

Module 5: Policy Implementation Mechanisms & Challenges and Consumer Behavior of TEPA

1. Set the database and concerned materials/products

- propose plans of elimination and replacement

2. Promote easily recyclable products

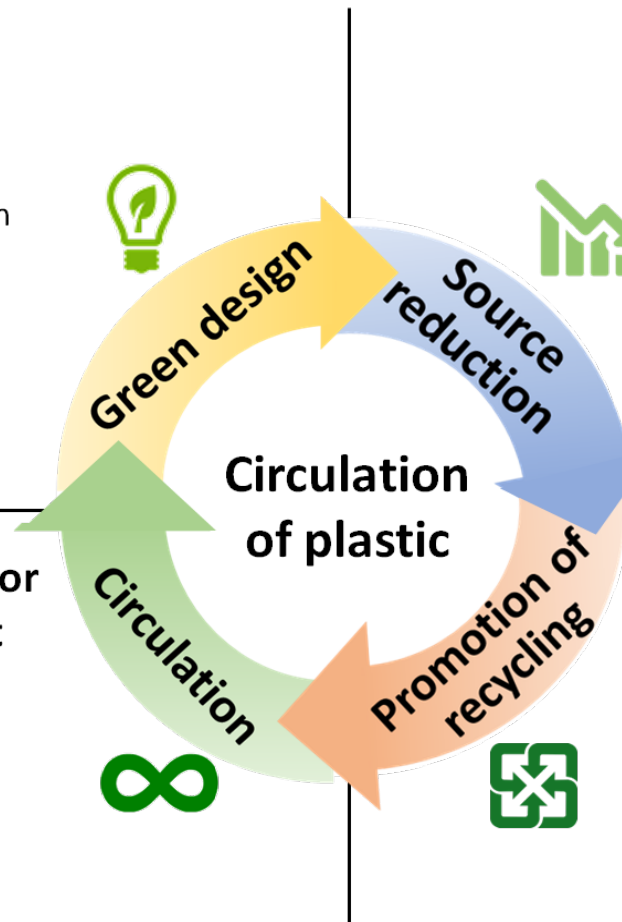

- limit over-packaging

1. Use voluntary methods or laws to achieved target of recycled content

- certification and information disclosure
- verification mechanism
- risk assessment

2. Create recycled material market

- amend laws
- enhance communication
- connect industrial chain

1. Guide by laws

- promote source reduction
rental tableware/eco-friendly
nightmarket/online shopping packaging
- alternative material

2. Expand the driving force

- green procurement and consumption
- environmental education

3. Innovative business models

For those lack of market incentives

1. Strengthen recycling system

- increase articles announced for recycling
- raise the recycling rate
- improve recycling infrastructure

2. Introduce innovative technologies to promote easy-to-recycle products

- differential rates of recycling fee for high-value or innovative recycling technology
- reasonable reward and incentive mechanism
