# CIRCULARITY IN WATER: GLOBAL EXPERIENCES AND PERSPECTIVES

Global Water and Sanitation Initiative  
Circular Economy for Water Security  
16<sup>th</sup> March 2021

Ander Eizaguirre  
Policy Analyst- Water Governance and Circular Economy  
Cities, Urban Policies and Sustainable Development Division,  
Organisation for Economic Co-operation and Development (OECD)

# The Circular Economy in Cities and Regions

## *Survey and case studies*

**51 surveyed** cities and regions  
from Europe, Americas, Oceania and Asia

**6 Case studies** from the Netherlands, Spain, Sweden, United Kingdom and Ireland  
300+ consulted stakeholders

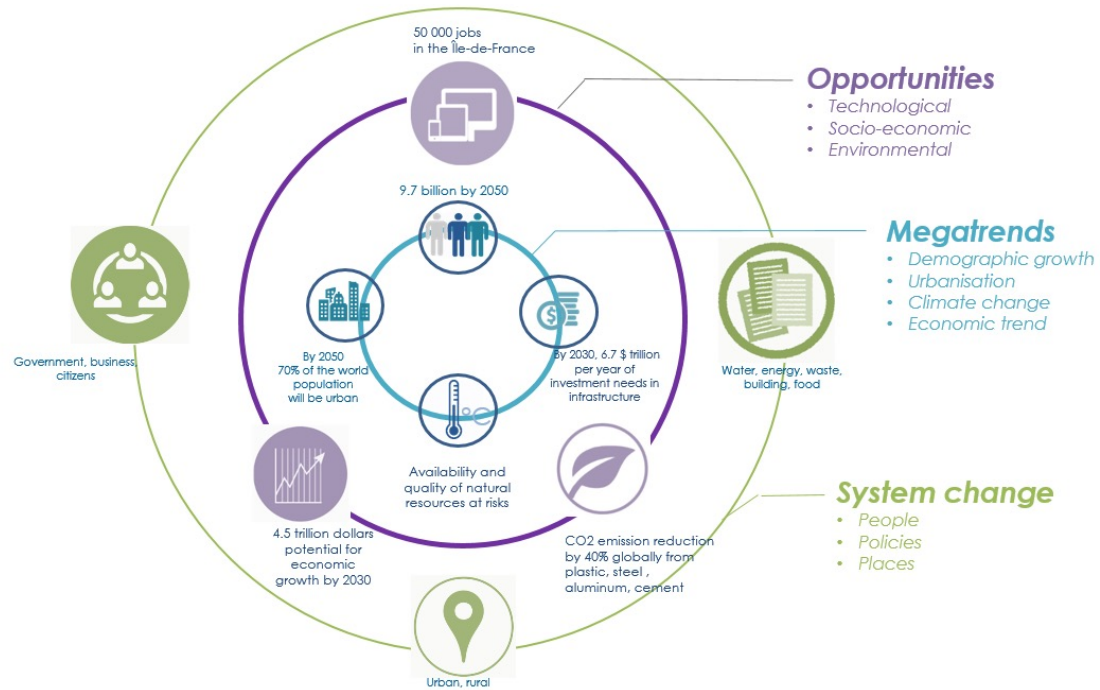

# The water sector has been applying circular principles for long!

Source: OECD (2020), *The Circular Economy in Cities and Regions. Synthesis Report.*

# Water in circular economy strategies and projects

- Closing nutrient cycles (**Amsterdam**)
- Filtering and reusing medicine residues (**Rotterdam**)
- Heat recovery from wastewater to head buildings (**Paris**)
- Reusing wastewater for irrigation (**Milan**)
- Producing energy and materials from wastewater (**Granada**)
- Implementing circular procurement (**Amsterdam**)
- Funding for multi-stakeholder water clusters (**Barcelona**)
- Building cross-sectoral partnerships to close loops and facilitate demonstration projects (**Flanders**)
- Engage with the public to raise awareness (**Amsterdam**)

