Recommendations moving forward

❑ Road

- Focus toward **all-weather, safer, and sustainable** roads: climate-resilient roads and road infrastructure enhanced by prioritizing safety for all road users, and supported by a robust RAMS and adequate funds for maintenance

❑ Railway

- **Revitalization** of the railway sector: modest-scale engagement to strategically identify large investments in feasible pipelines (e.g. ML-1)

❑ Smart Mobility

- Continue focus on **sustainable, low emission** urban transport network while reducing congestion in cities while **improving mobility**.

- ❖ Innovative approaches to transportation planning and design are essential for creating sustainable, efficient, and climate resilient transport system.
