GOOD

Supporting *the Vulnerable* through Technology

EG Programmes and Outcomes

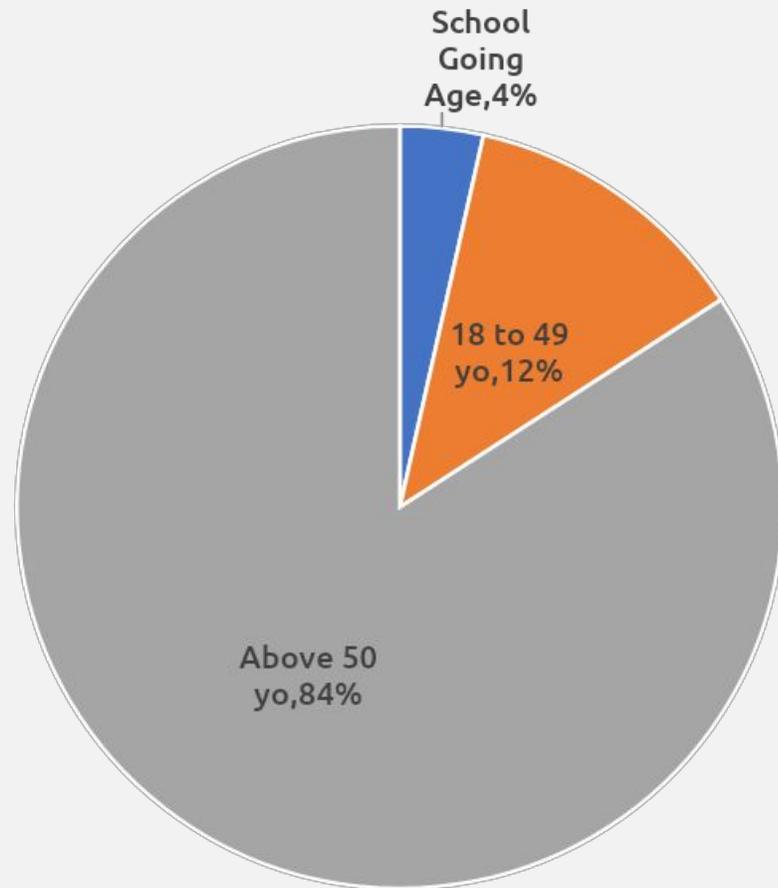

Engineering Good's philosophy is to encourage and empower inclusiveness for disadvantaged communities.

For people
without disabilities,
technology makes
things *easier*.

For people
with disabilities,
technology makes
things *possible*.

What You Should Know

PWDs in Singapore ~500,000

<https://www.msf.gov.sg/policies/Disabilities-and-Special-Needs/Documents/Enabling%20Masterplan%203%20%28revised%2013%20Jan%202017%29.pdf>

Some Challenges Faced by PWDs

Abuse and Bullying

Education Pathways

Lack of Caregiver Support

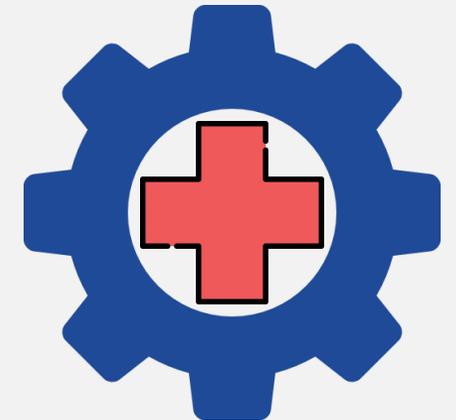

Challenges at Work

Public Infrastructure

Housing & Financial Independence

Lack of Appropriate & Affordable Assistive Technology

Sports & Recreation

Social Inclusion & Stigma

Why You Should Care

Individual

- A life-changer – a first step in accessing education, work and employment, and better health and well-being.
- Dignity, self-confidence, and self-esteem.
- Access to employment or entrepreneurship, more qualified jobs, and higher incomes.
- Seniors need less support in a familiar environment.

Community

- Reduced care needs.
- Users' ability to contribute to family income and community development.
- Active participation of all members in reaching sustainability, leaving no one behind.
- Everyone benefits from enabling environments.

