## Output 2: Zero municipal waste action plan for Guangdong Province developed

第二：广东省零城市  
废物排放行动计划

回收&升级改造新材料  
废物转化为能源  
材料回收

- Focus on designing and prioritizing actions to significantly reducing municipal waste in Guangdong Province, with a goal of nearly full recovery of municipal waste,
- include research on and policy design for municipal waste classification and recommendations to efficiently manage segregation and recycling technologies in both highly developed urban centers and lesser developed towns and villages,
- The 3R principle will be applied in capacity development and in the action plan, and pilots will be designed to improve waste management and resource recovery,
- City governments, communities, households, and local businesses will be engaged through public awareness raising initiatives and government incentives will be proposed to encourage industry and people to do the "right things" (e.g., designing green products aimed at reducing or eliminating waste),
- propose options for government-imposed disincentives—such as charges, taxes, and levies—for doing the "wrong things" (e.g., continuing to produce waste and use up natural resources).

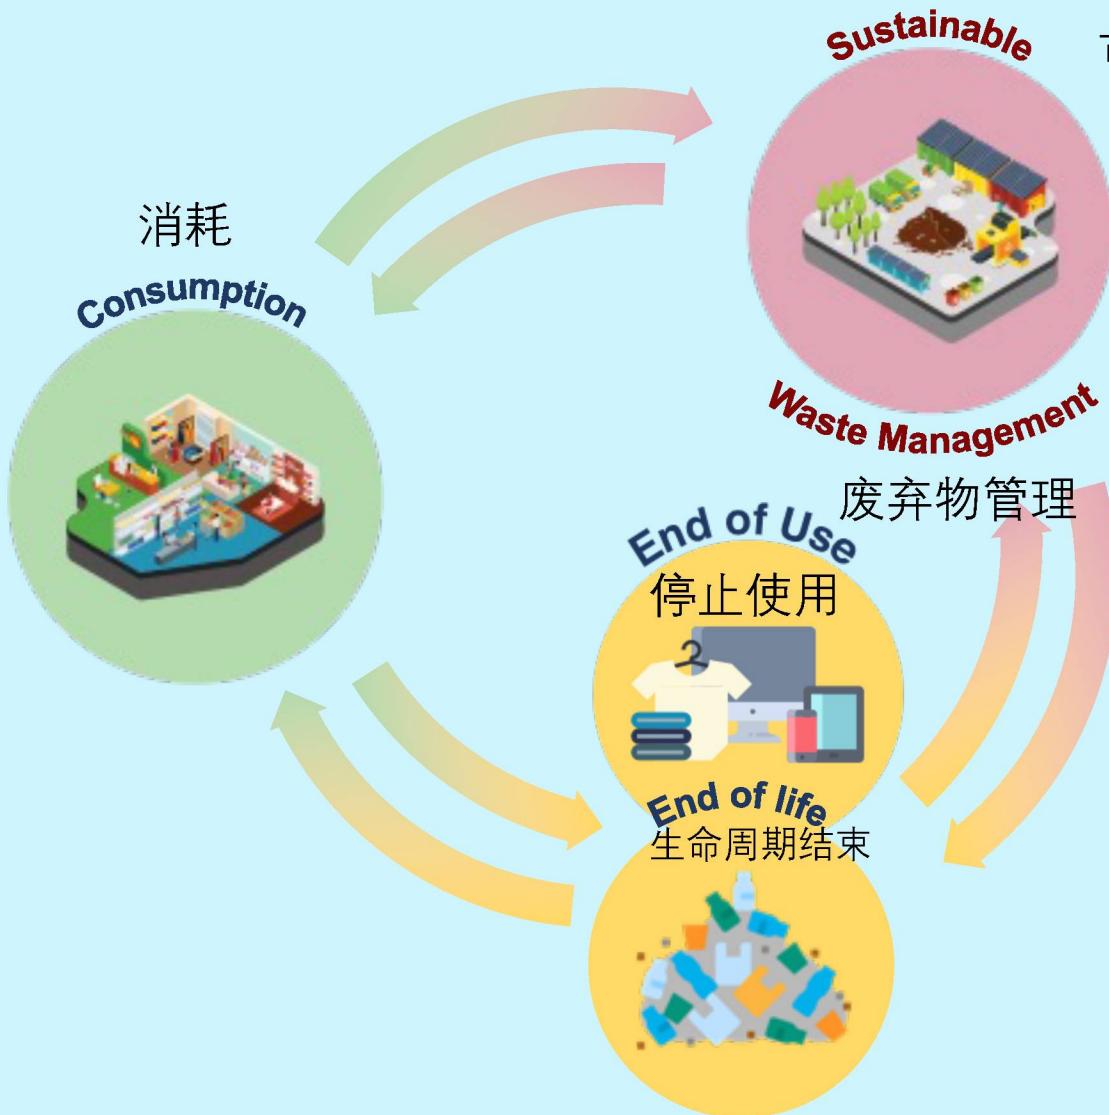

- 重点设计和优先考虑广东省显著减少城市垃圾的行动，显著加快城市垃圾回收的效率；
- 协助广东省在发达城市和欠发达城市制定有效的城市垃圾管理政策（包括制度、实施机制、流程、管理、评估和回收技术）；
- 将 3R 原则应用于能力发展和行动计划中，并设计试点以改善废物管理和资源回收，重点关注有机废物、可回收废物和危险废物；
- 通过提高公众意识的举措，让市政府、社区、家庭和当地企业参与进来；
- 提出政府激励措施，鼓励工业和居民做“正确的事情”（例如，设计和消费旨在减少或消除浪费的绿色产品）；
- 为政府强加的抑制措施（例如收费、征税）提出选项，以防止做“错误的事情”（例如，继续产生废物和消耗自然资源）。

