Achieving the SDGs

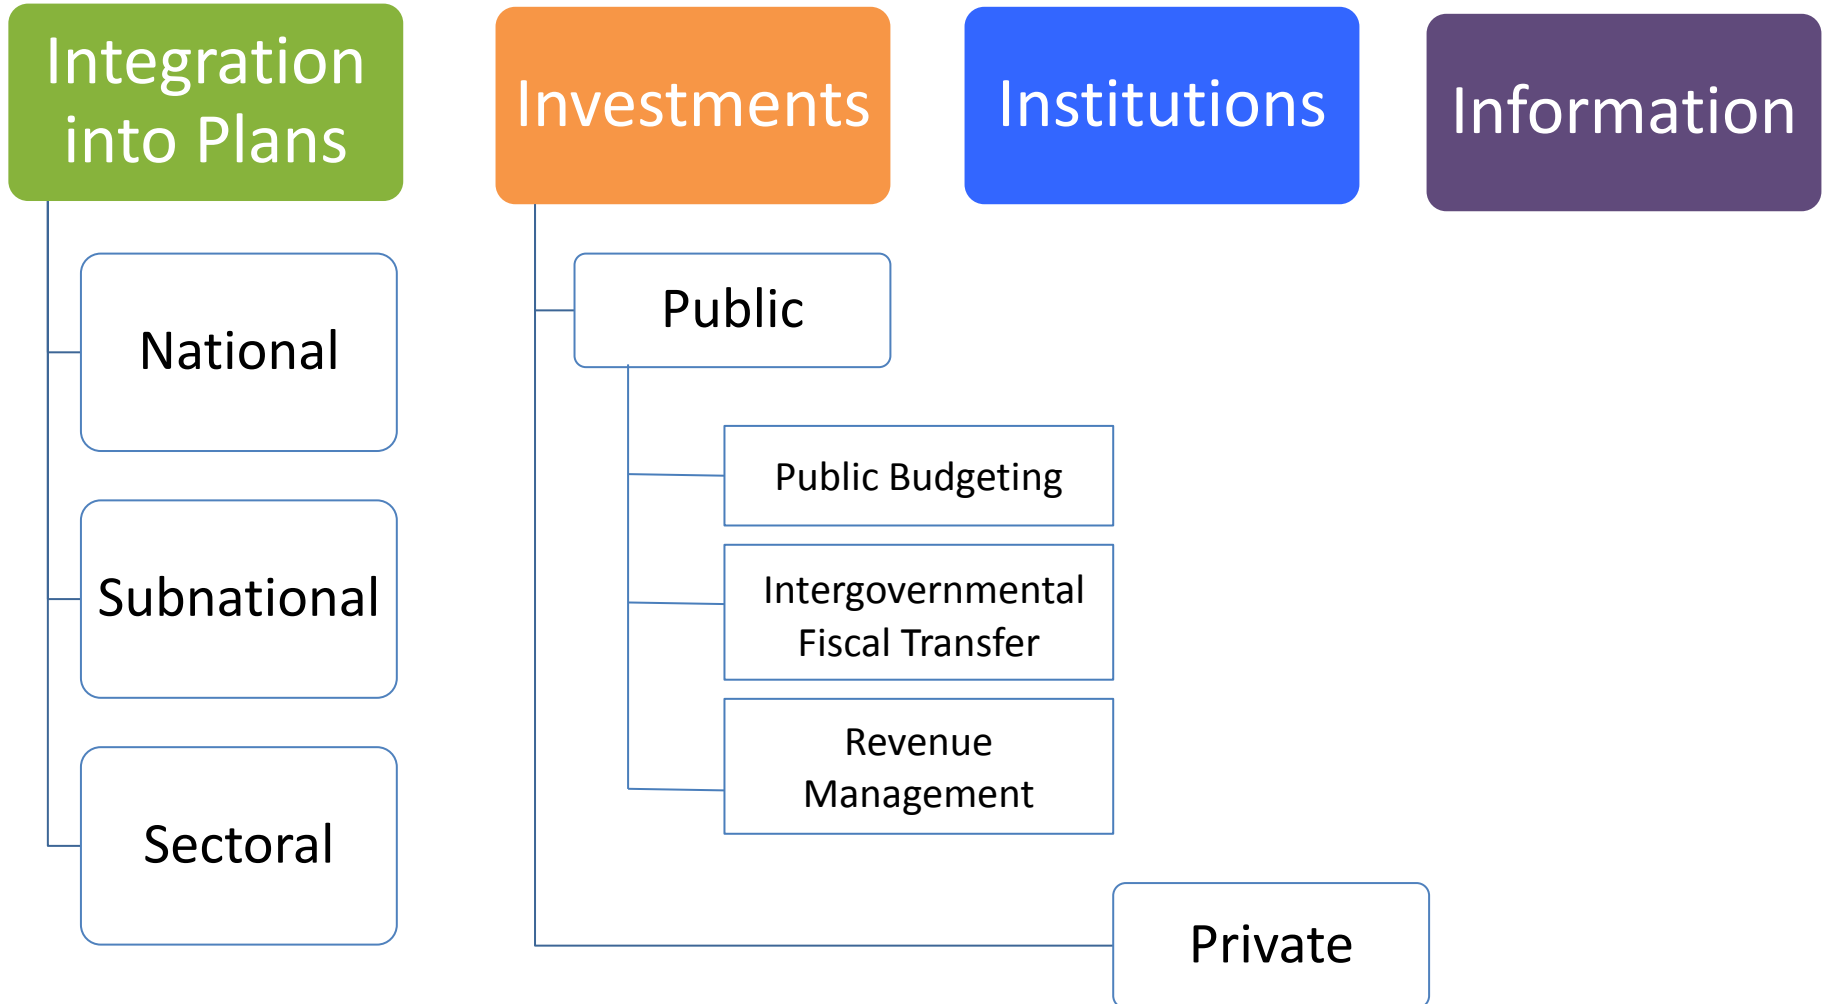

PEI Asia-Pacific in Focus

February 2018

Range of Tools and Approaches in our Region

60 tools chosen from 8 countries across 4 mainstreaming result areas- 4 Is

Objective

Identify, document and communicate **P-E-C mainstreaming tools**, and achievements and contributions in pro-poor environmentally sustainable outcomes.

Users will gain knowledge and perspectives from the application of P-E-C mainstreaming tools that promote and guide an integrated, and balanced, approach for poverty reduction, gender equality, economic growth, and environmental sustainability including climate change adaptation and mitigation.

In addition, the Compendium will also enable an analysis of how P-E-C tools have contributed towards results covering specific **SDG and targets**

Features of the Asia Pacific Compendium

- Living document that builds on co-creation/ wiki-style
- Narrative guide and Tool sheets

Key takeaways from the Narrative:

- ◆ **Integration into Planning:** policy reviews, encouraging multi-sectoral participation, provision of evidence, establishing a central framework for integration and linking national plans to subnational plans, building capacity and guidelines at the local level
- ◆ **Investments:** (Public)- setting baselines of public spending, tracking budgets, assessment and advocating for legislative change to improve revenue-sharing, influencing performance criteria for intergovernmental fiscal transfers, improving data management, undertaking cost benefit analyses; (Private)- whole of cycle approach
- ◆ **Institutions:** capacity building, cross-sectoral coordination, multi-stakeholder participation
- ◆ **Information:** M&E frameworks, application of SEEA

Identify and communicate mainstreaming result pathways

Narrative materials will be produced which aim to cover the following:

- **Link P-E-C mainstreaming tools** with four result areas:
 - 1) **Integrated policies** (programmes, plans, strategies and laws);
 - 2) **Institutions** (organizational capacity development);
 - 3) **Information** (data and monitoring for P-E-C by national systems); and,
 - 4) **Investments** (level of public and private investment or systems for improving pro-poor environmental sustainability)

- **Progression over time of P-E-C mainstreaming gains** in terms of macro-economic plans, sector strategies and plans, monitoring processes, financing and implementation at sub-national levels.

