5.25 trillion pieces of plastic
in the world's oceans

8-10 million tonnes enter
the world's oceans every year

Study: University of Georgia, University of California, Santa Barbara, Sea Education Association

The reality of 'AWAY'

8.3 billion metric tonnes of plastic has
been produced since mass production
began in the 1950s

Study: University of Georgia, University of California, Santa Barbara, Sea Education Association

6.3 billion metric tonnes sent to landfill

Only 9 percent has been recycled

By 2050...

- 9.8 billion people on planet earth
- We will produce 12 billion tonnes of plastic

“The **most important**
film of our time.”

**SIR DAVID
ATTENBOROUGH**

A man with short brown hair, wearing a white long-sleeved button-down shirt and blue jeans with a brown belt, is speaking on a stage. He has a small black microphone clipped to his shirt. He is holding a small black device in his right hand and gesturing with his left hand. The background is dark with a large red 'X' on the left and a blue circle on the right. The text 'CH2018' is overlaid on the bottom left, and 'HERMOSILLO' is overlaid on the bottom right.

ACCIONES
DE CAMBIO
POR EL PLANETA

SOLUTIONS

- Cradle-to-grave responsibility for producers and resellers of plastic products
- Make recycled plastics cheaper than virgin materials (tax?)
- Manufacture only from recycled materials
- Subsidise recyclers
- Establish appropriate infrastructure
- Create closed loop or circular economies and systems (i.e., Germany from 1991).
- Better packaging design
- Become smarter consumers
