CO-CREATE COPENHAGEN

*A city with
an edge*

*A liveable
city*

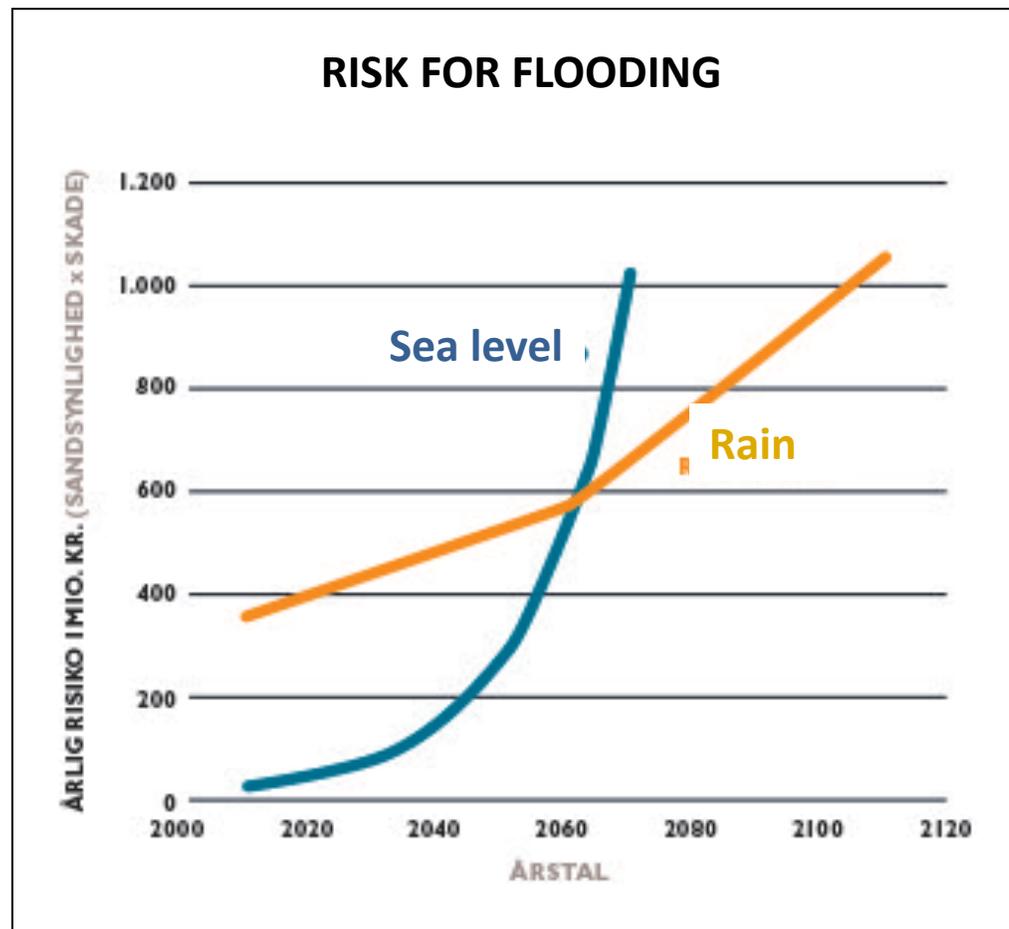

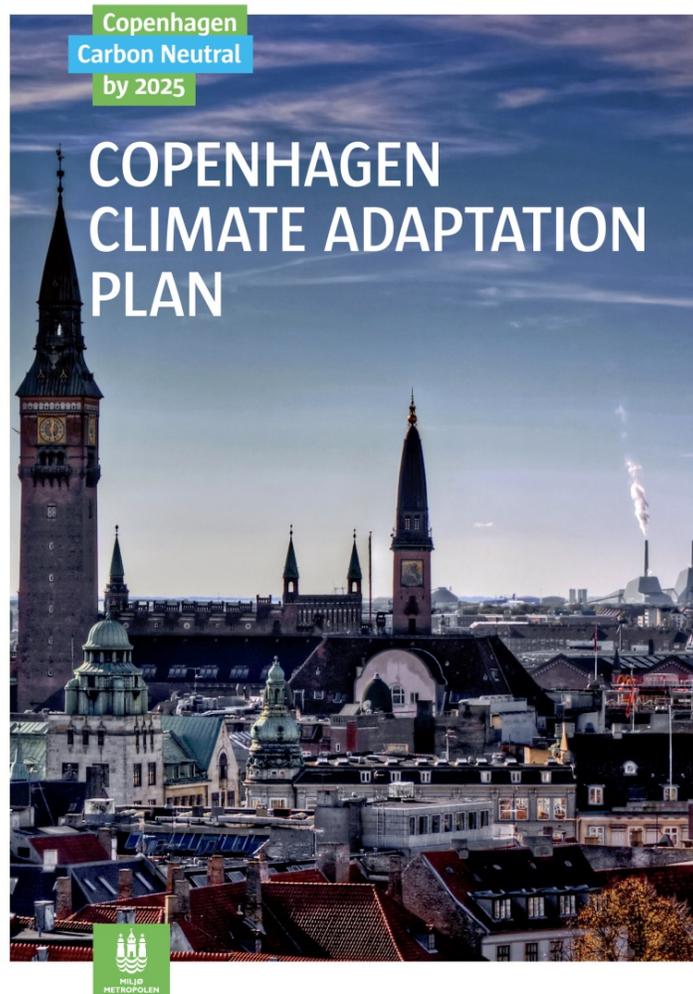

*A responsible
city*

2018

Climate adaptation plan

July 2011 – 1000 year storm

- 150 mm rain in 2 hours
- Damages 1 billion dollars
- Damages to critical infrastructure
- A game changer for the city
- Development of a Cloudburst management Plan

