Climate Finance in support of Localization of SDGs

[Supporting Investments in Resilience that Reach Scale While Ensuring No One is Left Behind]

Climate risk is context specific and closely linked to development, thereby requiring localized solutions.

Climate finance is not flowing to the local level.

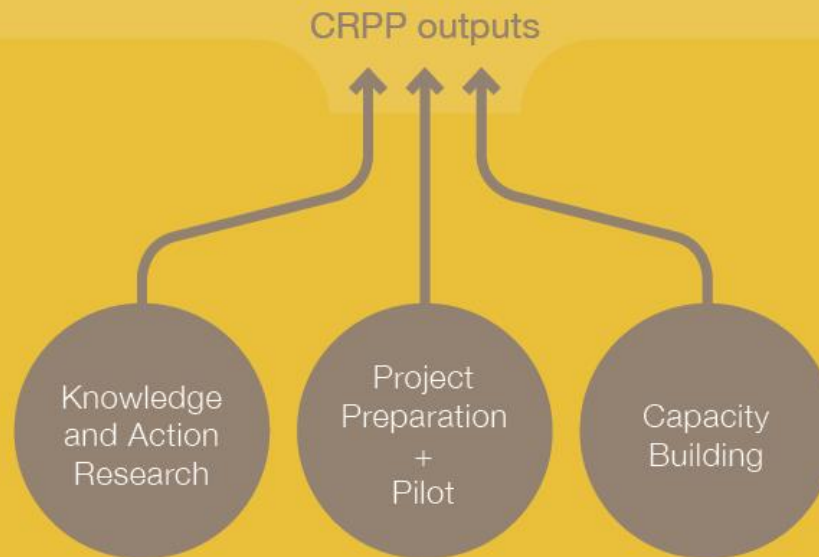

Need for strengthening financial architecture to unlock the flow of climate finance (quantity and quality) to local level to facilitate transformational change.

Along with finance is the need for strengthening capacity of local institutions and partnerships for risk-informed inclusive decision-making.

Community Resilience Partnership Program (2021-2030)

Proposed partnership program to support scaling up of climate finance in support of local resilience.

A 10-year programmatic commitment to advance climate actions which leaves no-one behind.
