## ADB New Energy Policy

Addressing remaining poverty and reducing inequalities.

Accelerating progress in gender equality.

Tackling climate change, building climate and disaster resilience, and enhancing environmental sustainability.

Making cities more livable.

Promoting rural development and food security

Strengthening governance and institutional capacity.

Fostering regional cooperation and integration.

Gas, WTE, hydro projects produce ghg, weakens resilience and compromise ecological integrity

Large energy projects results affect gender issues, like hydro and geothermal

Unless coal plants are all phase out and thermal WTE's and gas projects are prohibited, we won't be having livable cities

Energy projects that alter our ecosystems destroy sustainable food production systems

Huge funding for energy projects breeds corruption and weakens fiscal capacity of governments

Energy projects must be based on regional priorities and integrated energy plan