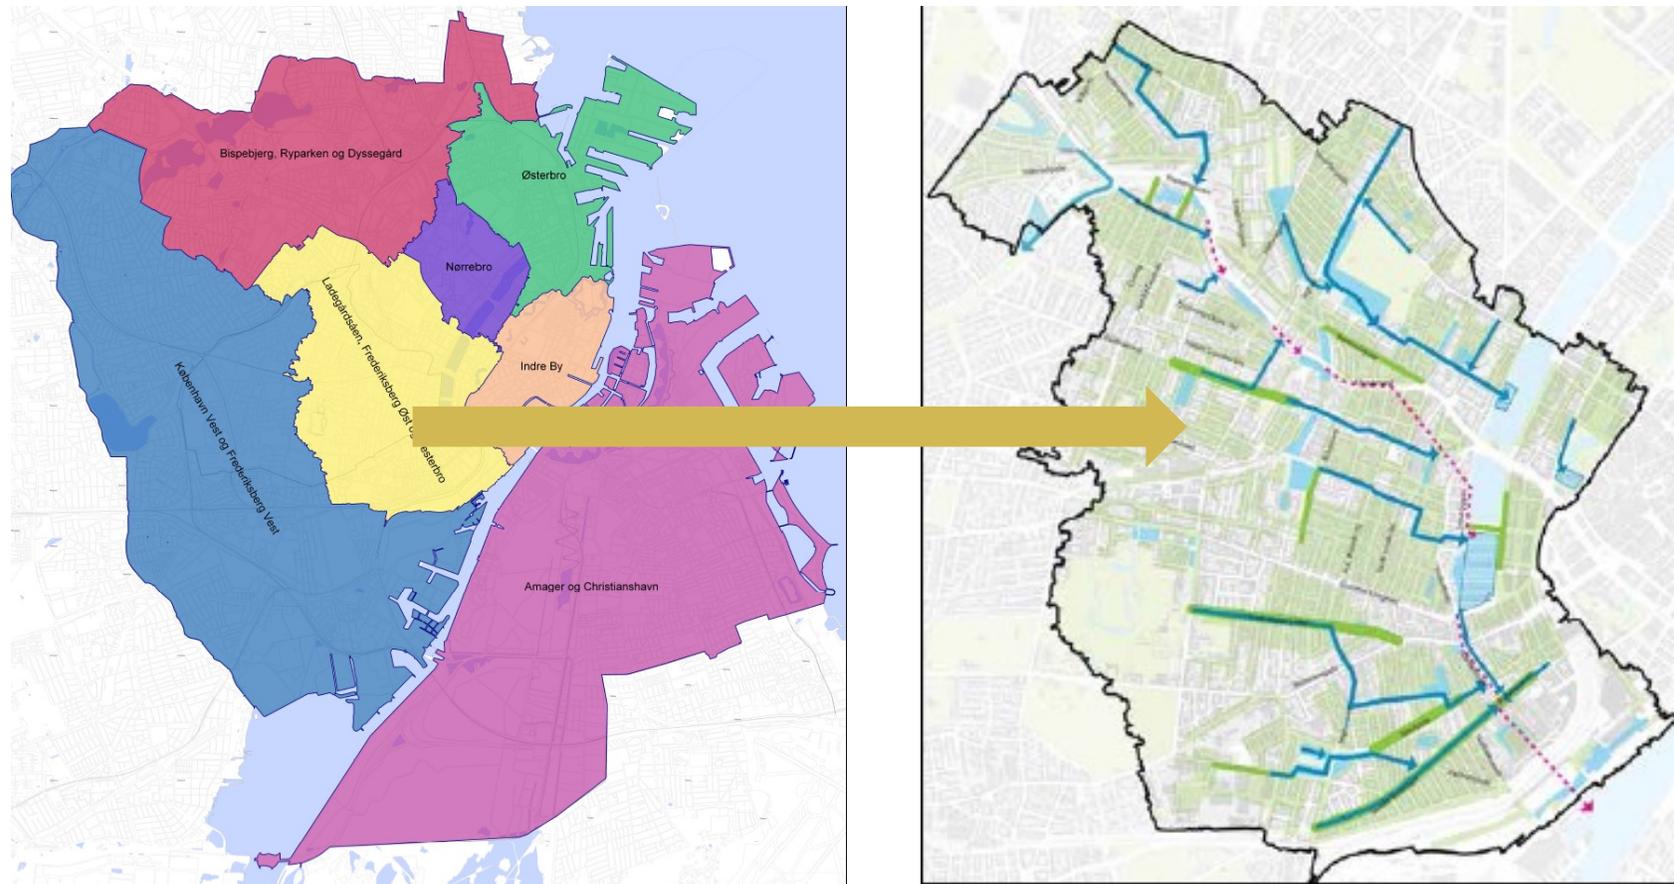

Following the natural flow of water

THE CITY OF COPENHAGEN
CLOUDBURST MANAGEMENT PLAN 2012

Dividing the city into catchments

Climate adaptation - with co-benefits

- Recreational value
- Biodiversity
- Meeting places - social resilience
- Health
- Improved microclimate
- Accessibility and safety
- Economic growth

