Improving Health in Asia and the Pacific

26 April 2022

Arin Dutta, PhD
Senior Health Specialist
Sustainable Development & Climate Change Department

BUSINESS
OPPORTUNITIES 

Progress Towards Universal Health Coverage up to 2019

Developing Asia had **mixed progress** on the Sustainable Development Goal (SDG) 3 UHC-related indicators

- DMCs across income groups performed below the global average on the **service coverage index**
- Upper middle-income economies (UMIC) had high proportion of households facing significant **out-of-pocket spending**

Health systems face **challenges**, including:

- **Epidemics/pandemics** disrupting health supply and demand, workforce losses, and high economic cost
- **Triple burden** – maternal and child health, rising non-communicable diseases, and trauma and road injuries
- **Stress on human health from climate change**
- **Fiscal pressure on the social sector**
- Rapid **urbanization** and **demographic shifts**

SDG 3: UHC indicators, 2019

ADB Asia Pacific Countries with Operations¹

Opportunities and risks in the next few years

Counter five major “lingering” effects of COVID-19

1. Revive the growth track towards Sustainable Development Goal 3 in use of essential/routine health services
2. Rebuild better public health, diagnostic and curative services
3. Meet the demand for improved pandemic preparedness
4. Potential for translating lessons learned and scaling up successful innovations
5. Manage health and non-health sector effects for health system renewal

Critical concerns towards progress in UHC include:

- arresting the rise in Asia and the Pacific’s NCD burden,
- diversifying DMCs’ resource mobilization, and
- effective public-private partnership.

ADB Health Sector Composition and Pipeline

Health Sector Approvals

2021 USD 5.78B

Health Pipeline

2022 USD 3.23B

In December 2020, ADB launched its **USD 9 billion Asia Pacific Vaccine Access Facility (APVAX)**. Under this, as of 31 March 2022 ADB had approved USD 6.33 billion in financing across 14 approved projects, of which ADB's own financing is USD 4.62 billion (reflected in chart), cofinancing is USD 1.12 billion, and the rest is counterpart financing.

Altogether, APVAX expects to finance 1.02 billion doses of vaccines

Vision and approach for ADB's Health Sector Directional Guide (HSDG), 2021-2030

Vision: Provide financing and knowledge products to rapidly progress to universal health coverage in Asia and the Pacific.

Key trends: Provide long-term strategic direction, guide knowledge activities, input in DMC engagement via CPS, influence multi-sectoral endeavors

I. **Rapid urbanization alongside climate change**

II. **Demographic trends**, especially aging

III. **Decentralization and regional cooperation** (e.g., around health security)

IV. **Digitalization of society and processes**

Focal areas: Guide skills-building and staffing, influence pipeline creation: SOV/NSO, generate flagship projects in DMCs

I. **Governance, policy and public goods:** regulation, legislation, and stewardship

II. **Architecture:** infrastructure, data systems and supply chains

III. **Financing and incentives:** public - and private - led

IV. **Workforce:** clinical, technical and managerial - link with OP1

Universal Health Coverage Results

- Universal access to high - quality services
- Impoverishment due to medical payments eliminated

Cross-cutting priorities: Address programming priorities and enhance projects' development effectiveness

Gender equality across all domains

Climate change mitigation and adaptation

Pandemic preparedness

The HSDG is currently being finalized and will be released in Q3 2022