- The **institutional changes** and progression to adopt and apply mainstreaming approaches and tools, largely from substantive engagement in development planning and implementation processes, and capacity building and learning.

- The **interconnectedness of P-E-C mainstreaming tools** where outputs from one tool feed into and inform the application of other p-e-c mainstreaming tools

An Overview of the Toolsheets

Example of Poverty-Environment Accounting Framework (PEAF)

| | |
|------------------------------------|--|
| Type of mainstreaming Tool | |
| Mainstreaming Results Areas | |
| Objectives of the tool and Context | The Poverty-Environment Accounting Framework (PEAF) is a new way to measure the P-E Nexus based on the UN System for Environmental-Economic Accounting (SEEA) |
| SDG Goals and Targets | |
| Institutional Users of the tool | |
| Key output of the tool | PEAF provides a globally standardized method for governments in developing countries and international agencies to plan, measure and report on the causal links between poverty and environment. |
| Key input of the tool | |
| Results of the application | |
| Challenges | |
| Lessons Learned | |
| Key Reference Document | |

Linking to SDGs

TARGETS;
1.4 1.5, 1a,
1b

Country examples:

- Bangladesh: 7th
- Bhutan: MRG
- Lao PDR: SESO on agriculture/forestry
- Nepal: EFLG, district plans, CPEIR

ALL
TARGETS,
13.2, 13.3

Country examples:

- Indonesia: CPEIRs
- Bangladesh: CPEIR
- Bhutan: PEER, GECDP framework

TARGETS:
15.1, 15.9

Country examples:

- Lao PDR: Integrated assessment of land use types
- Myanmar: Mining impacts assessment
- Philippines: ENRD MT

TARGETS:
17.1, 17.3,
17.5, 17.19

Country examples:

- Lao PDR: Concession Compliance Database
- Indonesia: ENRD MT
- Indonesia: MFF, LESS
- Nepal: PE criteria in MCPM

Disseminating this Compendium

A close-up photograph of a young child's face, looking directly at the camera. The child's face is covered in traditional yellow ochre makeup, applied in vertical stripes down the center and in circular patches on the cheeks. The child has dark, expressive eyes and a neutral expression. The background is a soft, out-of-focus grey.

Integrated planning and budgeting for the SDGs

POVERTY-ENVIRONMENT ACTIONS AND APPROACHES TO REACH SUSTAINABLE DEVELOPMENT GOALS

Compendium Features

- **The compendium comprises of two elements:**
 - 1) **Online guidance modules based on the Handbook “Mainstreaming Environment and Climate for Poverty Reduction and Sustainable Development”** (2015), which explains mainstreaming approaches and tools, with some examples; and,
 - 2) **A Compendium of Poverty-Environment-Climate mainstreaming tools, experiences and results** which aims to capture and share information on the application of mainstreaming tools at country level, the results achieved from the tool, the chain of events that contributed to achieve the results, the contribution of the tools for the implementation of the SDG, and lessons learned.
- **Open Access Platform:** The intention is to have it available on an open access web-based platform, and administrator-granted rights for adding and updating the Compendium.
- **PEP Network:** The Compendium features as part of a product of the Poverty Environment Partnership (PEP) network, and its priority work area on “Poverty, environment and climate mainstreaming for the SDGs”.

About

The Compendium provides users with access to a poverty-environment-climate mainstreaming tools, and descriptions of experiences in their application at country level, and the results achieved. The compendium compiles the tools developed and applied on poverty-environment-climate mainstreaming, the outputs and outcomes achieved from their use, explains the chain of events that led to achieving the results, and what were the lessons learned from their application. Additionally, the platform introduce users to the PE mainstreaming tools that promoted and guided an integrated, cross-sectoral, approach for poverty reduction, environmental sustainability including climate change adaptation and mitigation, and economic growth.

The compendium also offers a links between mainstreaming tools and approaches to support the implementation and achievement of the Agenda 2030 and the Sustainable Development Goals

Invitation to contribute

We aim for the database to be as comprehensive and accurate as possible. Therefore you are invited to submit additional tools and also comment on those in the database. Please submit your comments (attaching supporting documents if possible)
