PROCUREMENT PROCESS

Public procurement in Uzbekistan is open to foreign suppliers

All stages of procurement are digitized and conducted electronically

E-PROCUREMENT SYSTEM

Electronic Store	Goods selected by general characteristics	E-planning of procurement, automatic registration of contracts in the treasury, E-invoice, E-payment
Reverse Auction	Competitive procedure where price is the only criteria	
Competitive bidding/ tender	The contract is awarded to supplier which offered the best terms of execution, including non-price terms	E-planning of procurement, electronic submission of documents, assessment criteria, electronic determination of results
Simplified procedure	Procedure for small-value procurement which is conducted by reviewing prices from open sources	
Two-stage procedure	Procurement of goods or services with complex specifications that cannot be precisely defined in advance	E-contracting, publishing results of the procedure
Direct contracting	Procurement from natural monopolies, sole source procurement	E-contracting, verified suppliers, less time spent on signing of the contract.

1. Smart Contract

Electronic store

Electronic Auction

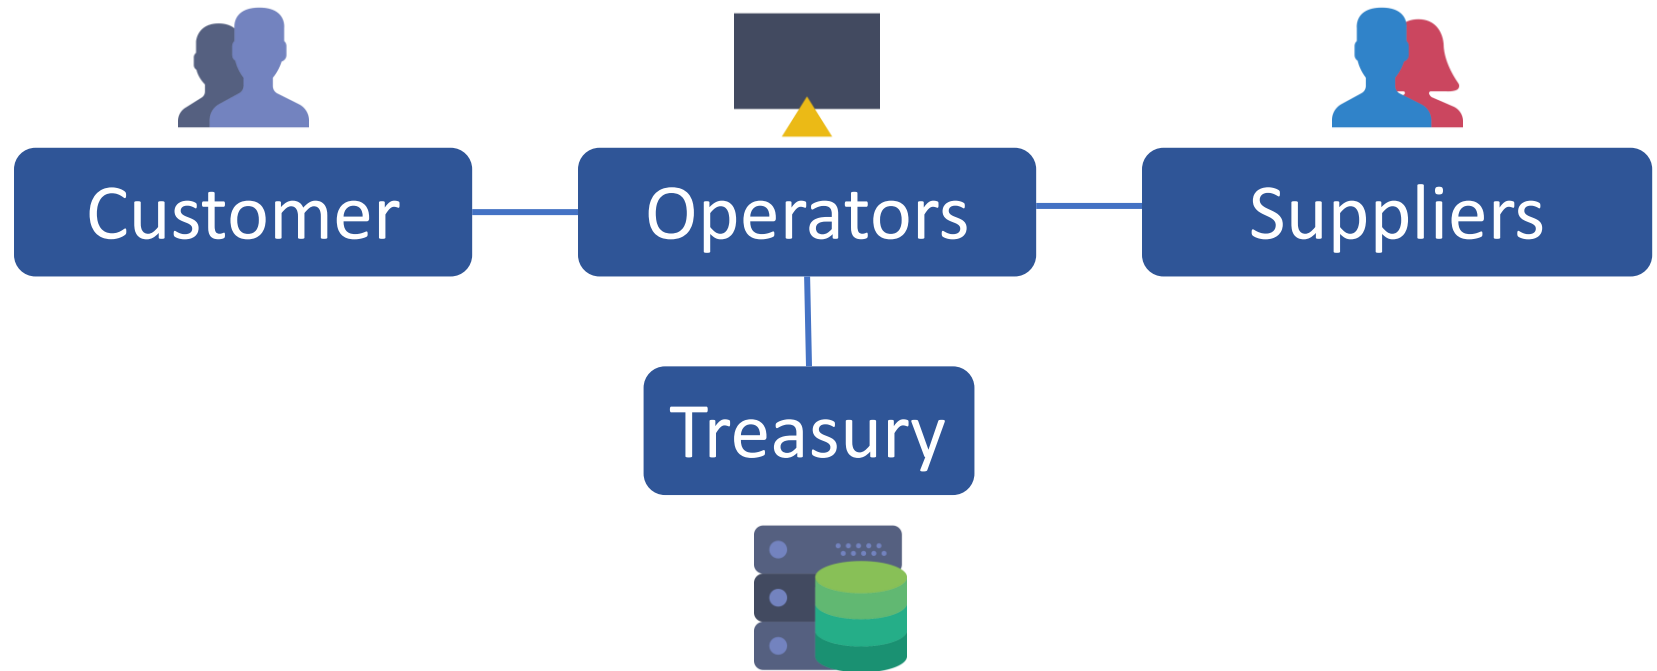

Procurement in the field of construction — Competitive bidding/ tender and direct contracting

