

Tools for Monitoring and Reporting on SDG Progress

Laszlo Pinter, PhD

Professor and Acting Head of Department, Central European University (CEU)
Senior Fellow, International Institute for Sustainable Development (IISD)

February 22, 2018

Knowledge Sharing Workshop

Strengthening the Environment Dimensions of the SDGs in Asia and the Pacific

21-22 February, 2018

Bangkok, Thailand

The facts are coming! The facts are coming!

Key points

1. Build on lessons from the MDG monitoring and evaluation experience (MDG-7)
2. Recognize the multiple roles of monitoring and their use in decision-making
3. Establish indicators and baselines early in the process
4. Link data on past trends to projections, scenarios and transition pathways
5. Build on existing data, indicators and reporting mechanisms but also invest in capacity and institution building
6. Get ready to integrate multiple types of data from multiple sources
7. Develop integrated assessment capacity that can make sense of SDGs as a *system* of targets, with tradeoffs and synergies in mind
8. Coordinate monitoring and reporting across scale
9. Build in engagement
10. Make access to up-to-date indicators, progress reviews and projections easy, free, relevant, interactive, user friendly, attractive...

Key points

1. **Build on lessons from the MDG monitoring and evaluation experience (MDG-7)**
2. Recognize the multiple roles of monitoring and their use in decision-making
3. Establish indicators and baselines early in the process
4. Link data on past trends to projections, scenarios and transition pathways
5. Build on existing data, indicators and reporting mechanisms but also invest in capacity and institution building
6. Get ready to integrate multiple types of data from multiple sources
7. Develop integrated assessment capacity that can make sense of SDGs as a *system* of targets, with tradeoffs and synergies in mind
8. Coordinate monitoring and reporting across scale
9. Build in engagement
10. Make access to up-to-date indicators, progress reviews and projections easy, free, relevant, interactive, user friendly, attractive...

Lessons from MDG-7

progress monitoring and review

- Representation of environmental issues in the MDGs (through MDG-7) was symbolic and fragmentary, not based on a whole-system sustainable development framework
- There's been no resource mobilization in support of the *institutional foundations* of monitoring and reporting at the scale needed
- Consequently, consistent reporting is constrained by weaknesses in statistical monitoring and Earth observation systems – and data

- Coal: 800 gigawatt-sized plants with all the carbon captured and permanently sequestered
- Nuclear: 700 new gigawatt-sized plants (plus replacement plants)
- Concentrated solar thermal electric: 1,600 gigawatts peak power
- Solar photovoltaics: 3,000 gigawatts peak power
- Efficient buildings: savings totalling 5 million gigawatt-hours
- Efficient industry: savings totalling 5 million gigawatt-hours, including co-generation and heat recovery
- Wind power: 1 million large wind turbines (2 megawatts peak power)
- Vehicle efficiency: all cars 60 miles per US gallon
- Wind for vehicles: 2,000 gigawatts wind, with most cars plug-in hybrid electric vehicles or pure electric vehicles
- Cellulosic biofuels: using up to one-sixth of the world's cropland
- Forestry: end all tropical deforestation
