in Burkina Faso

**Ultimate Goal:  
Nation-wide coverage  
(9,000 schools)**

**Formalization**

**Scaling up with JSDF**

**1,300 schools  
(two provinces)**

**JICA's main project (2009-)**

**280 schools  
(1 regions)**

**35 schools  
(2 communes)**

**Pilot project (2008-2009)**

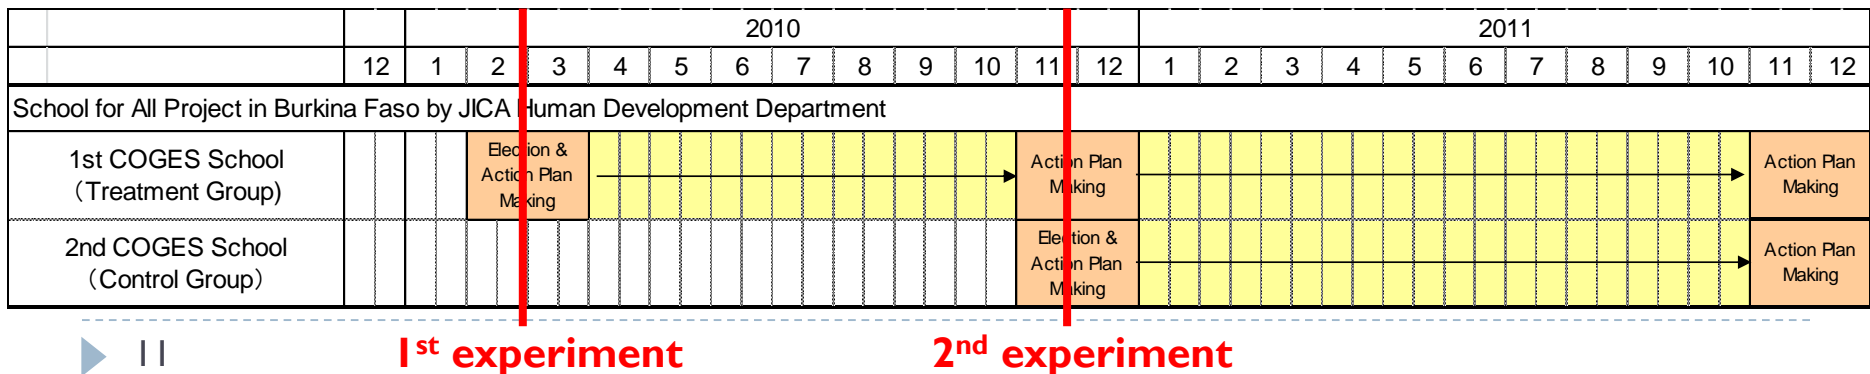

# Burkina Faso

# JICA Research Institute's **Evaluation Project**

- ▶ **Pilot Phase** (November 2008-June 2009):
  - ▶ Survey and experiments in Oct & Nov 2009 and Nov 2010
  - ▶ **7 COGES schools** after one year of COGES implementation
  - ▶ **5 non-COGES** schools
  
- ▶ **Main Phase** (November 2009-):
  - ▶ **RCT roll-in** interventions, survey, and experiments in Feb & Nov 2010
  - ▶ **140 COGES schools** started in **Feb 2010**
  - ▶ **139 Non-COGES** schools started COGES in **Nov 2010**

# Evaluation Strategy

---

- ▶ Impact of **COGES** ( $D$ ) on **Outcome** ( $Y$ )
  - ▶ Treatment  $D=I$  [COGES]
    - ▶ Pilot phase: **Retrospective**
    - ▶ Main phase: **Randomized Roll-in**
  - ▶ Outcomes  $Y$ :
    - ▶ **Social capital** (voluntary contribution to public goods)
    - ▶ Cognitive and non-cognitive achievements
    - ▶ Health and anthropometric outcomes
- ▶ **Methods:**
  - ▶ **Pilot phase:** IV and PSM (Sawada and Ishii, 2011)
  - ▶ **Main phase (RCT):** OLS and IV (non-compliance)

# Public Goods Experiment to Quantify the Level of Social Capital

---

- ▶ **Public goods game:**
  - ▶ **Standard** lab experiments (Levitt and Fehr, 2004)
  - ▶ Voluntary cooperation among people
  - ▶ One of the measures of **social capital** (Anderson et al., 2004)
  - ▶ Multi-person **PD** game
- ▶ Participants secretly choose how many of their **initial endowments (5 coins of 100FCFA)** to put into the public pot.
  - ▶ Each participant **keeps the tokens** they do not contribute plus an **even split of doubled amount** of the total tokens in the common pot
- ▶ Each experiments are played by **a group of 4 persons (within and between design):**
  - ▶ Father group (4 fathers)
  - ▶ Mother group (4 mothers)
  - ▶ Mixed parent group (2 fathers and 2 mothers)
  - ▶ Mixed parent-teacher group (1 director, 1 teacher, 1 father, and 1 mother)
- ▶ 13▶ COGES members (only for COGES schools)