# Water and circularity in Asia-Pacific

Water demand is expected to increase by 55% to 2050 in Emerging Asia

80% of wastewater is discharged with little or no treatment

Singapore treats 100%

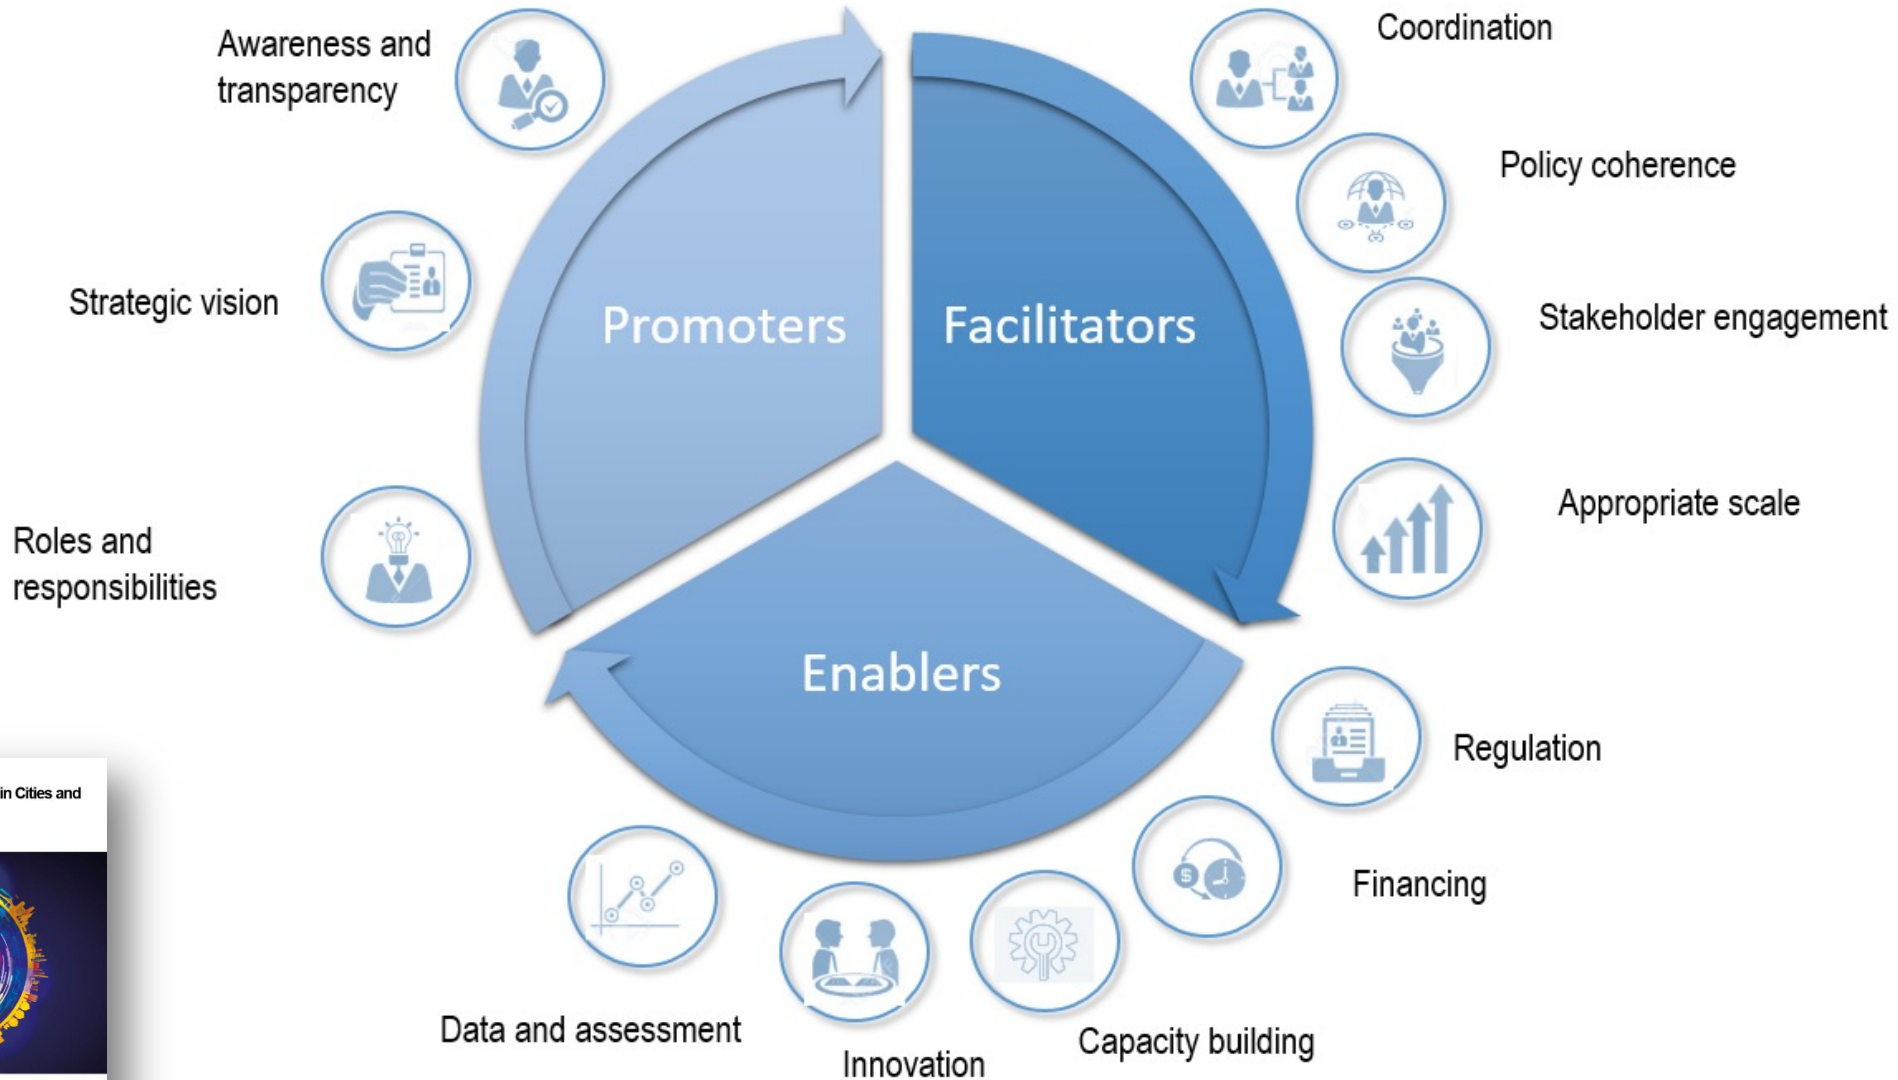

China treats 38%

- Limited use of **economic instruments** to manage water resources
- Lack of **human and financial resources** hampering the implementation of water policies and creating an investment gap
- Lack of clear definition of mandate and powers of **regulatory bodies** for water services

# What to do? Promote, facilitate and enable

# THANK YOU!
