Toward Sustainable and Resilient Food Systems in Asia and the Pacific

Yasuyuki Sawada

Chief Economist, Asian Development Bank

**Webinar on Sustainable and Resilient Food Systems
in Asia and the Pacific**

16 March 2021

Asia's phenomenal economic growth is strongly correlated with poverty reduction

But COVID-19 reversed gains in poverty reduction...

...and is threatening food security...

*Share of Population with Insufficient Food Consumption,
February 2021 (%)*

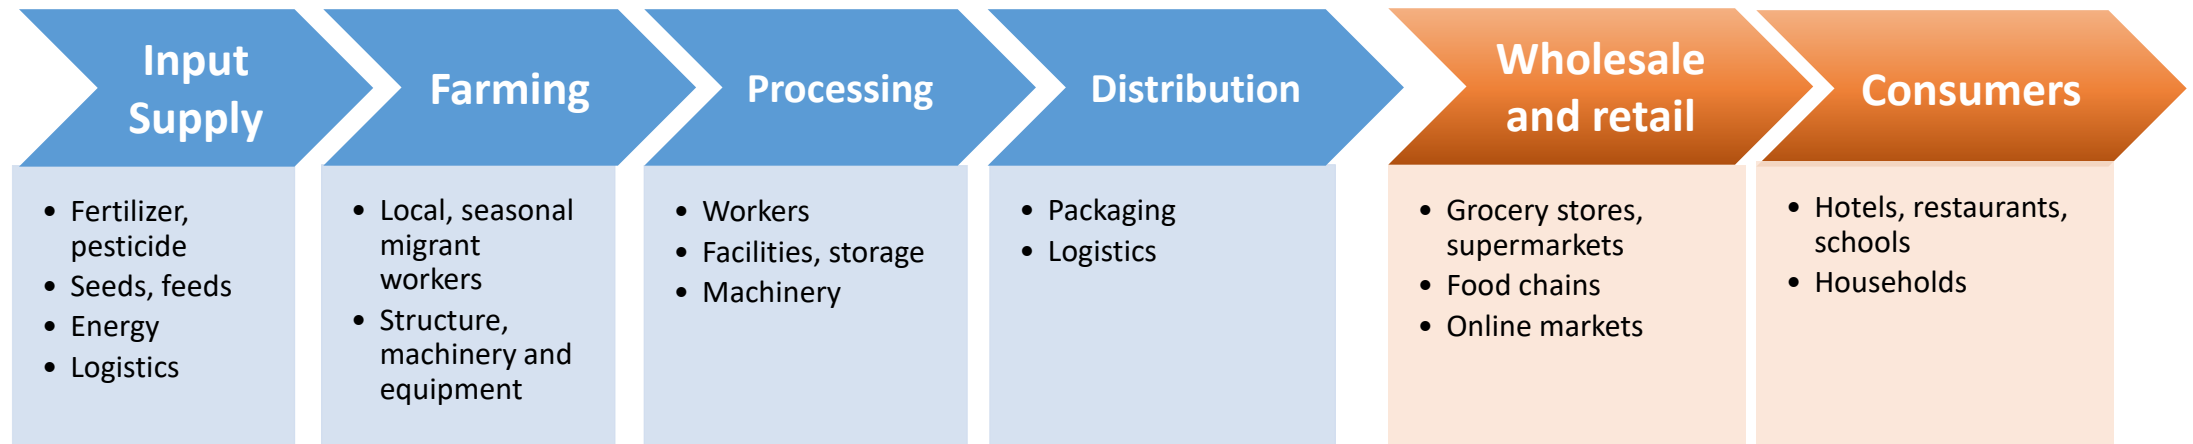

...through both supply and demand shocks

Impact on supply

- Labor shortage due to travel restrictions and fear of infection
- Limited capacity of farmers to store harvested crops
- Factory or facility shutdown
- Port restrictions and congestion, leading to the spoilage of perishables and increasing food waste due to a lack of refrigerated storage
- Delays or retrieval in capital investment

Impact on demand

- Income loss due to layoffs and furloughs
- Consumer sentiment and behavior (e.g., panic buying, hoarding)
- Limited accessibility to food
- Undernutrition for the vulnerable groups

On the demand side, governments have taken steps

*Packages announced in response to COVID-19
(% of GDP)*

On the supply side, many Asian countries are highly relying on food imports

Cereal import dependency ratio (2011–2013) and consumption of rice and wheat per capita (2018)

■ Cereal import dependency ratio (% left) ■ Per capita wheat consumption (kg, right) ■ Per capita rice consumption (kg, right)

Note: Negative values indicate that the economy is a net exporter of cereals.

Production networks in Asia have been strong in primary goods

GVC and RVC Participation Rates (%)

3-yr ma = 3-year moving average, GVC = global value chain, RVC = regional value chain, y-o-y = year-on-year.

Notes: The GVC participation rate is the share of gross exports that involves production in at least two economies using cross-border production networks. The RVC participation rate, on the other hand, is the same as that of GVC, except that it only involves economies of the same region.

Sources: ADB calculations using data from ADB. Multi-Regional Input-Output Tables; and methodology by Wang, Wei, and Zhu (2013).