2. From Sept 1, 2026

Electronic competitive bidding

Electronic tender

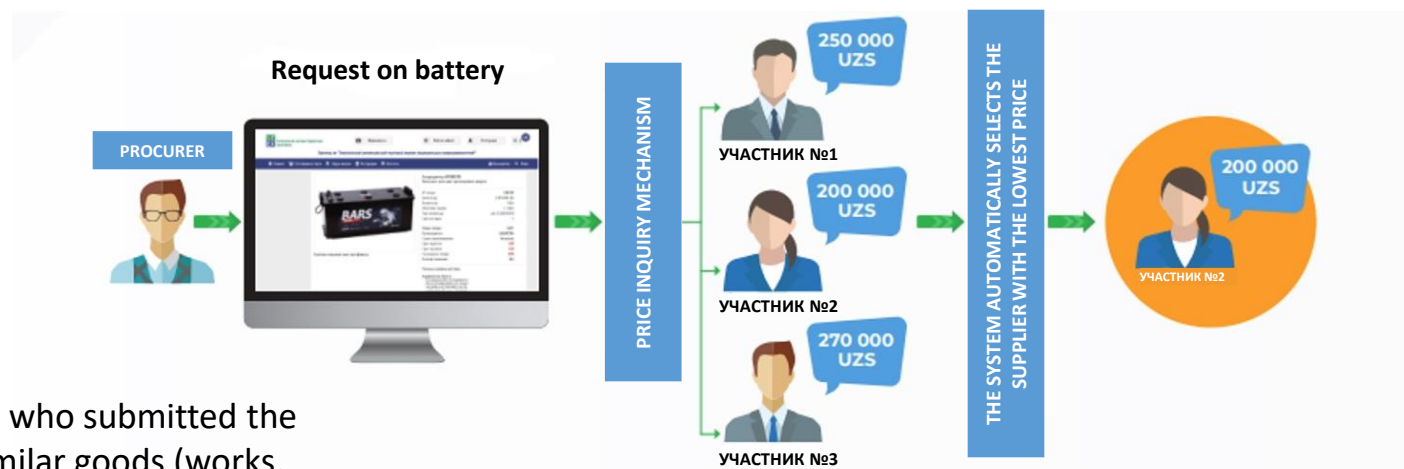

Direct contracting

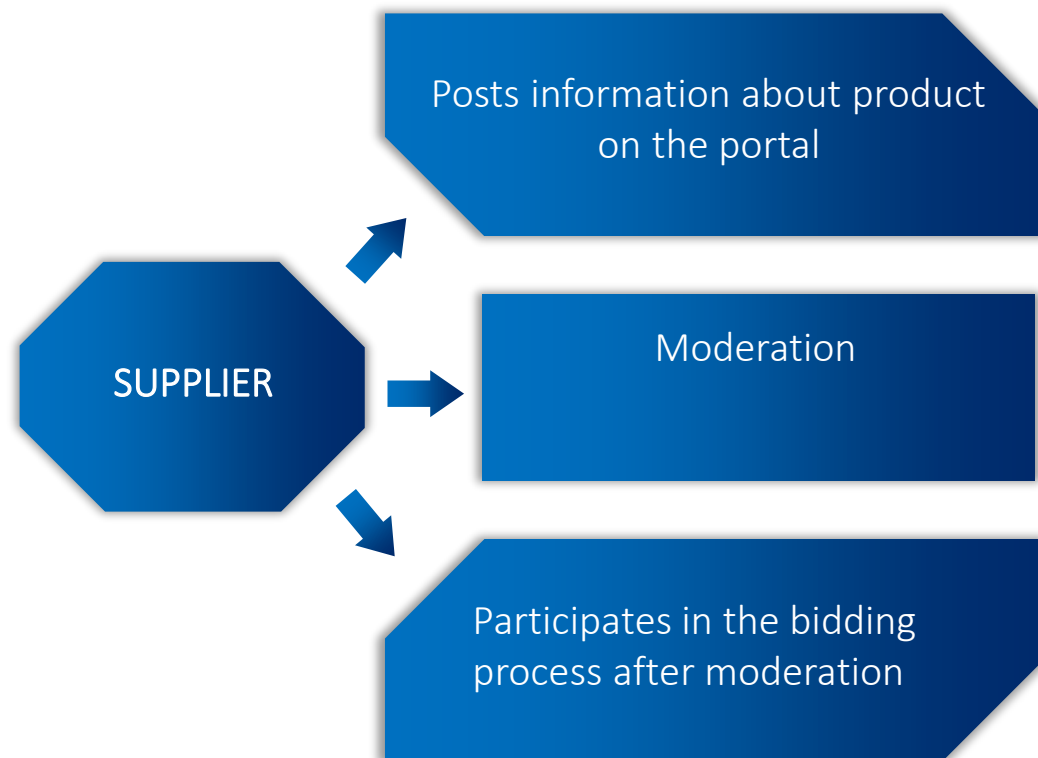

3. From 2026

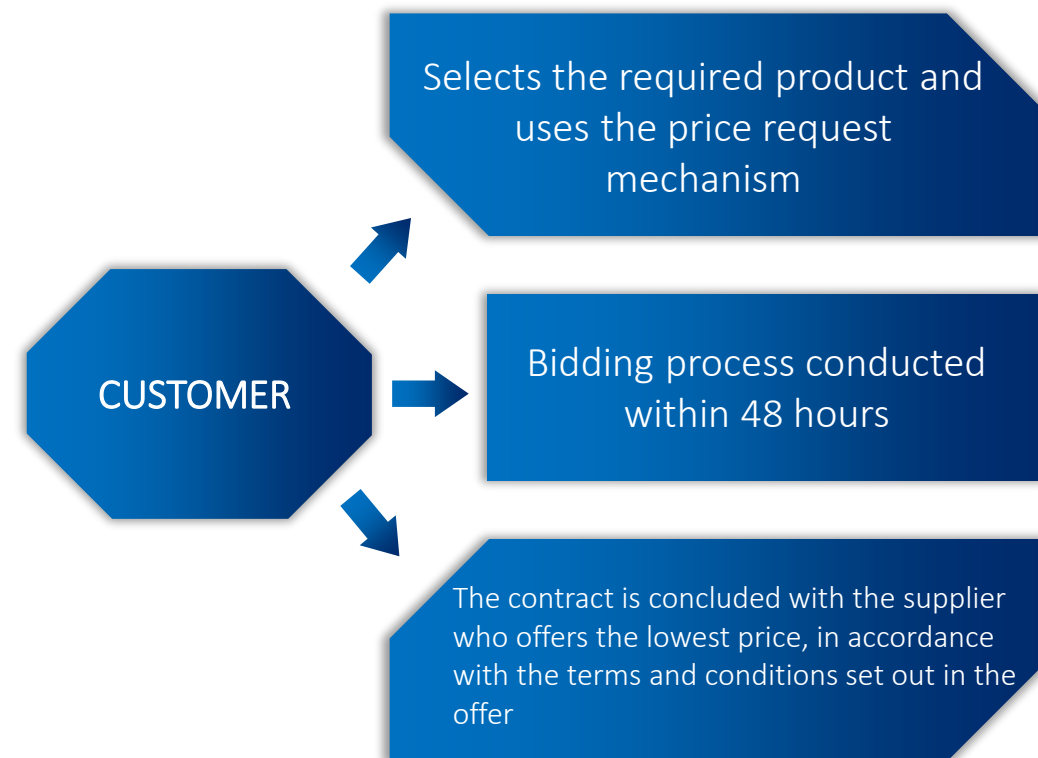

1. Registration and payment without the Treasury's involvement
2. Without participation of procurement committee

- 1 Participants post their offers in the electronic store for 15 working days
- 2 Procuring entity selects the required goods (works, services) in the electronic store and uses the price inquiry mechanism after making the selection.
- 3 The system automatically sends an offer to the participant who submitted the selected bid, as well as to all other participants offering similar goods (works, services) in the electronic marketplace, inviting them to participate in the procurement
- 4 Participants have the right to offer a lower price within 48 hours of receiving the offer
- 5 The electronic system automatically compares the prices offered by the participants
- 6 The electronic system registers the contract automatically concluded between the public contracting authority and the participant who offered the lowest price

- Placing an offer (product) on the portal is free of charge
- The offer is valid on the portal for 15 working days, after which it can be reactivated

- There is no set upper threshold on the purchase price
- Purchases are suspended on working days and during working hours