Society

- Labour participation of larger parts of the population.
- Active participation of older adults in community life, which can reduce frailty and loneliness, and delay the development of medical and social care needs.
- Attainment of social mobility boosts the overall economy and happiness of our society.
- Improve social cohesion and diversity in society.
- Reduced need for informal care and costs of formal care.

Area,
Perimeter
and Volume

Perimeter
The perimeter is the distance
around the outside or edge of a
shape or area.

Area
The area is the total surface
of a shape or object.

Perimeter of a rectangle

The perimeter of a rectangle is
the sum of all its sides.
Perimeter = $2 \times (\text{length} + \text{width})$

cop hopped over the flopped mop.

They will have problems with their hand functions - especially like grasping things,

What is EG doing about it

Bespoke Projects

EG work with partners and volunteers to develop user-centric technology solutions to address the problem statements.

This programme also serves as a incubator Tech for Good projects.

Impact potential of close to 500,000 PWDs.

Tech for Good

Using the challenges shared by our partners, EG organises this innovation challenge for passionate and creative youths, 15-25 years old, to develop innovative solutions for PWDs and their caregivers.

Impact potential of close to 500,000 PWDs.

Workshop and Makerspace

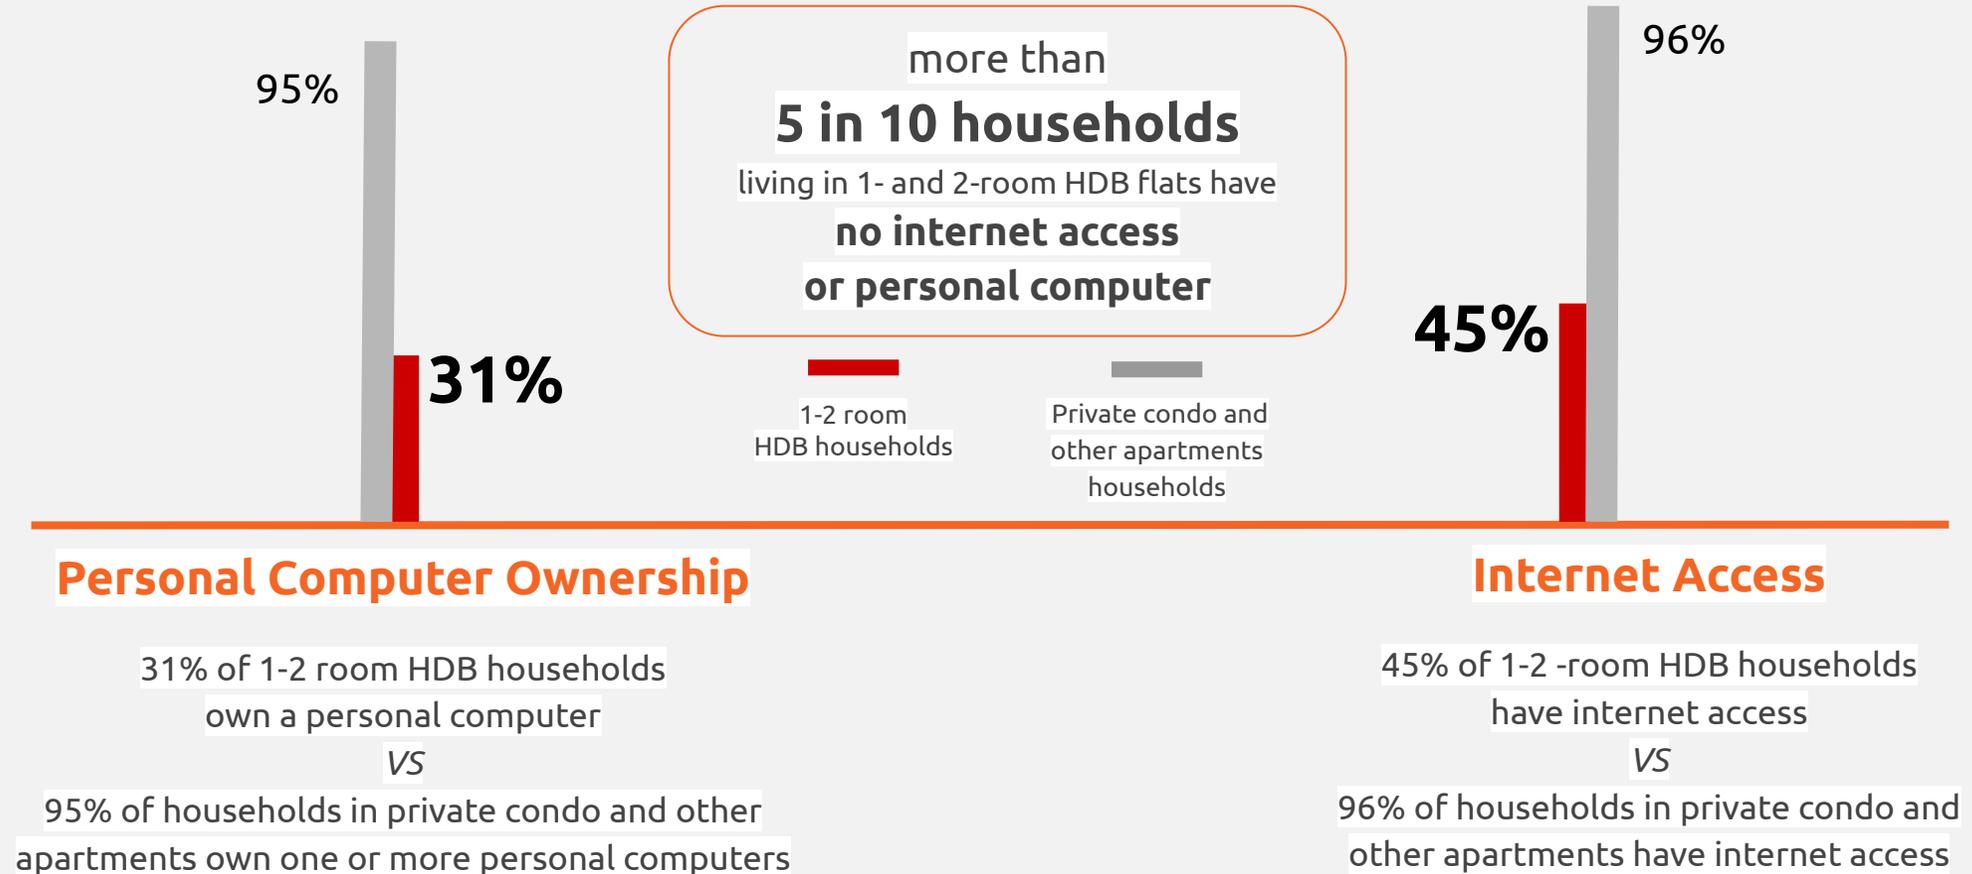

The EG Makerspace is the R&D arm of Engineering Good. Its focus is on providing the knowledge, skills, and infrastructure to develop and “hack” new solutions and prototypes especially for Assistive Technology implementations.

For people
with the means,
technology
is a *lifestyle choice*.

For people
without the means,
technology *enables*
opportunities.

