LAUNCH OF E-MARKETPLACE AND PUBLICATIONS

15–19 March 2021

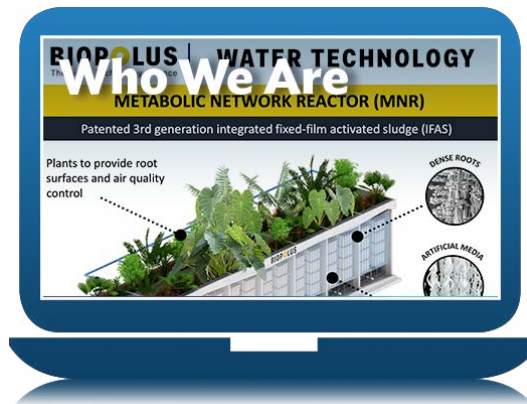

Bioparks: Turning Inner Cities into Oases

Name of Organization **Britishwater Inc**

Location **Philippines**

Year Registered **2015**

Technology Profile

Many developing countries in Asia still suffer from poor wastewater treatment and sanitation-related challenges, which cause water pollution and waterborne diseases. Britishwater’s Biopolus is a “living factory” that blends biotechnology with information technology, converting wastewater and

other organic material into products that can be reused or sold. Biopolus closes the loop to support the circular economy.

Suitable for localised Rural, Semi-Urban and Urbanised communities.
