Digital Economy & Carbon Market

Jianyu Zhang

In 2020, the overall IT sector represents between 5 and 15 percent of global electricity consumption, depending on the external forecast available. This is due – again – to scope differences and modelling specificities.

Schneider Electric’s own model estimates current global IT-related electricity demand to account for 1,900TWh, or 8 percent of total electricity demand. This is globally consistent with the research from Andrae in 2020⁷ at 1,700TWh and that from the International Energy Agency 2017 report forecast⁸, at 1,400TWh, when accounting for scope differences.

Global Electricity generation	2015	2020	2023	2030
Electricity generation (TWh)	21,229	24,644	26,382	30,718
Share of IT sector vs total electricity demand	9.3%	8.7%	9.3%	11.5%

Carbon emissions (MtCO ₂ /y)	2015	2020	2023	2030	2030 decarbonized
Global Electricity CO ₂ intensity (gCO ₂ /kWh)	548	494	458	378	378
- Compute	49	56	69	125	63
- Storage	9	9	17	41	20
- DC infrastructures	98	103	111	106	53
- Fixed networks	54	79	97	90	45
- Mobile networks	46	43	62	155	77
- IT devices use	107	88	78	54	54
- Network equipment use	46	58	65	87	43
- IoT devices use	16	35	45	110	110
- TVs and peripherals use	272	225	198	146	146
- Device manufacturing	279	260	264	287	287
Total	976	955	1,006	1,201	899
Share of global energy-related emissions	3.1%	2.8%	3.0%	3.4%	2.6%

China's national carbon trading

Climate Goal	China aims to have CO ₂ emissions peak before 2030 and achieve carbon neutrality before 2060.
Compliance Period	2019-2020 is the first compliance period that requires all covered entities to fulfill their compliance by the end of 2021
Covered GHGs	Carbon Dioxide (CO ₂)
Covered Industries for data reporting	Power Generation, Petrochemical and Chemical, Building Materials, Iron and Steels, Nonferrous Metals, Papermaking, and Aviation
Covered Industries for Emissions Trading and Compliance	Power Generation Industry
Covered Key Emitting Entities	2,162 key emission power generation entities
Thresholds	The key emitting entities emitted 26,000 tonnes of carbon dioxide equivalent and above in any year from 2013 to 2020
Carbon Price (Listed Transaction)	From July 16 th to August 11 th , the lowest price was \$7.4 US (¥ 48 Chinese Yuan), and the highest price was \$9.42 (¥ 61.07).
Allowances Allocation	Free Allocation based on the Allowance Allocation Implementation Plan
Price Control	The price of listed transaction shall be between ± 10% of the closing price of the previous trading day. The price block trade shall be between ± 30% of the closing price of the previous trading day.
Offset Mechanism	According to Measures for the Administration of National Carbon Emissions Trading (Trial), key emitting entities may use China Certified Emission Reductions (CCERs) to offset up to 5% of their annual carbon emission allowances that should be surrendered.
Penalties	The national level Regulations on the Administration of Carbon Emission Trading is still under review. According to Measures for the Administration of National Carbon Emissions Trading (Trial), key emitting entities make false reports will be subject to a fine of more than ¥ 10,000 but less than ¥ 30,000. The key emitting entities that fail to surrender carbon emission allowances will be subject to a fine of more than 20,000 yuan but less than 30,000 yuan and will be allocated the emission allowances for the next year that deducted the amount equivalent to allowances not surrendered.

MOBILIZING VOLUNTARY CARBON MARKETS

GROUP DISCUSSION

ADDITIONALITY

How do we define it succinctly?

PERFORMANCE-BASED
 EVERYTHING REQUIRES DOCUMENTATION IN THE FUTURE, WHAT WILL BE REQUIRED?
 REGULATORY ADDITIONALITY: STANDARDS LOOKING AT IT ALREADY
 CAN YOU ANTICIPATE IMPLEMENTATION?
 WORKING WITH GOVERNMENTS IS KEY
 CAN WE PROVE IT AS IT'S DEFINED?
 DO YOU BELIEVE ALL STANDARDS APPROACH ADDITIONALITY IN A COMMON WAY?

YES, SIMILAR APPROACHES WITH SOME DISTINCTION

AND: ARE WE GOING TO STAY THE SAME IN THE FUTURE?
 HOW DO WE EMPOWER THE PRIVATE SECTOR TO ACT?