RVC–GVC Trade Intensity, by Major Sector—Asia

GVC = global value chain, RVC = regional value chain.

Note: Sectoral classification is based on ADB (2015).

Sources: ADB calculations using data from ADB Multi-Regional Input-Output Tables; and methodology by Wang, Wei, and Zhu (2013).

Indeed, nontariff measures are increasing in agriculture

Products Affected by COVID-19-Related Trade Measures, by Effect on Trade (as of 24 August 2020)

COVID-19 = coronavirus disease.

Trade plummeted during the initial phase but is rebounding fast

Real exports (% change, year on year)

Real imports (% change, year on year)

Global Weekly Trade Indicators (Z scores)

Weekly Number of Port Calls, by Region (thousands)

Overall crop prospects are favorable, but risks remain

International Supply and Demand for Rice and Wheat

This highlights the importance of RCI initiatives

Areas of Subregional Cooperation Efforts to Promote Recovery Post-COVID-19

	ASEAN	CAREC	GMS	SASEC
Health	●	●	●	●
Trade and trade facilitation	●	●	●	●
Tourism	●	●	●	●
Gender/Women empowerment	●	●		
Agriculture and food security	●		●	
Climate change and environmental sustainability	●		●	

ASEAN = Association of Southeast Asian Nations, CAREC = Central Asia Regional Economic Cooperation, COVID-19 = coronavirus disease, GMS = Greater Mekong Subregion, SASEC = South Asia Subregional Economic Cooperation.

Digitalization and technology will facilitate a post-COVID-19 transition to resilient and efficient food supply chains

Marketing through online platforms

Advanced information system

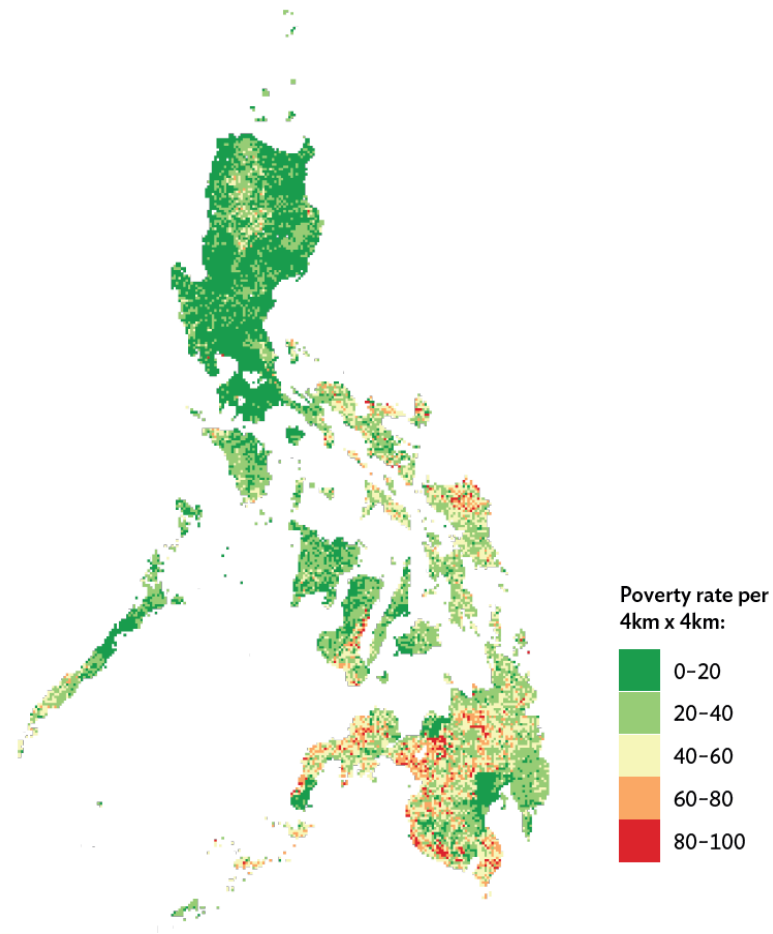

Agricultural technology

Institutional and legislative reforms	Targeted support to poor and smallholder farmers
<ul style="list-style-type: none">Promote digital agriculture and mechanizationImprove value chain infrastructure	<ul style="list-style-type: none">Access to affordable digital infrastructure and trainingMarketing opportunities through economies of scale and entrepreneurial skills

Digitalization can also help social protection programs for better food security

Granular poverty map (at 4km x 4km grid) based on satellite imageries

Key policy areas for resilient food systems

- Protect consumers and public health
- Secure supply chains for producers
- Ensure fair trade and other related policies
- Enhance regional cooperation
- Promote digitalization

THANK YOU!

A great reset: COVID-19 highlights the need for developing Asia to build back better

- A green and inclusive recovery
 - To meet urgent needs such as public health, education, and job creation, especially for the most vulnerable
 - To build resilience to future disasters
- Building back better requires mobilizing huge amounts of capital from both public and private sources

Asia Pacific region's annual investment requirements, 2016–2030, by broad SDG sectoral groupings

ICT = information, communications and technology, SDG = sustainable development goals, WSS = water, sanitation, and safe water.
