IMPLEMENTATION
BEGAN IN JULY
2024

Implementation progress & Challenges Encountered

The project remained stalled in the 'explore phase' for an extended period due to system design challenges and other contributing factors. These issues have now been addressed, and we are currently working with SAP to renew the extension of the implementation contract.

Off the shelf SaaS vs
complex government:
Complications

Customizations

Internal delays in
approvals,
documentation, and
readiness

Postal system not
strong enough to
support an online
catalogue marketplace

System default control
levels not sufficient

Data cleaning and data
migration limitations

More Challenges Ahead

Ensuring successful
change-management
and capacity-building

Updating regulations
to align with e-GP
processes

Phase 2: Onboarding
local councils

Vendor onboarding

Budgetary
constraints due to
delays

Staff limitations

Outlook

- Project now expected to be completed by mid of 2026.
- Implementing the system remains highest priority.
- Even if full end-to-end digitization is not immediately achievable.
- Once the core processes are digitized, advancing further will be simpler.

THANK YOU!