POST 2020 CONTEXT

WHAT TRANSITION STRUCTURE CAN HELP INFORM AND SUPPORT?
 WE SHOULD FOCUS ON THE PRIVATE SECTOR
 WE SHOULD LOOK AT BENEFIT SHARING OR TAXES ON TOP OF KEEPING METHODOLOGIES AND ACCOUNTING FOCUSING ON ACCURACY
 WHAT THE IDEAL SCENARIO LOOKS LIKE FOR US?

TRANSPARENCY & GOVERNANCE

VOLUNTARY COMPLIANCE MARKETS

UNCLEAR BOUNDARIES TODAY

CONSIDERING VOLUNTARY CREDIT QUALITY IN THE POST 2020 CONTEXT

ADDITIONALITY: MORE CONSERVATIVE PERFORMANCE STANDARDS/ ELIGIBILITY CRITERIA FOR STANDARDIZED METHODS, UPDATED IN LINE WITH NDC CYCLES
 PROVIDE GUIDANCE TO CARBON CREDIT BUYERS
 VALIDATED RETAIL CRITERIA
 FOREST METHODOLOGY
 APPLICATION PATENTS TO CARBON CREDIT PROJECTS
 PUBLICATION OF A REPORT

ADDITIONAL NOT OVER ESTIMATED
 PERMANENT NOT DOUBLE COUNTED
 NO ENVIRONMENTAL/ SOCIAL HARM

LEAKAGE: MAINTAIN CURRENT PRACTICES
 PERMANENCE: MAINTAIN CURRENT PRACTICES
 AVOIDING HARMS: MAINTAIN CURRENT PRACTICES

POTENTIAL IMPLICATIONS OF PARIS & NDC IMPLEMENTATION FOR VOLUNTARY MARKET QUALITY

MOVING TOWARDS NET ZERO
 WHAT ARE COUNTRIES PLEDGING TO DO?
 WE SHOULD NOT PUT UP AN ARTIFICIAL BARRIER
 WE NEED INVESTMENT - IN RISK

MOVE AWAY FROM PREDETERMINED BASELINES

PARIS MOVING TOWARDS GLOBAL AMBITION
 HOST PARTIES: WHAT ACTIVITIES TO IMPROVE?
 HUGE CHANGE IN THE LEVEL OF AMBITION
 COUNTRY SPECIFIC, WE CAN'T PRE-ARBORISE ALL COUNTRIES NOW
 CARBON MARKETS ARE SUPPOSED TO HELP COUNTRIES ACHIEVE THEIR NDCs

CORRESPONDING ADJUSTMENTS

PERMANENCE & REVERSAL

HOW DO WE TAKE DECISIONS?
 WE POST EVERY COMMENT ONLINE (A TRANSPARENT TOOL)
 REGISTRIES & POLITICAL DEVELOPMENT

NOTHING BEHIND CLOSED DOORS
 MAXIMISE TRANSPARENCY
 ELIMINATE OVERSIGHT

OFFSETS OWNERSHIP: PROTECT PROPRIETARY AND DONOT OTHER A OR OFFSETS COOPERATION TO FILE OFFICE PAPER
 MAKE THE PROJECTS HAPPEN

MAINTAINING QUALITY OFFSETS (VERRA)

STANDARDS ARE ESSENTIAL TO MAINTAIN THE QUALITY PARAMETERS

EVOLUTION OVER TIME
 MORE THAN 100 CARBON

INNOVATION SCREENING BANKING
 TRANSPARENCY TO GROUP MEMBERS LABELS TO CONSUMERS
 BASELINE ADDITIONALITY
 AND AN EIGHT DEVELOPMENT VOLUNTARY ACTIVITIES

GOLD STANDARD
 FOCUS ON A SERIES OF SUSTAINABLE DEVELOPMENT

SHAREHOLDER INCLUSIVITY
 SALES IMPACT VERIFICATION
 ACCESS PROVISION

A CONSERVATIVE APPROACH COULD BE TIGHTENED
 ACCURACY IS THE PRICE TAG
 MARKET USE CASES
 UNITS & LABELS CONSISTENT WHEREVER APPLIED

- Three building blocks :

- High-quality, reliable, and comparable data

- ✓ Block Chain

- Harmonized and consistent set of climate disclosure standards

- ✓ Sector Specific, what should digital players do

- Broadly agreed-upon global taxonomy

- ✓ Publicity and Communication
