E-PROCUREMENT

Version III Commencing June 2014 Electronic system

OFFICIAL PORTAL FOR KYRGYZ REPUBLIC GOVERNMENT PROCUREMENT

OFFICIAL PORTAL FOR KYRGYZ REPUBLIC GOVERNMENT PROCUREMENT

The principal objectives addressed by the system are:

- Reduce budget expenses for goods, work, and services procured to address government needs;
- Provide a uniform method for creating and placing government orders;
- Reduce expenditures associated with the conduct of government procurement;
- Provide detailed statistics regarding contracted goods, work, and services (via the General Classifier of Government Procurements, GCGP);
- Create a level playing field for vendors to compete;
- Provide easy access to information;
- Reduce paperwork significantly;
- Improve the transparency of the government procurement process.

The Portal provides the following functionality:

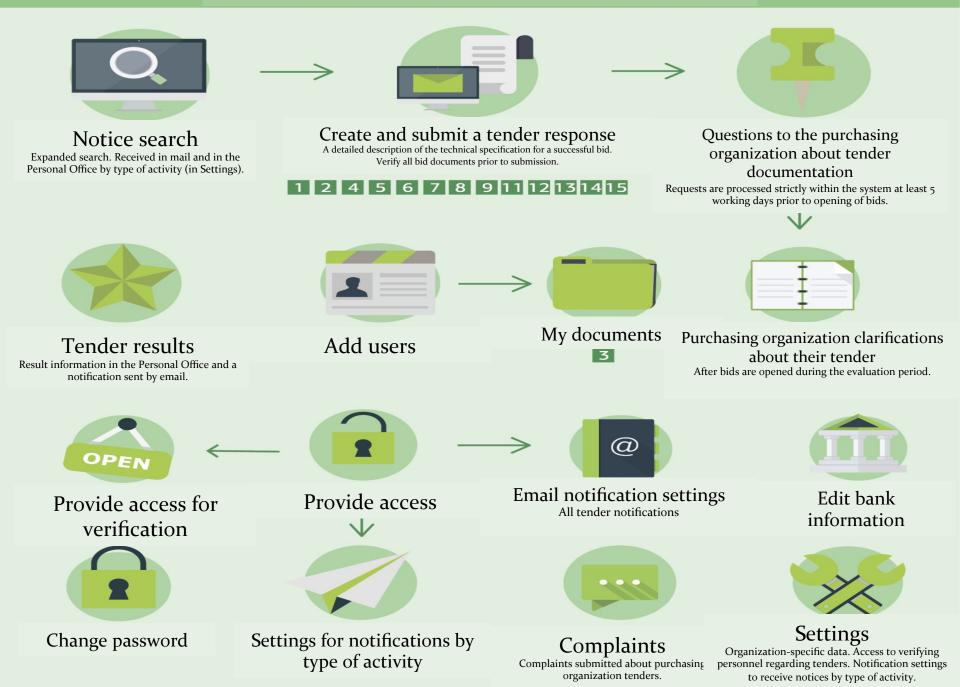

- Simplified registration for process participants;
- Open participation in tenders;
- Access to tender documents;
- Transparency in award decision-making;
- Online submission of complaints;
- Price monitoring;
- Open access to the regulatory and legal document framework;
- Information on successful bidders.

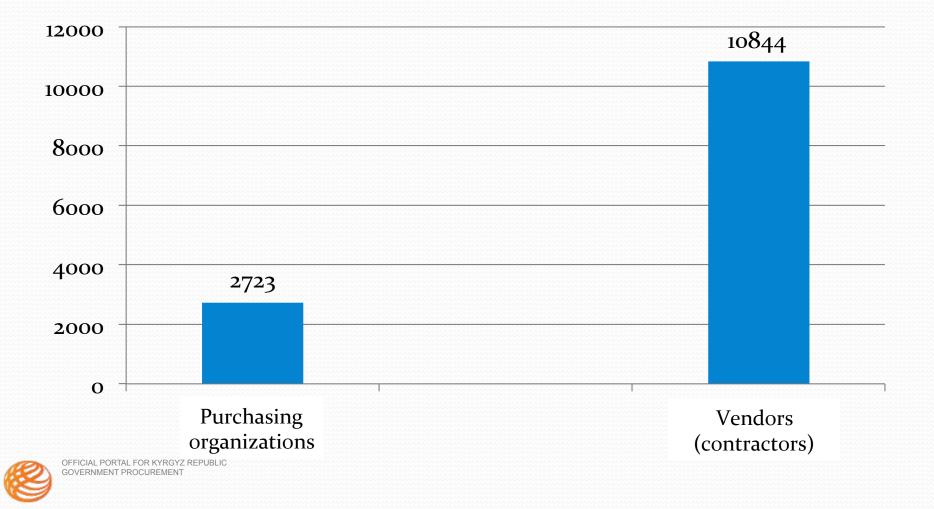

Government Purchasing Organizations

Business

Number of registered purchasing organizations and vendors (contractors) as of June 15, 2016

