

Session #8

E-GP

Software as a Service (SaaS)

October 2015

# ADB E-GP SaaS Initiative

- Inform DMCs on solutions available and business models offered.
- Establish a shared eGP SaaS service to support ADB DMCs with the implementation of eGP on a trial basis.
- Current activity
  - ADB hosted eGP SaaS Workshop in Mar, 2015
  - Issued an EOI in Jul 2015
  - RFP to shortlisted vendors, Sep 2015

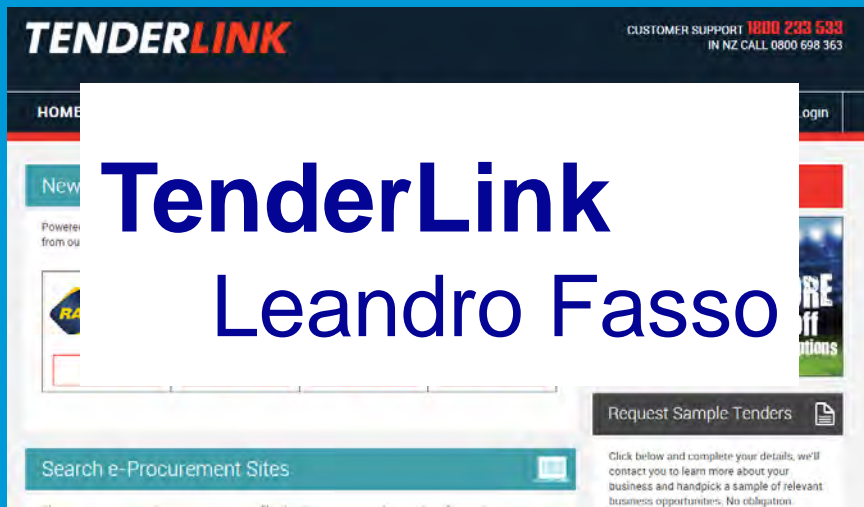

# Why SaaS?

- Minimize up-front investment
- Reduce risk associated with the design, development and delivery of a system
- Allows organizations to focus on business needs versus technology needs
- Learning experience to support future implementation of procurement reforms and business practice transformation.

# SaaS Considerations

- Cost to build and operate your own system versus the SaaS business model presented.
- Ownership and rights of data and users.
- Integrity, reliability and security of the system.
- Contract relationships between your organization, SaaS providers and the Users
- Business transformation issues,
- Implementation cost

respond to tenders, for example general contractors, sub-contractors and trades people, tender management simplifies and speeds up the process of formulating tender responses. You can add all of the necessary drawings, specifications, schedules, tender documents and other attachments to the Request for Tender you issue or receive. Buyers have access to a rich database of their chosen suppliers when issuing a Request for Tender. If appropriate, you can search for potential new suppliers, complete with pre-qualification details, from the supplier database. Suppliers are able to present information to initiating organizations at the time and place that purchasing decisions are made. Complete Tender Management offers you the following advantages:
