- ❖ Mainstreaming “Road Ecology” and “Rail Ecology” is critically needed for conservation of “Natural Capital”.
- ❖ “Science-based” and “Evidence-based” planning leads to positive outcomes. Regular dialogues between wildlife biologists and transportation planners is important.
- ❖ Embedding “Wildlife Mitigation” costs in project cost should be the goal.
- ❖ Efficient Design, Development and Delivery (3Ds) combined with (3Cs) Competence, Convergence and Coordination) are a “Combo” recipe for Green Infrastructure Development.

thank you...