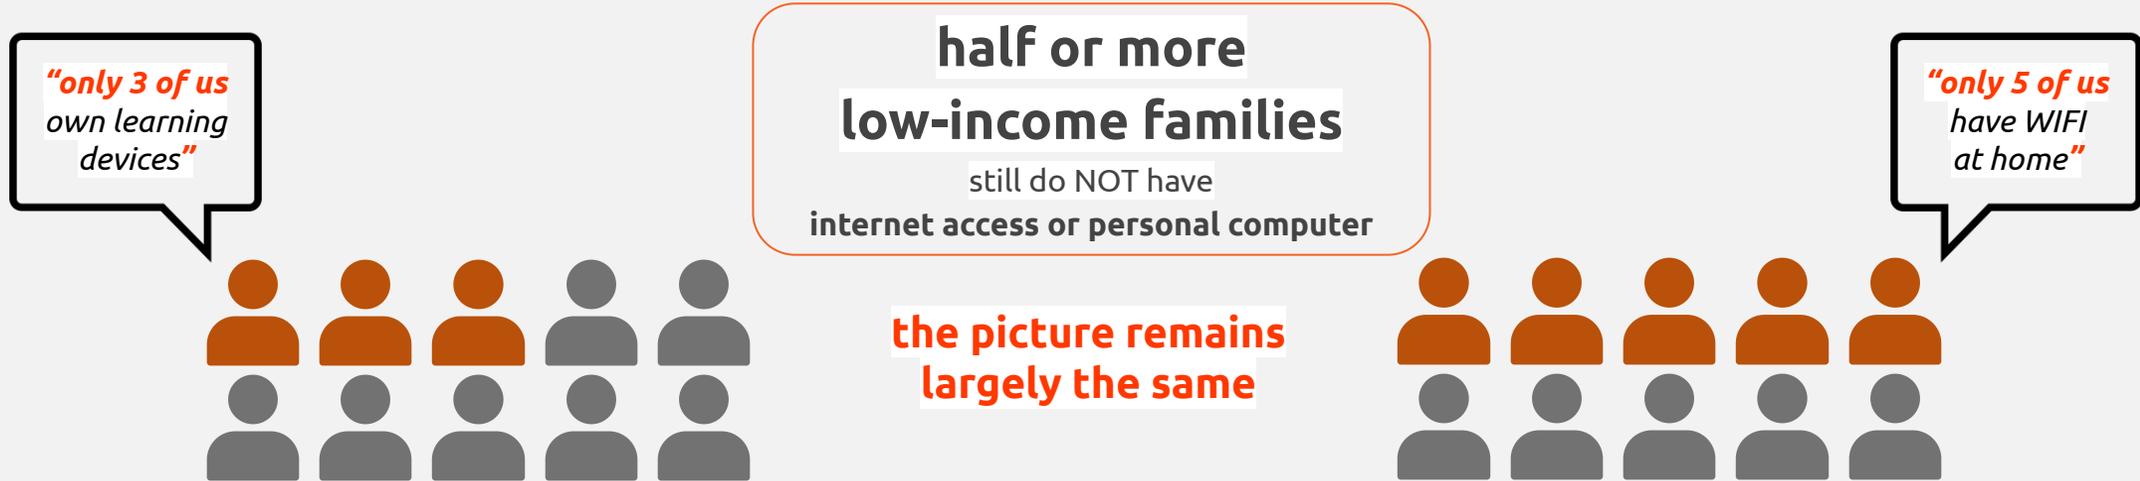

What You Should Know

Covid-19 Deepened the Digital Divide

What You Should Know

After Two Years of Covid-19

Learning Device Ownership

Amongst 3,000 low-income families, only **3 in 10 own a learning device** (computer, laptop or tablet)

WIFI Access at Home

Amongst 3,000 low-income families, only **5 in 10 have WIFI at home**

Why You Should Care

Individual

- A life-changer – a first step in accessing education, work and employment, and better health and well-being.
- Access to employment, more qualified jobs, and higher incomes.
- Better access to knowledge and services found online.
- The ability to stay in touch with others via social and communication platforms.

Families

- Participation in digital economy with a greater variety of product and services.
- Better access to services, knowledge, healthcare, and government services.
- Active participation of all family members in reaching a better socio-economic status.
- The ability to stay in touch with family members via social and communication platforms.

Society

- Greater labour participation of the population.
- Greater development of society through participation in the digital economy.
- Increased productivity from the use of digital technologies.
- Attainment of social mobility boosts the overall economy and happiness of our society.
- Improve social cohesion and diversity in society.
- Access to new economies made possible through new and emerging technologies.

What is EG doing about it

Laptop Fixers Community

EG trains volunteers as laptop fixers to be deployed at estates around Singapore. This ensures that broken down devices are repaired for low-income families

This programme rolled out in May 2022 with the aim of least 4 estates having this service by end 2023 **impacting over 7,000 households.**

Computers Against COVID

EG collects donated devices, refurbishes them, and gives out to the disadvantaged.