# Output 3: Green circular e-commerce packaging and logistics pilot program for the People's Republic of China Developed

## 第三：中国电商包装和物流的绿色循环试点项目

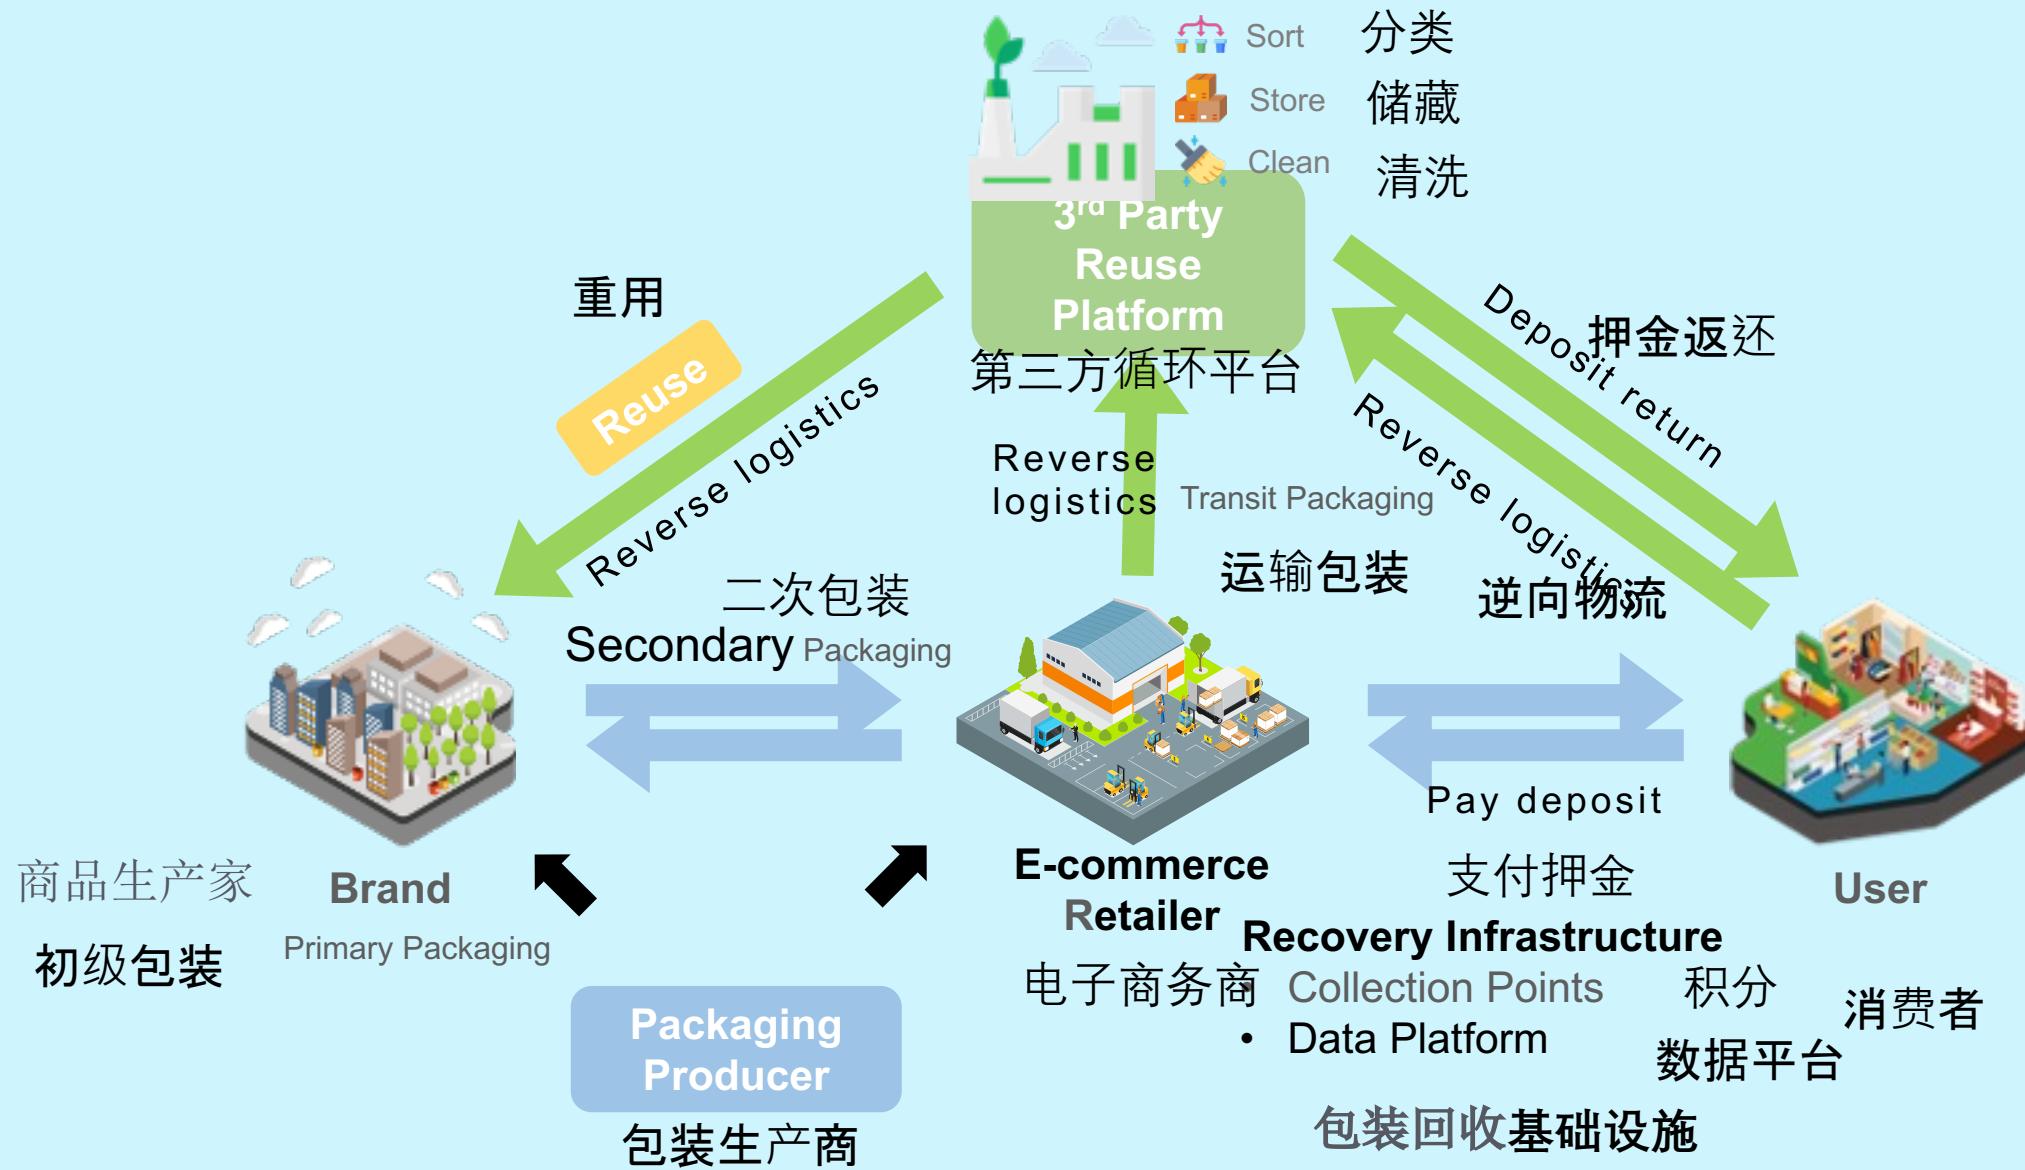

1. Focus on the important emerging challenge of reducing plastic pollution caused by significantly increasing e-commerce and food delivery, and associated packaging and logistics
2. Support the development of a national pilot program customized for cities of various types, sizes, and development levels, engaging market players in e-commerce and logistics
3. Explore new forms of recyclable and/or reusable packaging, logistics, and distribution equipment and facilities with the goal of creating a green supply chain in which single-use plastics are eliminated
4. Design for a pilot program to include options for market-based instruments and business models

- 1.关注如何减少因电商和食品配送以及相关包装和物流显著增加而造成塑料污染的重要新挑战；
- 2.支持针对不同类型、不同规模、不同发展水平的城市开展国家试点，吸引电商和物流市场的主体参与进来；
- 3.探索可回收和/或可重复使用的包装、物流和配送设备和设施的新形式，以创建消除一次性塑料的绿色供应链；
- 4.设计试点项目，包括市场工具和商业模式的选择。