INTRODUCTION OF SUPPLIER RATING IN PUBLIC PROCUREMENT

All stages from preparation of the project to commissioning are **digitalized and the human factor is minimized**

Construction documentation, circulation of paper documents with an electronic contract is **completely cancelled**

Rating of construction companies including a set of objective evaluation criteria

Database of 16 offices are **integrated** into the system

“Shaffof qurilish”
portal

For the first time, **switching** to an uncontested (cyber-safe, without outside interference, by rating, without commission, without human factor) **electronic tender**

Online monitoring of projects in the investment program has been launched

Construction **control is automated** (tablet)

Entities participating in the system

Adliya Vazirligi
Davlat Xizmatlari
Agentligi

- Ministry of Construction, Economy and finance, as well as other ministries
- Control inspection in the field of construction
- Agency of public services
- Tax committee
- State statistics committee
- Customers
- Contractors
- Expert organizations
- Design organizations and institutes

Launched automated public services

- Agreement on changes to the appearance of buildings
- Issuance of permits for reconstruction and modification of specialized buildings
- Development of architectural planning assignment
- Coordination and examination of design and estimate documentation
- Construction design

***Starting in 2026, this requirement will apply to all public procurement operators**

Possibility for procuring entities to use corporate bank cards for procurement of:

tickets for official travel related to the activities of the contracting authority;

fuel for vehicles (gasoline, gas, aviation and diesel fuel) and charging of electric vehicles for the needs of the contracting authority;

goods (works, services) within the limit of 1,000 base calculation units per year when concluding direct contracts by corporate contracting authorities.

Coverage of corporate customers by the Treasury Service:

centralized control over the financial flows of state-owned companies

ensuring transparency and efficiency in the use of budgetary funds

Improvement of the Law "On Public Procurement":

introduction of new types of procurement procedures, including two-stage and simplified procurement

enshrinement of the sustainability principle, covering all stages of the life cycle of goods (works or services)

Development of green procurement

Advancement of centralized procurement system

Internal audit and control system to prevent conflicts of interest in public procurement

Improvement of the system of monitoring compliance with anti-corruption standards

Developing an effective methodology for calculating the starting price

Improvement of the National Classifier of Goods (Works, Services)

Advancement of the central information portal of public procurement

THANK YOU FOR ATTENTION!
