damage to agricultural plants and plant products
origin;

pesticides - chemicals used to combat

pests, plant diseases and weeds, as well as growth regulators and
defoliant crops;

pest surveillance - tracking and establishment level

the spread of harmful organisms and their natural antagonists, and
as the intensity and severity of their development;

plant protection products - chemical and biological-agent,
used to protect plants;

Rules of application of plant protection products - required
a requirement for the application of plant protection products (methods,
the frequency, timing, and other standards), being developed for each
chemical or biological means;

biological plant protection agents - biological

substances identical to natural organisms cultured product,
genetically engineered plant or other organism, used for
pest control, plant diseases and weeds.

Article 4. State management and control in the area Plant protection

Governance and control in the area of plant protection
carried out by specially authorized by the Cabinet of Ministers
Uzbekistan Authority (hereinafter - the specially authorized body)
Ministry of Agriculture and Water Resources of Uzbekistan,

State Sanitary and Epidemiological Service of the Ministry
Health of the Republic of Uzbekistan, the State Committee
The Republic of Uzbekistan for Nature Protection and other bodies
government in accordance with the law.

Article 5. Competence of specially authorized

Specially authorized body:
implementing a unified policy of using remedies
plants, aimed at improving the productivity of agricultural
cultures and the preservation of the crop due to the use of high-performance,
environmentally safe and low-toxic plant protection products;
It gives a conclusion on the results of registration tests
plant protection;
develop and approve the regulations and rules of
plant protection;
maintain and periodically publishes list of chemical and
biological means of pest control, plant diseases and
weeds, defoliants and plant growth regulators, allowed for
use in agriculture of the Republic of Uzbekistan, approved
Cabinet of Ministers of the Republic of Uzbekistan;
The register is prohibited and restricted in the use of active and
inactive ingredients, crop protection agents;
coordinates the activities of government,
associated with the production and use of plant protection products,
compliance with the regulations of their application, determine the impact of funds
plant protection products on human health and the environment;
organizes the quality control of plant protection products,
manufactured at the enterprises of the Republic of Uzbekistan and imported by
import, gives conclusions on their application and suspends
Use the detection of adverse health effects
humans and the environment;
exercise other powers in accordance with the law.

Article 6. Competence of the Ministry of Agriculture and Water of the Republic of Uzbekistan in the field Plant protection

The Ministry of Agriculture and Water Resources of the Republic of
Uzbekistan:
implements the state program for the protection of plants;
take measures to localize and eliminate the risk of skidding from
other countries quarantine and especially dangerous pests, plant diseases
and weeds on the territory of the Republic of Uzbekistan;
coordinate scientific research, experimental design and
design work on the development, testing and implementation of remedies
plants, new equipment and technological processes and methods
use;
It provides training, retraining and
training of specialists for the protection of plants;
develops and approves the guidelines, recommendations,
on the use of chemical, biological and other drugs;
Arrange for the effective use of plant protection products and
and compliance with the rules of transportation, storage and regulations
application;
determines the need for agriculture to chemical and
biological plant protection products, the formation of reserves
chemicals for emergency situations;
conducts quality control of the application of plant protection products;
exercise other powers in accordance with the law.

Article 7. Competence of State Sanitary
Epidemiological Service of the Ministry
Health of the Republic of Uzbekistan in the field of
Plant protection

State Sanitary and Epidemiological Service
Ministry of Health of the Republic of Uzbekistan:
It provides hygienic supervision of compliance
norms, rules and regulations in the manufacture, storage, sale,
transportation, use, neutralization, recycling and disposal
plant protection;

hygienic assessment, develops and hygienic standards
regulations of pesticides in foods, industrial facilities
and environmental objects;
conduct state sanitary-hygienic examination
plant protection;
organizes preliminary and periodic
medical examinations of people working with pesticides,
diagnosis of patients with pesticide poisonings;
exercise other powers in accordance with the law.

Article 8. Competence of the State Committee of the Republic
Uzbekistan for nature protection in the field of defense
plant

State Committee of Uzbekistan for Nature Protection:
It assesses the impact on the environment
offered for registration of plant protection products;
conducting the state ecological expertise of funds
Plant protection;
issues in the established order permission for burial
obsolete plant protection, waste and packaging;
carries out state control over compliance with requirements
environmental protection in the production, transportation, storage,
the use, destruction, disposal, destruction and disposal
plant protection products and other chemical substances and preparations;
exercise other powers in accordance with the law.

Article 9. The State Phytosanitary Control

State Phytosanitary Control Service carried out
plant protection of the Ministry of Agriculture and Water Resources of the Republic of
Uzbekistan.

