# Background

- Access to finance is critical for growth of agriculture sector
- Financial institutions reluctant to accept the risks prevalent in the agricultural sector
- Governments making efforts to attract investment for agriculture

# Challenges

- Financial sector is not sophisticated
- Higher transaction costs in rural areas compared to urban areas
- Risk factors inherent in agriculture inhibit financial institutions from lending
- Lack of records and statistics undermines opportunities for profitable investment

# Who needs finance?

- Farmers and small agricultural entrepreneurs
- Actors along the value chain
- Rural infrastructure
- Research and development

# What instruments are available?

- Direct Finance
- Value-Chain Finance
- Infrastructure Finance
- Finance for Research and Development

# Who finances agriculture?

- Farmers and small entrepreneurs
- Cooperatives and credit unions
- Local commercial banks, branches of foreign banks and insurance companies
- National and local government, development banks and donors

# Why public private partnerships in agriculture?

- Growing budgetary constraints
- Developing competitive agriculture is costly
- Increasing private sector awareness of benefits of linking investments to social objectives
- Increasing private sector interest in reaching the base of pyramid
- PPP modality provides option to modernize agriculture and revitalize rural economies

# Where public private partnerships might work?

- Developing a competitive value chain
- Farm to market connectivity
- Wholesale markets
- Water for irrigation
- Insurance
- Agriculture research and innovation

# Lessons learnt so far

- PPPs can bridge large gap exists between available FDI and financeable
- Inclusive business models (IBMs) not easily served by PPPs, as they are not 'market-ready'
- Reaching scale remains a challenge for most IBMs
- Supporting ecosystems are critical to the success of IBMs
- Partnerships are most effective when used to promote whole value chains or systems
- Interventions should include a “blend” of mechanisms, for example both technical assistance and grants, to be most effective
- All PPPs inherently do not benefit the poor, nor do they integrate them into their solutions
