Structure of the Narrative

- India's urbanization: messy and hidden?
- Aspirations of a young country
- City Governance : Operations and Policies linkages
- Inclusive Cities Partnership Programme (2014-2017) supporting the national government to explore housing solutions for the urban poor
- Present Housing Policies: emerging issues and engagement of ICPP in these

India's Urbanization: Messy and Hidden ?

- India is urbanizing in-situ
- 31% of India's population is urban
- Urban is defined very conservatively
- Urban is still not politically viable
- Poverty is gaining an urban face.
- Land, Security and Environmental concerns

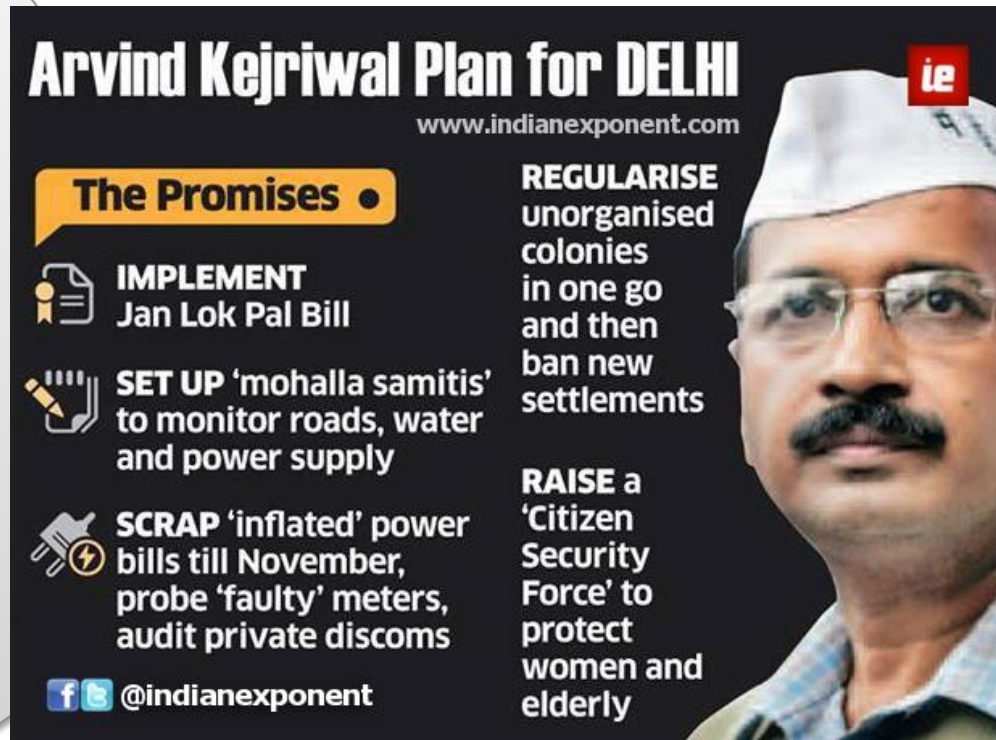

“Our cities should no longer remain a reflection of poverty and bottlenecks. Rather they should become symbols of efficiency, speed and scale. We will look at urbanization as an Opportunity rather than a Threat. Major steps will be undertaken in Transport and Housing for 'Urban Upliftment' in India”.

BJP Manifesto, 2014

The Aspirations of Young India

- Half of the population are below 25 years and 62% in the working group bracket
- Cities are becoming prominent in political discourse. Clean India mission, Housing for All, AMRUT, SMART Cities, Digital India (Various Centrally sponsored schemes)
- Make in India, Skill India are focussing on employment generation

Arvind Kejriwal Plan for DELHI

www.indianexponent.com

The Promises

- IMPLEMENT** Jan Lok Pal Bill
- SET UP** 'mohalla samitis' to monitor roads, water and power supply
- SCRAP** 'inflated' power bills till November, probe 'faulty' meters, audit private discoms
- REGULARISE** unorganised colonies in one go and then ban new settlements
- RAISE** a 'Citizen Security Force' to protect women and elderly

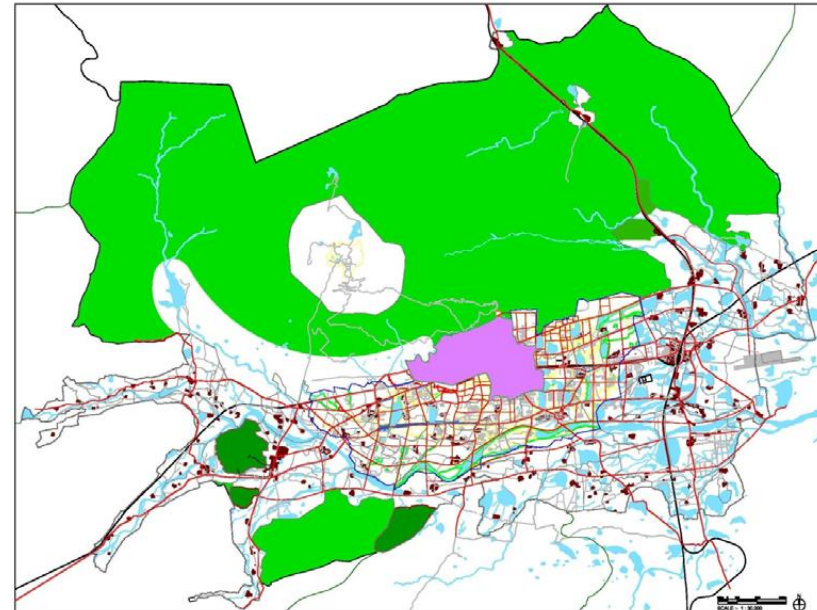

@indianexponent

Recent Delhi election was fought over corruption / accountability issue

City Governance : Operations and Policies Linkages

- The urban action is often beyond municipal boundaries.
- Cities grow informally. Statutory Plans are limited to administrative imagery
- Skewed land/housing market. 30-40 % of the population live in 4-5 % of city's land
- Environmental concerns are becoming priority for citizens.

