Thinking Ahead – *Doing more*

- Look back on the achievements – we have plenty of progressive project examples
- Influencing project officers - gender sensitization, not just awareness
- Building on what is there already – Tajikistan example
- Engaging upstream with climate, gender, technology specialists jointly – thinking together to find common solutions
- Women + inclusive technologies = transformative, increased resilience
- Be bold and find the avenues to do more – mobilize grant resources, find the complementarities, value addition, stand-alone initiatives, more gender-focused
- Time for a gender-inclusive, AI and digital agriculture solutions focused technical assistance