As of Oct 2022, over **7,000 laptops** have been given out. Potentially, **over 25,000 households still need laptops.**

Digital Inclusion

Laptop
Provision

WIFI for All

Early Stage
Concept

WIFI for All

EG is working closely with govt agencies, corporate partners, as well as volunteers to develop solutions to ensure universal access to WIFI for all low-income households. **Potentially impacting at least over 30,000 low-income households.**

**All slides hidden after this are for
additional info on CAC
and does not need to be used,
UNLESS more details is needed...**

“Hi, I am a single-mother with two children and two elderly parents to support.

We currently have one device at home, and are ineligible/lower in priority to get or loan a 2nd device from the school, but my children’s lessons are at the same time.

Because they are children, they are very slow to do their homework on the laptop, or they procrastinate, so taking turns has been difficult as I am not home to supervise.

““
Can you give my younger child a laptop?
””

““
Can you help?
””

“Hello, I have three children. Two of them have been taking lessons on their mobile phones.

I have just lost my job but I am ineligible to apply for family aid as my CHAS card colour is still green (highest of 3 grades), and only blue card holders are eligible (lowest grade).

However it will take 6 weeks to process my CHAS card downgrade, and my children need the laptops now.

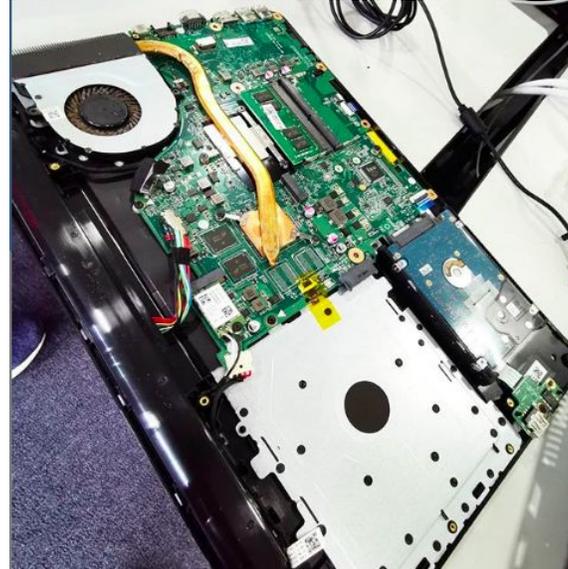

* CHAS = community home assistance scheme, a low-wage assistance scheme in Singapore

True accounts from beneficiaries’ requesting for laptops.

