

Role of Women in the Clean Energy Transition

Reena Suri
Executive Director
India Smart Grid Forum (ISGF)

The Clean Energy Transition Requires

**Behaviour change,
innovation (supply,
delivery, usage) and
integration across
sectors**

**Diverse
backgrounds,
capabilities**

**A large diverse
talent pool**

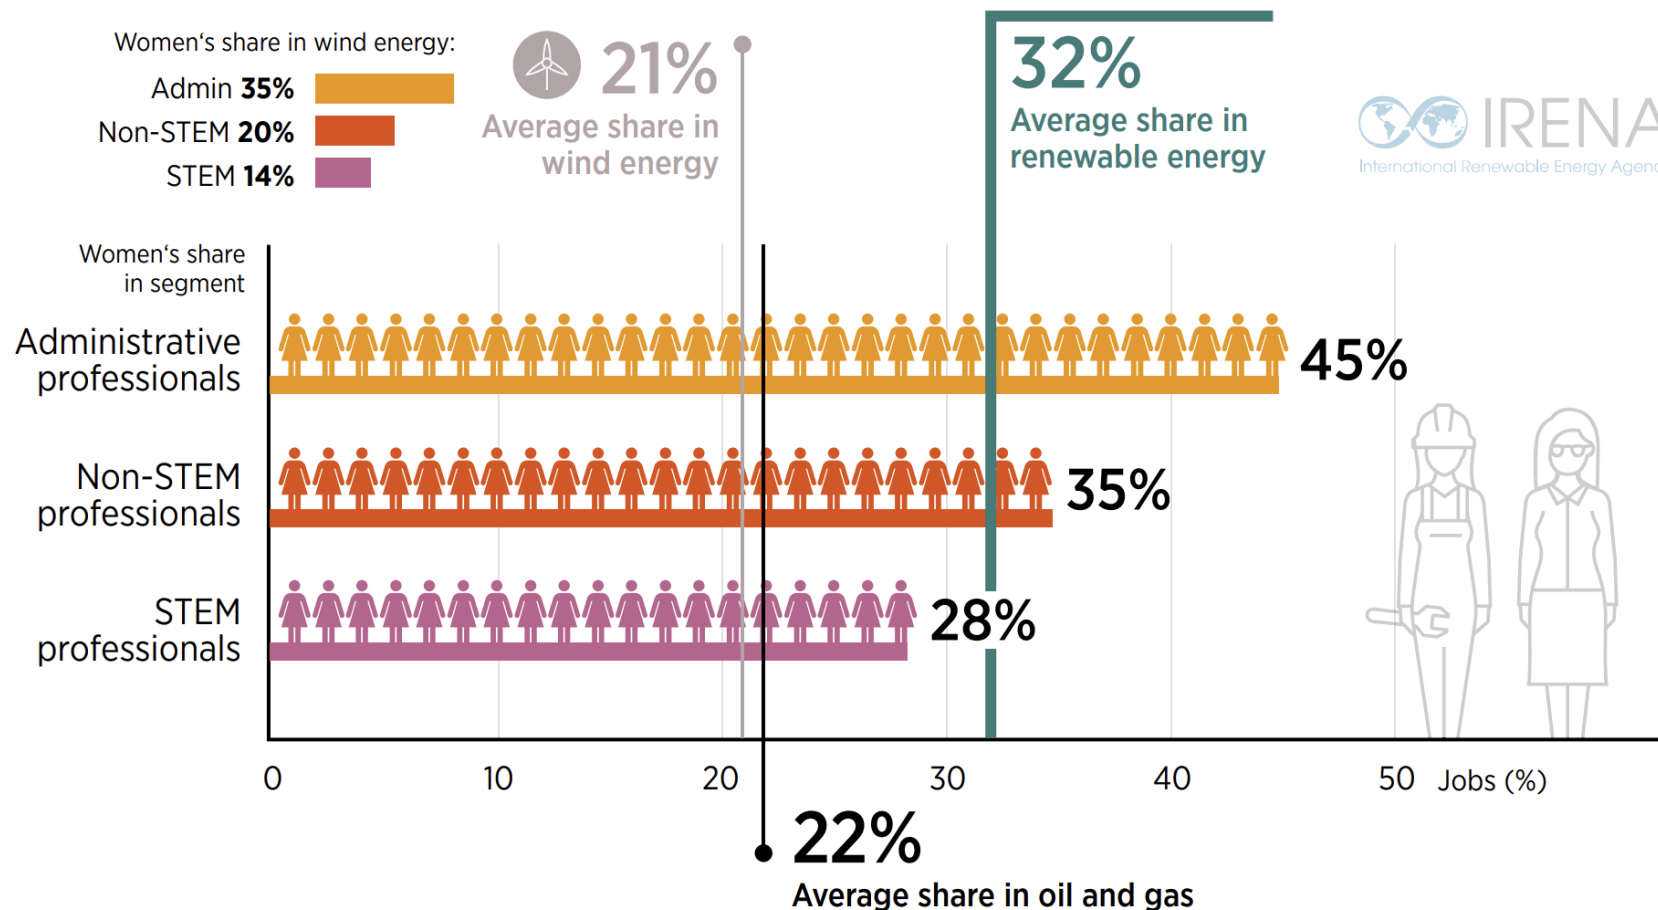

Global Jobs in Renewable Energy

32%

share of women in the
renewable energy workforce

21%

share of women in the
wind energy workforce

Note: STEM = science, technology, engineering and mathematics.

1. Propagation of STEM education and Women Participation in STEM related jobs

2. Competency as a Change Enabler for Breaking Gender Stereotyping

3. Skilling and Upskilling to Mitigate Dearth of Talent Pool

4. Gender Sensitive Policies for Holistic Workforce Development

5. Support Ecosystem, Mentoring and Role Modelling for Growth of Women Workforce
