the GX Model with OTEC at its Core in Cooperation
with ADB**

YASUYUKI IKEGAMI
Professor and Director, Institute of Ocean Energy
Saga University, Japan

The knowledge event is the 10th of a series organized by the Emerging Areas Team, Energy Sector Office. The Emerging Areas created under ADB's New Operating Model aims to operationalize frontier technologies and integrated solutions, foster and drive innovation in policy and operational issues, catalyze thought leadership and future looking bank wide initiatives for future business, collaborate across departments for innovative solutions, identify and develop knowledge and flagship events, and mobilize cofinancing.
