COUNTRY LEVEL DISCUSSION:

MALDIVES

Key insights or lessons gained from the forum that could improve project's performance or outcomes

- The importance of properly identifying facts, risks and uncertainties, to ensure they are properly addressed at the appropriate stages of the project life cycle.
- Assessing the likelihood and impact level of risks identified, so that proper risk management techniques can be applied i.e., avoid, transfer, reduce and mitigate.
- The importance of proper documentation of risks faced in past projects so that we could transfer lessons learnt for future projects.

Actions to improve project's risk management approach

- Strengthen stakeholder engagement and consultation through out the project, not just during the project design stage.
- Systematic monitoring of projects beyond outputs and milestones.
- Ensure that TORs of consultants include risk assessment as part of the deliverables.