# Public Goods Experiment to Quantify the Level of Social Capital

---

$$\pi_i = (E - Y_i) + \frac{\rho}{N} \sum_{i=1}^N Y_i$$

- ▶ Values:
  - ▶  $E = 500$  FCFA
  - ▶  $\rho = 2$
  - ▶  $N = 4$
- ▶  $\partial \pi_i / \partial Y_i = -1 + (\rho/N) < 0$  when  $1 < \rho < N$ .
- ▶ **Nash equilibrium:  $Y_i = 0$**  for all  $i$ , so  $\pi_i$ , i.e., discrepancy of actual decision from the NE, is one of measures of SC.

# Subject Size of the Public Goods Experiment

- ▶ **Public goods experiments: 4 participants** as a unit of experiment.
- ▶ **Pilot Phase**
  - ▶ In total, we conducted **62 groups** of experiments and the total number of participants are **248** (**136** “pilot” COGES; **112** Non-COGES) in pilot phase
- ▶ **Main Phase**
  - ▶ First experiment was conducted for **84** schools (**41** COGES; **43** Non-COGES) in **Feb 2010**. Among these, second experiment was conducted for **42** schools (**20** COGES; **22** Non-COGES) in **Nov 2010**.
  - ▶ # of participants are **1708** in **Feb 2010**, and **840** in **Nov 2010** in total.

|                        | Oct- Nov 2009<br>(Retrospective) | Feb 2010<br>(RCT)   | Nov 2010<br>(RCT)   |
|------------------------|----------------------------------|---------------------|---------------------|
| COGES<br>(Treatment)   | 136<br>(7 schools)               | 920<br>(41 schools) | 400<br>(21 schools) |
| Non-COGES<br>(Control) | 112<br>(5 schools)               | 788<br>(40 schools) | 440<br>(21 schools) |

---

## Pilot Phase

- ▶ **Pilot Phase** (Nov 2008-June 2009):
- ▶ **Evaluation data and experiments** in Oct & Nov 2009 and Nov 2010

|                                | <b>Oct- Nov 2009<br/>(Retrospective)</b> | <b>Feb 2010<br/>(RCT)</b> | <b>Nov 2010<br/>(RCT)</b> |
|--------------------------------|--|---------------------------|---------------------------|
| <b>COGES<br/>(Treatment)</b>   | 136<br>(7 schools)                       | 920<br>(41 schools)       | 400<br>(21 schools)       |
| <b>Non-COGES<br/>(Control)</b> | 112<br>(5 schools)                       | 788<br>(40 schools)       | 440<br>(21 schools)       |

# IV Estimates

- ▶ **IV:** proportion of number of teachers to number of students, proportion of number of girls to number of boys, number of classes, number of teachers, and number of females

|   | (I)                 | (II)                | (III)               | (IV)                 |
|---|---------------------|---------------------|---------------------|----------------------|

| Adjusted R-squared  | 0.256               | 0.309               | 0.376               | 0.414                |

$20.3\% = 0.61/3$

$14.4\% = 0.45/3.1$

- ▶ 17 Cluster-adjusted robust standard errors reported in parentheses. \*\*\* denotes significance at the 1% level; \*\* at the 5% level, \* at the 10% level

# PSM

- ▶ **PS individual level covariates:** Years of education and its squared variables, age of the participant and its squared variables
- ▶ **PS school level covariates:** Number of teachers at each school.

$$33.3\% = 1.0/3.0$$

## Estimated ATT by PSM

|                | One to one matching | Caliper matching | Kernel matching |
|----------------|---------------------|------------------|-----------------|
| ATT            | 1.02                | 1.02             | 0.805           |
| <i>t</i> value | 2.36                | 2.36             | 3.58            |

---

## Main Phase

- ▶ **Main RCT Phase** (Nov 2009-):
- ▶ **Evaluation data and experiments** in (Feb and) Nov 2010

|                        | Oct- Nov 2009<br>(Retrospective) | Feb 2010<br>(RCT)   | Nov 2010<br>(RCT)   |
|------------------------|----------------------------------|---------------------|---------------------|
| COGES<br>(Treatment)   | 136<br>(7 schools)               | 920<br>(41 schools) | 400<br>(21 schools) |
| Non-COGES<br>(Control) | 112<br>(5 schools)               | 788<br>(40 schools) | 440<br>(21 schools) |

