

An aerial photograph of the Beijing Daxing International Airport terminal building, which has a distinctive bird-like shape with multiple long, curved wings extending from a central hub. The surrounding area includes parking lots, roads, and some greenery.

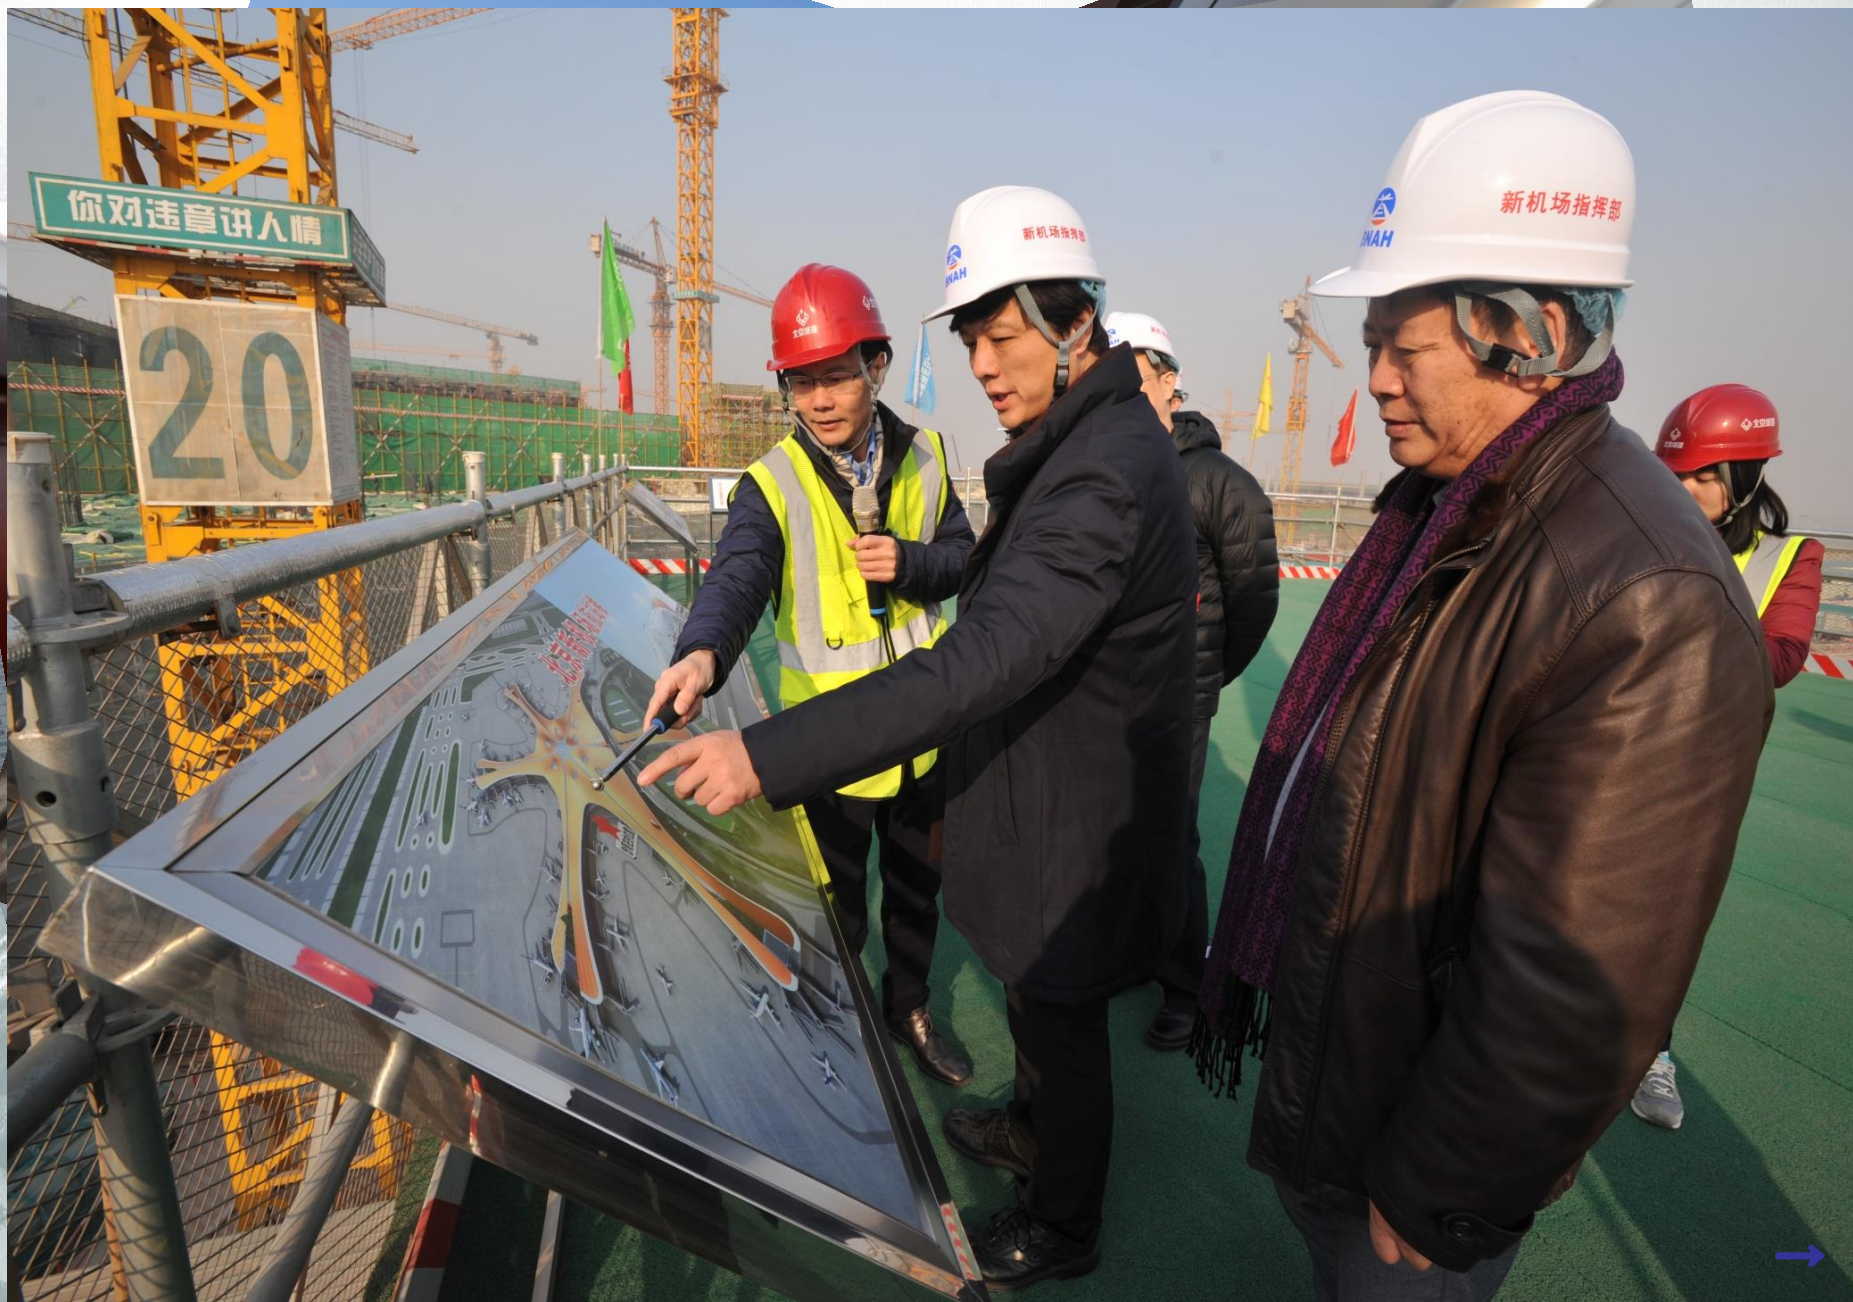

The Practice of "Clean Project" of Beijing Daxing International Airport

Yuan Haipeng

**Chief Inspector of the Commission of Supervision
of Daxing District, Beijing, P.R. China**

An aerial photograph of a modern urban development. The central feature is a large, light-colored, star-shaped water body or plaza that radiates from a central point. This central area is surrounded by several large, rectangular, landscaped plots, possibly parks or sports fields. In the foreground, there are clusters of modern, multi-story residential buildings with flat roofs. The background shows a grid-like pattern of streets and more developed areas, suggesting an integration with an existing urban fabric. The overall tone is light and airy, with a soft focus.

Thank you!
