EDUCATION FOR PUBLIC INTEGRITY

1. Approach
2. Learning outcomes
3. Lesson plan
4. Learning methods
1. Mainstreaming education for integrity into the school curriculum
   - introducing a specific course on public integrity
   - mainstreaming public integrity learning outcomes within existing subjects
2. Delivering education for public integrity by the anti-corruption bodies
3. Delivering education for public integrity in an after-school programme
DEVELOPING INTEGRITY-RELATED LEARNING OUTCOMES (1/2)

Students can form and defend public integrity value positions and act consistently upon these, regardless of the messaging and attractions of other options.

<th>SUB-LEARNING OUTCOMES</th>
<th>INDICATORS FOR ACHIEVEMENT</th>
</tr>
</thead>
</table>
| Students can explain their own public integrity values, those of others and of society, and what they look like when they are applied | • identify and use vocabulary that describes values and the situations in which they apply  
• explain the mechanisms that may lead to a lack of trust in the values of others or their application  
• explain the benefits that arise from having a consistent application of proper processes  
• describe and define the behaviours that are in opposition to public integrity |
| Students can identify the public integrity values that promote public good over private gain  
Students can describe the institutions and processes that are designed to protect public good | • cite examples of public good and contrast it with private gain and the values that drive processes that keep these interests separate  
• describe and compare the role of integrity institutions as well as the need for - and characteristics of - the processes that protect and build integrity  
• clearly separate individuals and their actions and the role and importance of integrity institutions and understand that while individuals may fail in their duties, the underlying rationale for the institutions themselves remains sound |
**DEVELOPING INTEGRITY-RELATED LEARNING OUTCOMES (2/2)**

*Students can apply their value positions to evaluate for possible corruption and take appropriate action to fight it*

<table>
<thead>
<tr>
<th>SUB-LEARNING OUTCOMES</th>
<th>INDICATORS FOR ACHIEVEMENT</th>
</tr>
</thead>
</table>
| Students can define corruption and compare it with immoral or illegal behaviour | • form value positions about corruption and express opinions about corrupt acts  
• readily counter the argument that “it is okay to take part in corruption because everyone else does”  
• explain why corruption is worse than simple theft  
• give examples that show why theft of public funds or goods is as bad as theft of private funds or goods  
• identify public norms/values and/or religious views that are opposed to the actions of corrupt leaders |
| Students can compare and determine the major different mechanisms in corruption | • explain the meaning of bribery and gives examples; compare the role and morality of the bribe giver with the bribe taker  
• define and give examples of nepotism: explain why is it bad for the development of a country or an organisation; explain the consequences of nepotism; and explain how selection on merit works and why it is better than nepotism  
• explain the meaning and give examples of conflicts of interest: explain how they can be avoided; design a process that deals with conflicts of interest; and explain the consequences  
• define and give examples of theft or misuse of public goods: explain the consequences of theft of public goods; and compare and contrast grand from petty corruption |

**Teacher notes**
Instruct students not to give up or be neglected during board games.  
Instruct students to understand and follow the rules of the game.  
Even if there are students who cannot answer because they picked up a difficult card, create an atmosphere of encouragement and sympathy.
I still can’t believe you had to take your driving test four times!

Well, I refused to bribe the examiner, so...

Just think of all the bad drivers on the road who did!
LEARNING METHODS (2/2)

- participatory learning
- game-based learning
- presentation
- audio-visual education