Article 10. Duties of legal entities and individuals
in the area of plant protection

Legal entities and individuals in the field of plant protection products must:
conduct systematic survey of agricultural
land and protective measures in order to prevent mass development
and spread of pests, diseases and weeds;
to provide on-demand service for Plant Protection of the Ministry
Agriculture and Water Resources of Uzbekistan information
phytosanitary condition of the land, vegetation and stored
agricultural products belonging to them, as well as
on the implementation of measures for their protection and use of protective equipment
plants;
ensure the safety of people and animals;
inform the plant protection service of the Ministry of Agriculture,
Water Management of the Republic of Uzbekistan on situations that may

cause dangerous phytosanitary consequences; comply with established rules and procedures for the importation, storage, transportation, sale and use of plant protection products do not prevent contamination of agricultural products and environmental medium.

In identifying the unfavorable characteristics, low biological effectiveness of registered plant protection products they registration shall be canceled by the specially authorized body on the basis of conclusion of the Ministry of Agriculture and Water Resources of the Republic of Uzbekistan, the State Sanitary and Epidemiological Service of the Ministry of Health of the Republic of Uzbekistan, the State Committee of Uzbekistan for Nature Protection.

Article 18. Consideration of prohibited active and inactive ingredients

Active and inactive ingredients of plant protection products, prohibited or limited in application, specifically defined by the competent authority together with the State Sanitary and Epidemiological Service of the Ministry of Health

The Republic of Uzbekistan, the State Committee of the Republic of Uzbekistan to protect nature and included in the Register of prohibited and restricted substances the use of active and inactive ingredients.

Article 19. The experimental application of the remedies plant

In the event of circumstances requiring urgent plant protection measures with the use of non-registered funds for plant protection, allowed their experimental use for up to one year.

Resolution on the experimental application of the remedies for plants issued by a specially authorized body in coordination with the State Committee of Uzbekistan for Nature Protection and the State Sanitary and Epidemiological Service of the Ministry of Health of the Republic of Uzbekistan.

In granting permission for the experimental use of funds for protection of plants specifically authorized body determines the head of the experiment, and the terms and conditions of the meeting.

Upon expiration of the head of the pilot application for the experiment is specially authorized body report

the results of the experiment, as well as information on the whereabouts of residues of plant protection products, equipment and appliances.

Article 20. Standardization, certification and marking tools
Plant protection

Standardization, certification and labeling remedies
Plants produced in the manner prescribed by law.

Article 21. Implementation of the import and export of plant protection products

For implementation, import and export allowed Remedies
plant with a certificate of conformity have registered and
inscribed on the List of chemical and biological control agents
pests, plant diseases and weeds, defoliants and controllers
Plant growth allowed for use in agriculture
The Republic of Uzbekistan.

Article 22. The use of plant protection products

Plant protection products are used in terms of phytosanitary,
sanitary and environmental conditions in the manner prescribed
legislation.

Article 23. Information on the safe handling of funds
Plant protection

In order to provide consumers with information on the safe
treatment with pesticides entities or persons
must provide information about transportation, use and
storage of plant protection products and container label warning
marking.

The requirements for the form and order of recommendations for approval
transportation, storage and use of plant protection products and
tare the label are set by a specially authorized body.

Article 24. Requirements for the storage, application,
disposal, destruction, recycling,
transportation and disposal of chemical substances,
biological agents and materials

Legal and natural persons must comply with health,
hygienic norms, rules and regulations to ensure sanitary
epidemic welfare of citizens, the requirements of protection of fauna and
habitats, protection requirements of flora
and their growing environment during storage, use, neutralization,
recycling, transport and disposal of chemicals,
biological weapons and materials.

Storage plant protection permitted
specialized storage facilities used solely for storage.
It is forbidden to bulk storage of plant protection products.
Handling of plant protection products shall be permitted only in
specially equipped vehicles.

During storage and transport of plant protection
you must comply with the requirements that exclude personal injury
citizens and the environment.

Neutralization, recycling, destruction and burial came
worthless and (or) use of prohibited plant protection products,
as well as the packaging from under them are provided in the manner prescribed
legislation.

Methods of disposal of unusable and (or) banned

the use of plant protection products and packaging from under them developed by the manufacturers of plant protection products and agreed with a specially authorized body, the State Committee of Uzbekistan for Nature Protection, the State Sanitary and Epidemiological Service of the Ministry of Health and Ministry of Emergency Situations of the Republic of Uzbekistan.

Article 25. Environmentally potentially dangerous situations
