- Global promotion of tutors and institutes
- Inter-institute collaboration
- Patient consultation bt. trainee and tutor
- Patients from abroad
- Dispatching Korean doctors and hospitals
- Tutors' burden & fatigue
- Institutes' burden & fatigue
- Negative influence to Korean medical practice & education

# How can we optimize fellowship?

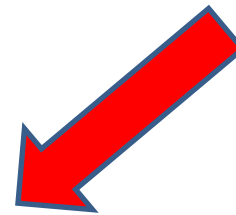

## Variables

- Trainees' attributes
- Kinds of projects
- Trainee's expectation
- Training duration
- Competency of domestic medical resources
- Mutual benefits after projects

## Methods

- Clinical observation
- Knowledge education
- Simulator-based
- Animal model-based
- Cadaver-based

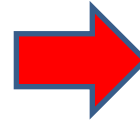

## Training program tuning

- Hands-on practice
- Clinical observation
- Venue: Hospital, training center
- Host: Tutor, institute,

# How can we optimize fellowship?

## Variables

- Government-invited beginner doctor
- Experiencing Korean medical system
- Clinical observation
- 3 weeks duration
- 5 National Univ. Hospitals available
- Promote Korean medical care

## Methods

- Clinical observation
- Knowledge education
- Simulator-based

## Training program tuning

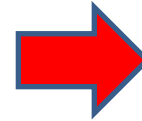

- Hands-on practice
- Clinical observation
- Venue: training center
- Host: institute,

# How can we optimize fellowship?

## Variables

- Society-invited specialist
- Subspecialty education
- Clinical observation
- 3 months duration
- Few tutors available
- Promoting tutor & hospital

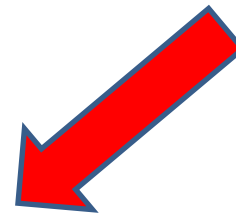

## Methods

- Clinical observation
- Knowledge education
- Simulator-based
- Animal model-based
- Cadaver-based

## Training program tuning

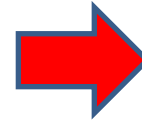

- Hands-on practice
- Clinical observation
- Venue: Hospital, training center
- Host: Tutor, institute,

# How can we optimize fellowship?

## Variables

- Personally invited specialist
- Specific skill training
- Hands-on & observation
- 1 week duration
- 1 tutor available
- Networking for collaboration

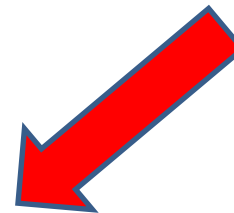

## Methods

- Clinical observation
- Simulator-based

## Training program tuning

- Hands-on practice
- Clinical observation
- Venue: Hospital
- Host: Tutor

# Epilogue

## *Foreign doctors' fellowship in Korea*

- **Trainees: More than clinical observation only**
- **Tutors: Different trainees' level, Extra burden**
- **Institutes: Different level of education & facility: Different trainees' satisfaction**
- **Full options to optimize program by the conditional variables  
Trainees, Supporters, Duration, Local facilities, Methods, etc**