- Request clarification of tender documentation;
- Incorporate changes and additions to tender documentation;
- Respond to tender documentation clarifications;
- Off-line evaluation of tender responses;
- Select the successful bidder;
- Publish a summary of the evaluation
- Provide contract information;
- Information on reports;
- Procurement procedure protocol;
- Procurement procedure protocol for direct contracting;
- Order regarding system startup usuc

GOVERNMENT PROCUREMENT

There are also Instructions regarding the following in the Personal office of each vendor/contractor:

- Account management;
- Tender submission;
- My documents;
- Declarations.

International audit

AUDIT PERIOD May 2015 to March 2016

COMPANY Grant Thornton International Ltd.

AUDIT SCOPE

SUN system Changes were made to server architecture in accordance with an ISO international standard

AUDIT RESULT

Favorable

OFFICIAL PORTAL FOR KYRGYZ REPUBLIC GOVERNMENT PROCUREMENT

Public E-Procurement Cybersecurity

• A symmetrical encryption key is used to encrypt prices, i.e., upon the vendor entering a unit price, the system automatically encrypts, and later decrypts the price when tenders are opened.

- Hardware and software meets the requirements set forth in international standard ISO 27001:2005–2013 and 27002.
- All processes are recorded in log files and cannot be deleted.
- There is a remote backup server to which all updated data are copied automatically.
- The system was developed using open source software (Java), which allows the entire process to be monitored without requiring the updating of components from software publishers.

Electronic System

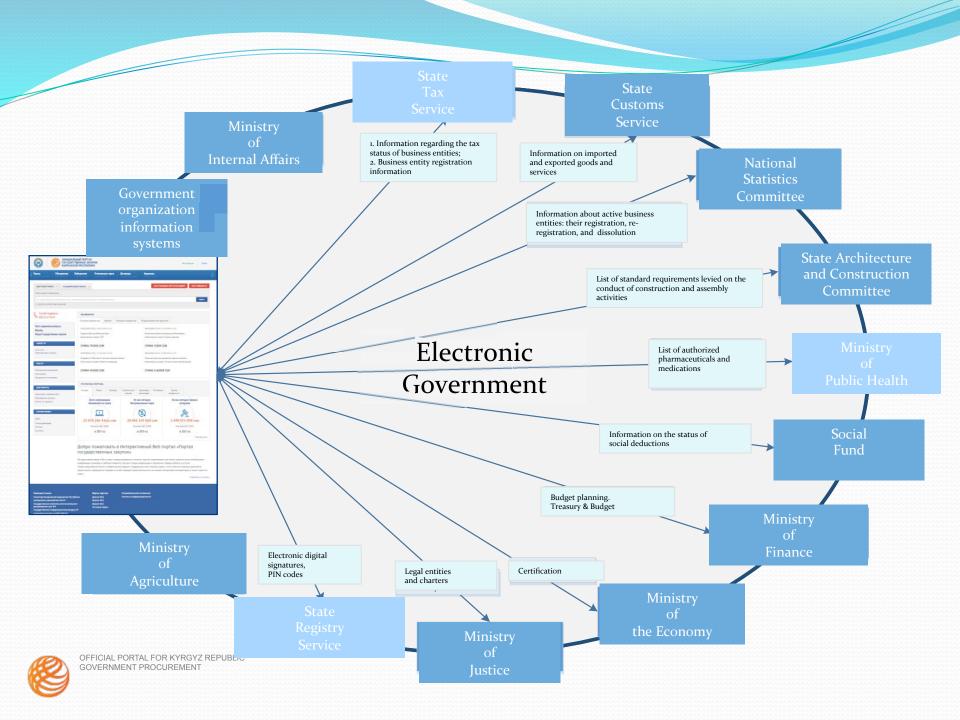

Development outlook

"Programs for the development of Kyrgyz Republic government procurement 2016– 2020," which calls for the phased and system-wide restructuring of government procurement:

- Manage interrelations with other government systems;
- Enhance software;
- Improve Portal statistics and analytics;
- Add a General Classifier of Government Procurements;
- Introduce electronic digital signatures (EDS);
- Launch national (Kyrgyz) and English language versions of the Portal;
- Create an electronic catalog;
- Strengthen Portal cybersecurity;
- Provide an online consultation and a forum capability;
- Harmonize legislation;
- Enhance training

Thank you for your attention!