The Simple Idea

Collect old laptops that have been donated

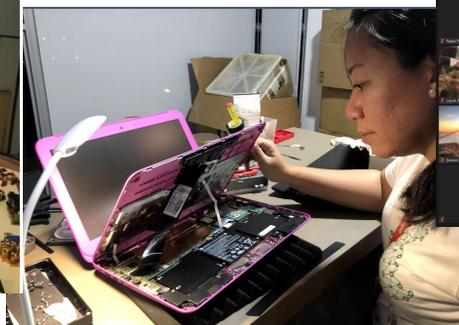

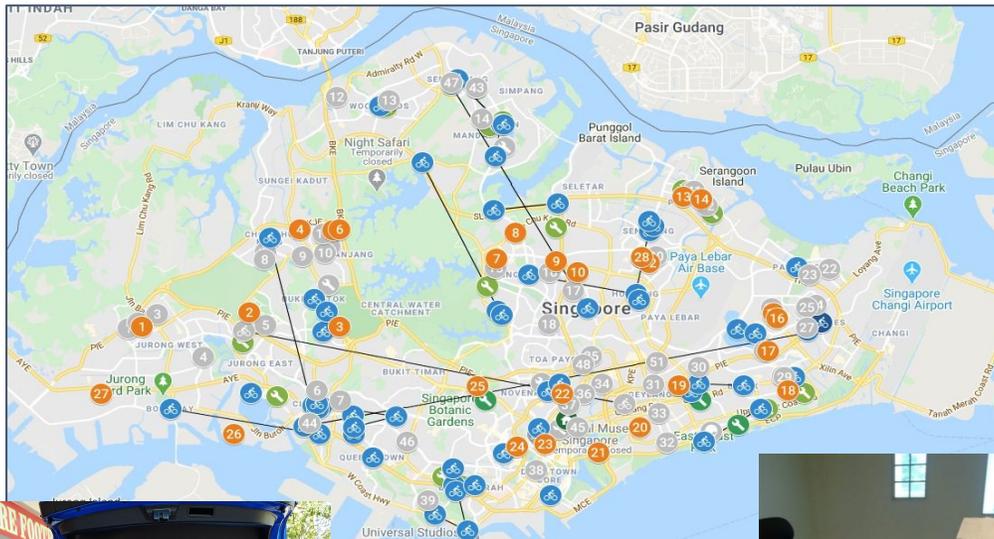

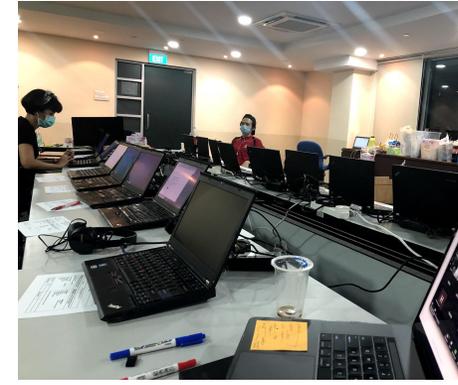

Refurbish them

Give laptops to children from low-income families

Simple Idea ≠ Simple Execution

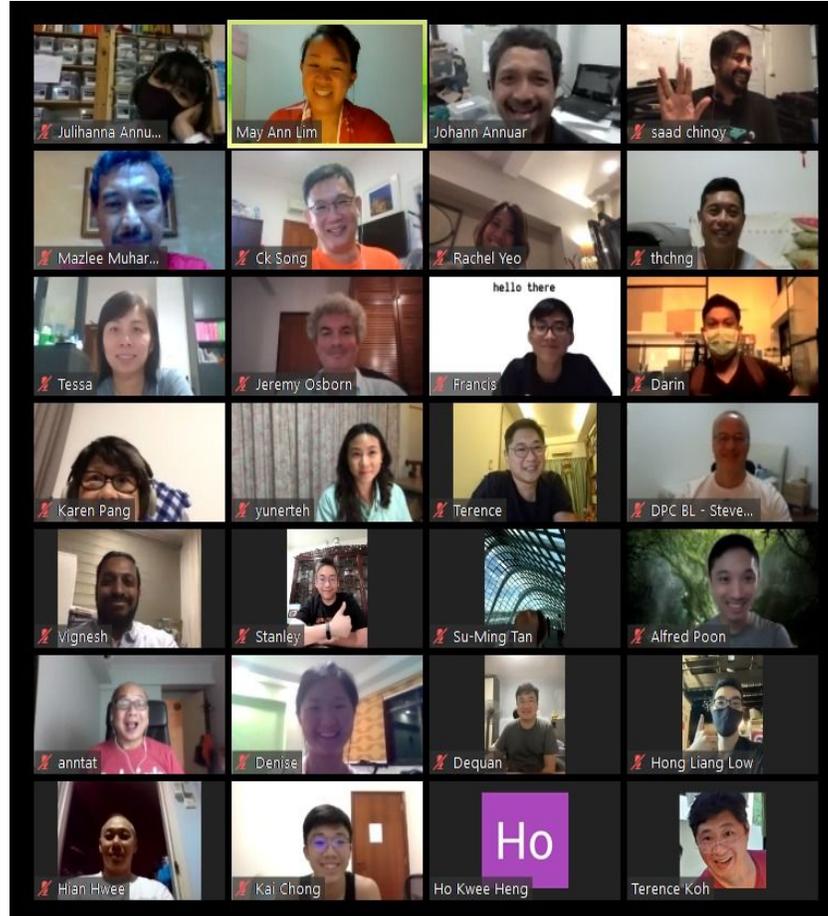

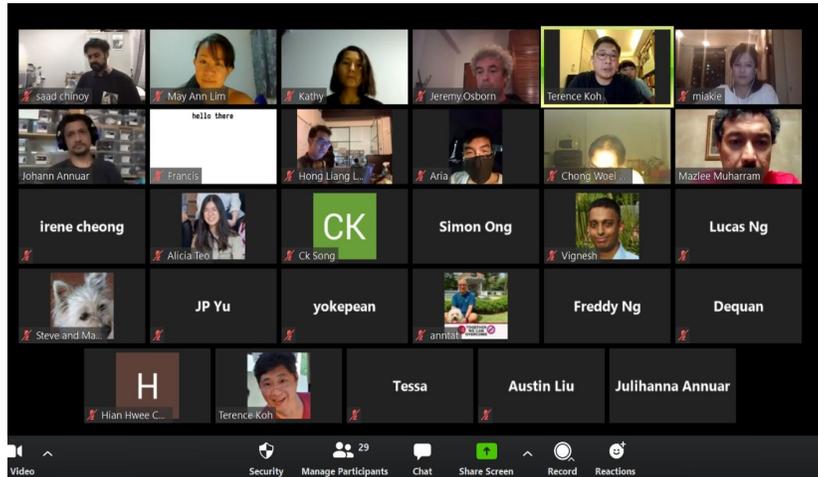

- Circuit Breaker measures = minimal face-to-face interactions
- Lack of resources to manage influx of laptop requests
- Volunteers showed up (virtually)!

**It takes a Village... and
the whole Kampung
chipped in...**

More Than 900 Families Don't Have A Laptop For HBL. Volunteers Are Trying To Fix This Problem

Current Affairs | Features | 18 Apr 2020

Images courtesy of [Engineering Good](#).

When the decision to close schools and conduct home-based learning (HBL) was announced on 4th April, Rebecca (not her real name), a single mother, approached her child's primary school for help. She didn't have a laptop, and was worried that her child could not do HBL.

EG: The Road Ahead

2022 to 2023

Invest deeply in the communities to develop and implement solutions and programmes.

- Push on with CAC
- Roll out and expand LFC
- Develop well-designed AT Solutions
- Improve T4G awareness and quality of projects

2024 to 2025

Expand the reach of EG's work by creating momentum outside of EG itself.

- Push on with CAC and advocate for universal digital access
- Expand LFC in a sustainable way
- Incubate T4G projects into working products
- Go-to-Market AT Solutions

2026 to 2027

Export the impact of EG beyond Singapore.

- Develop CAC in ASEAN
- LFC to be community-run with EG
- Support a view of creating other ABCD programmes
- Curate an ASEAN AT collective
- Recruit overseas T4G teams or host overseas edition

Stretch/Opportunity Goals

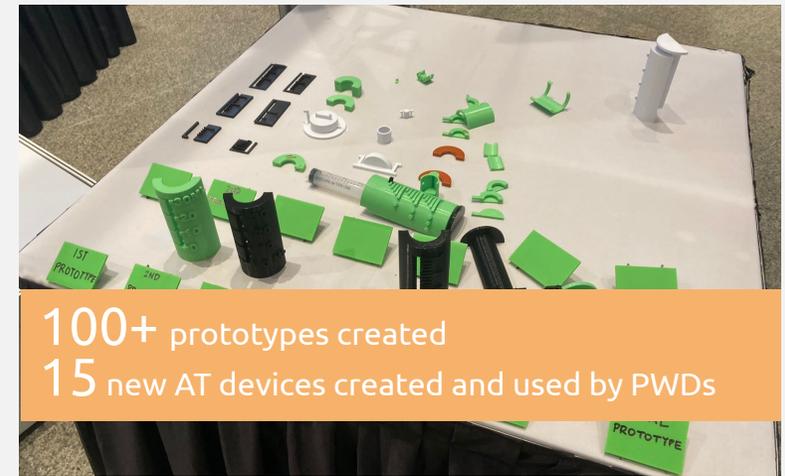

- Register EG Global entity
- Be the go-to source for digital inclusion knowledge and AT project deployment
- Rural development projects with AT and DI focus
- Humanitarian/Crisis AT Support
- Humanitarian/Crisis DI Support