# COGES as a new innovation to improve education

---

## ▶ Timeline under COGES:

- 1) **Election training (one day, to the school principal)** to select a school management committee (a director, teachers, and community members)
- 2) With all village residents, **elections** by secret voting (**two community-wide meetings**)

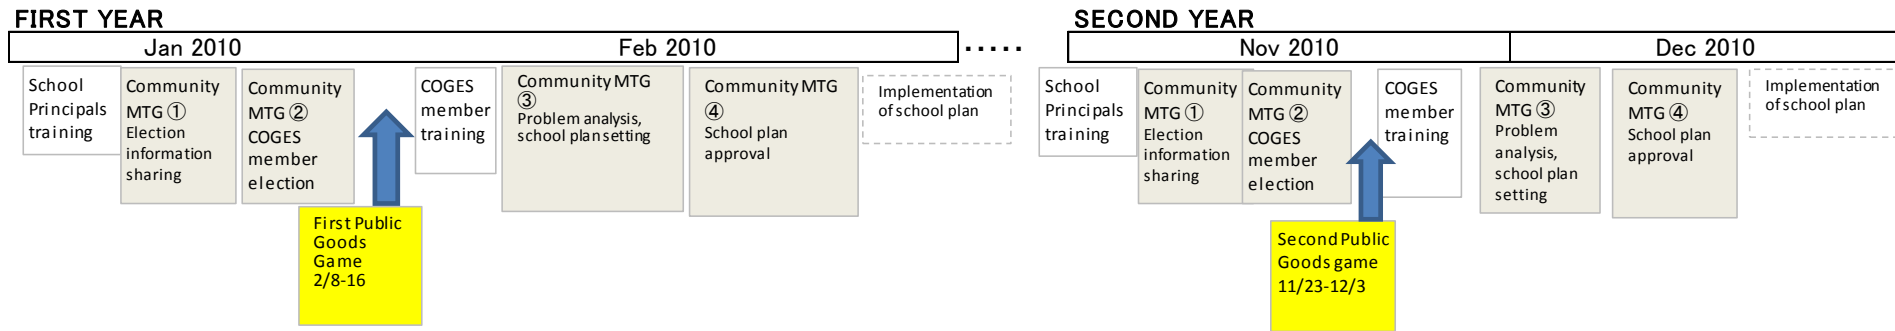

---

### Public goods game

---

- 3) **Activity training (2.5 days) for COGES members** on fiscal management, activity plans, monitoring
  - 4) Design of **activity plans**
- 
- 5) **Implementation of school activities**
  - 6) **Collective** monitoring

# Sequence of Events

|                 | Before<br>(first year) | After<br>(second year) |
|-----------------|------------------------|------------------------|
| 1st round COGES | a1b                    | a1a                    |
| 2nd round COGES | a2b                    | a2a                    |

- **Total effect = election effect + implementation effect:**
  - (before) election effect:  $a1b - a2b$
  - (after) implementation effect:  $a1a - a2a$
- Dif-in-Dif effect:  $(a1a - a1b) - (a2a - a2b) = \text{implementation effect} - \text{election effect}$

# Public Goods Experiment to Quantify the Level of Social Capital

---

- ▶ Each experiments are played by a group of 4 persons:
  - ▶ 1) Father group (4 fathers)
  - ▶ 2) Mother group (4 mothers)
  - ▶ 3) Mixed parent group (2 fathers and 2 mothers)
  - ▶ 4) Mixed parent-teacher group (1 director, 1 teacher, 1 father, and 1 mother)
  - ▶ 5) COGES members

9.4% = 33.9/359

# Remarks

## ▶ Remarks

### ▶ COGES project increased SC:

- ▶ The amount of voluntary contribution to public goods increases by **20.3%-33.3%** in the pilot phase and by **24.1%** (election effect=14.7% & implementation effect=9.4%) in the main phase.
- ▶ Community management project seems to enable **local cost recovery**, leading to **fiscal sustainability** potentially.

### ▶ Empowerment of **linking SC**

## ▶ Future Tasks:

- ▶ Robustness checking by **real-world decisions**
  - ▶ Tontine (ROSCAs) and actual contributions to schools
- ▶ Other **outcomes**

## ▶ **External validity:** JICA has been supporting COGES in West Africa (**Niger**, 2004-; **Senegal**, 2007-; Mali, 2008-; **Burkina Faso**, 2008-)