Map showing TUDA (Master Plan 2005) and MCT (Base map) boundaries

A new city governance system that encourages shared responsibility

Inclusive Cities Partnership Programme (2014-2017)

Objective : to support Govt to make housing solutions for the urban poor

- GIZ and Govt of India collaboration
 - Started in 2014 November. 3.5 million Euro . Technical Cooperation
 - New Housing for All was announced in June 2015
 - Realignment of ICPP with the new programme
- ICPP supports policy formulation both at the central and the state level on Affordable Housing and Rental Housing
 - Supports states and cities to implement HFA
 - Facilitates Knowledge Management and Capacity Building

Learnings from Rajiv Awas Yojana (RAY previous programme)

- Demand is for Basic Services - Housing is supplied
- Auto constructed housing is the norm but not recognised
- There is a 18.78 m missing dwelling unit. Housing shortage maximum is in the Economically Weaker Section
- 10.2 m housing stock is lying vacant too

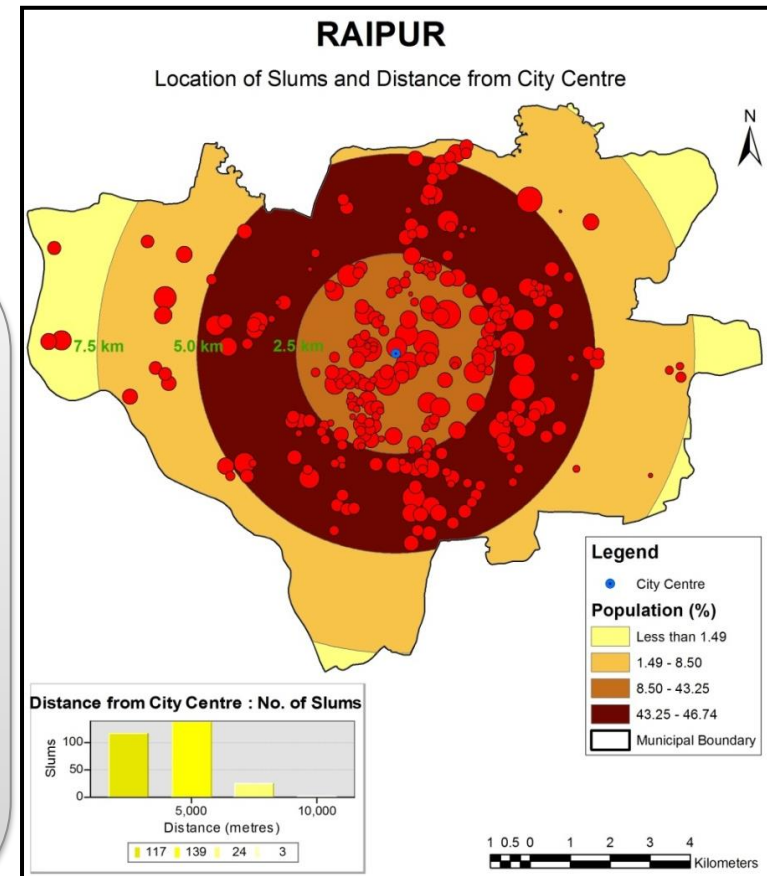

Public Housing in Tirupati built under mission mode programme lying vacant

Learnings from Implementing RAY (previous programme)

- Data and its is a missing link
Visualization
- Rental housing is not acknowledged
- Housing is conceptualised as only a family unit –may not be true in the urban setting
- Institutional access to housing credits are minimal. SEWA, SAATH (NGOs) and other Housing Finance Institutions are making some efforts

Learnings from Implementing RAY (previous programme)

Two Municipal corporations in two states were supported to produce Detailed Project Reports to leverage Gol funding

Unresolved issues

- Procurement at the Municipal Corporation is cumbersome
- Lack of trust between the community and the Municipal Corporation
- Lack of flexible funding for demonstration

Possibilities in the New ICP Programme

ICPP aligns with the „Housing for All“ and other mission mode programmes

Housing For All (HFA) :

- Slum rehabilitation with participation of private developers using land as a resource
- Promotion of Affordable Housing for weaker section through Credit Linked Subsidy
- Affordable Housing in Partnership with Public & Private sectors
- Subsidy for beneficiary-led individual house construction

Potential challenges :

- May not be possible where land prices are not high
- Lack and capacity of interfaces
- Capacities at both the level
- May support auto constructed housing
- Rental Housing is not considered
- The ambiguous land title is the big stumbling block
- Role of private developer

Intention to synergies is well articulated Opportunities for collaboration