Tåsinge Square – the first water park

Sct Kjelds square/Bryggervangen

Sct Annæ Square - after

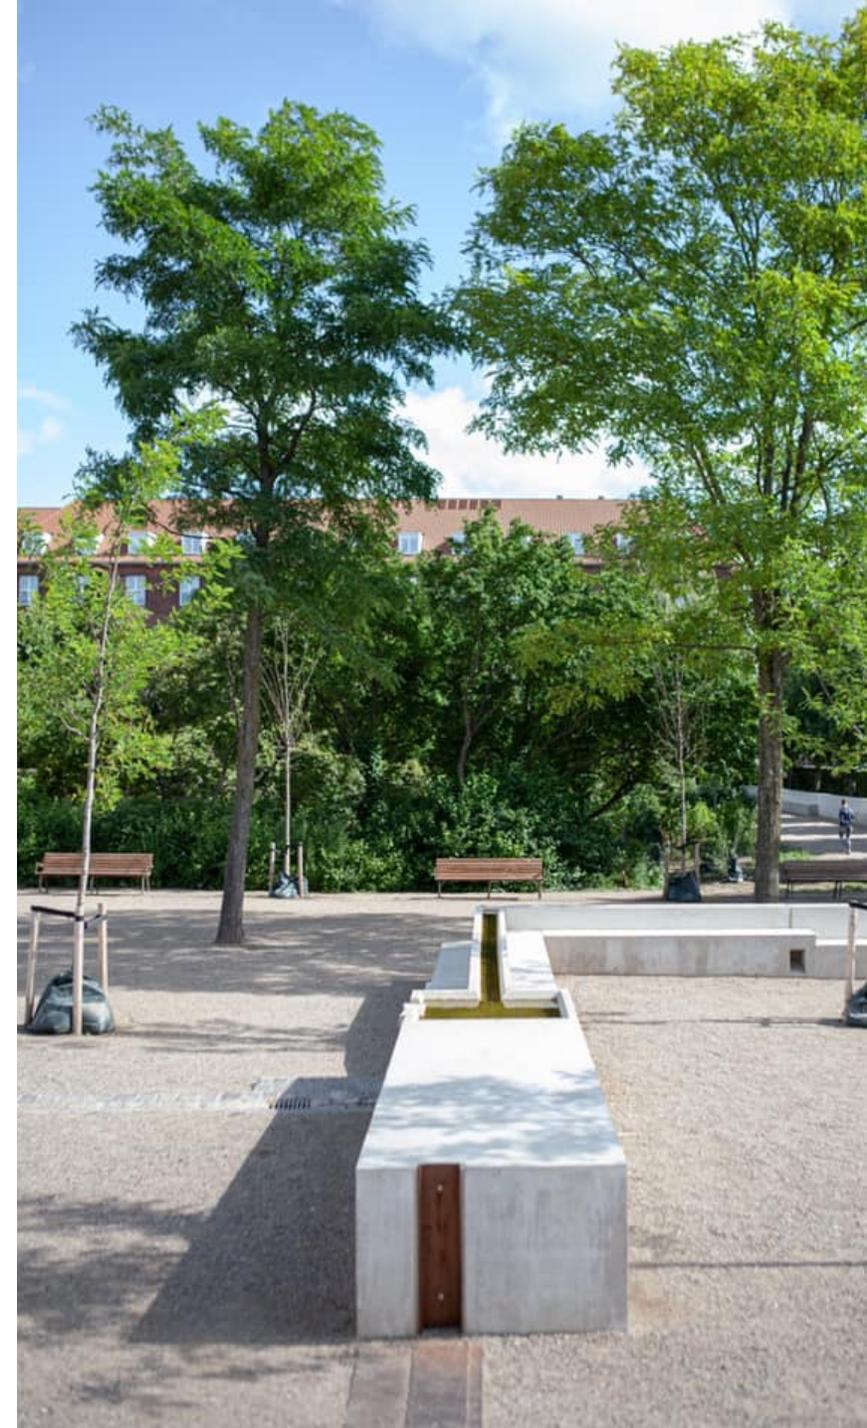

Scandiagade

Enghave Park

Remiseparken

A person is silhouetted on a balcony of a modern building, looking out at a cityscape during a hazy sunset. The sun is low on the horizon, creating a warm, orange glow. The city below is covered in a thick layer of fog, with trees and buildings visible in the distance. The sky is filled with soft, wispy clouds and a few streaks of light.
