Ignite transformation in water and sanitation utilities

Current challenges

High NRW
Low collection efficiency
Lack of human resources
etc.

Future challenges

Water security
Expand services
Aging infrastructure
etc.

Example challenge:

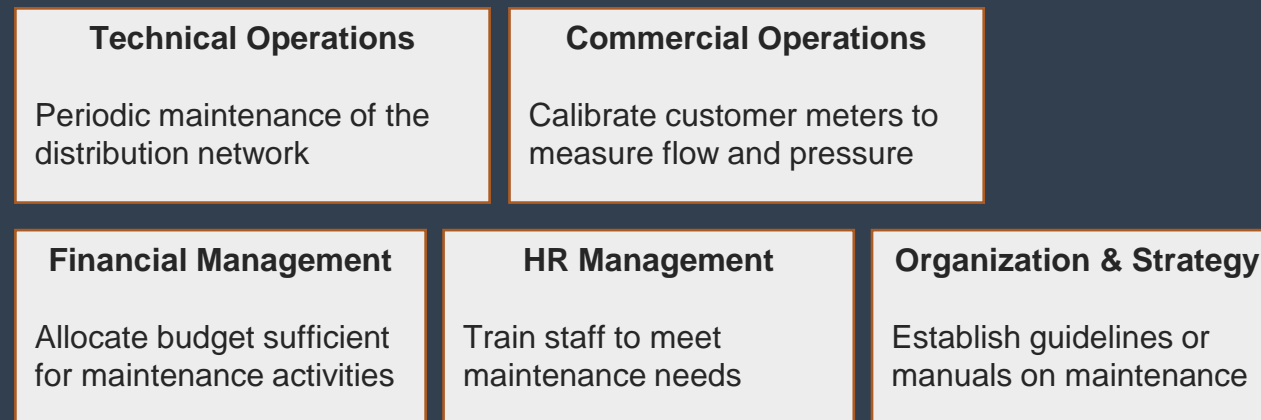

Achieve 24x7 supply to customers

Sample intervention:

Ensure adequate and proactive maintenance

Action plan:

Aligned actions in the 5 operation areas

Other improvements (non-infrastructure):

Innovation:

Use computer system for asset registry

Inclusion:

Extend services to marginalized communities

***Customer orientation:* Seek customer feedback to improve services**

Resilience:

Keep maintenance records on a digital back-up

We want to **empower utilities** to address their challenges

Current challenges

High NRW
Low collection efficiency
Lack of human resources
etc.

Future challenges

Water security
Expand services
Aging infrastructure
etc.

To do this, we must...

- Strengthen the **essential processes** of utilities so that they could face their current challenges;
- Develop **future-thinking capabilities** of utilities to prepare for future challenges; and
- Help utilities **develop an action plan** that will enable them to address these challenges.

We can do these using the **Utility of the Future** framework

The Concept

Strengthening in parallel...

Essential Processes
to ensure efficiency
and continuity

Future Readiness

Staying one step ahead in a
rapid paced environment

... through a conceptual framework

Close the gaps

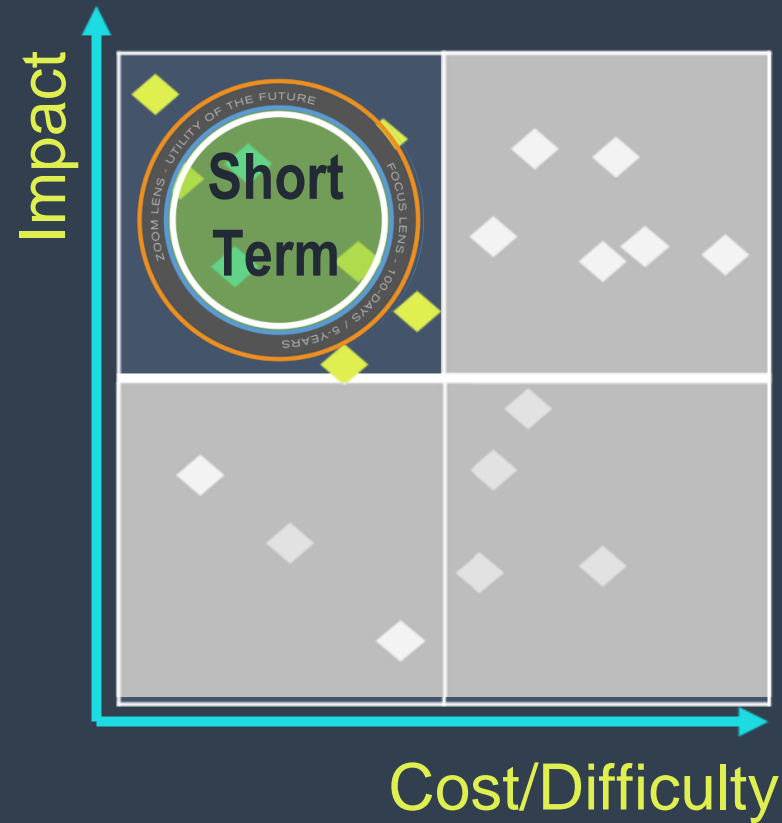

Challenge the present

- Conduct a gap analysis for improvement
- Define improvement actions for each gap
- Prioritize actions for 100-day plan: high impact, low cost/difficulty
- Define 100-day action plan: timeline, responsible parties, estimated cost

Challenge the present

Becoming a Utility of the Future

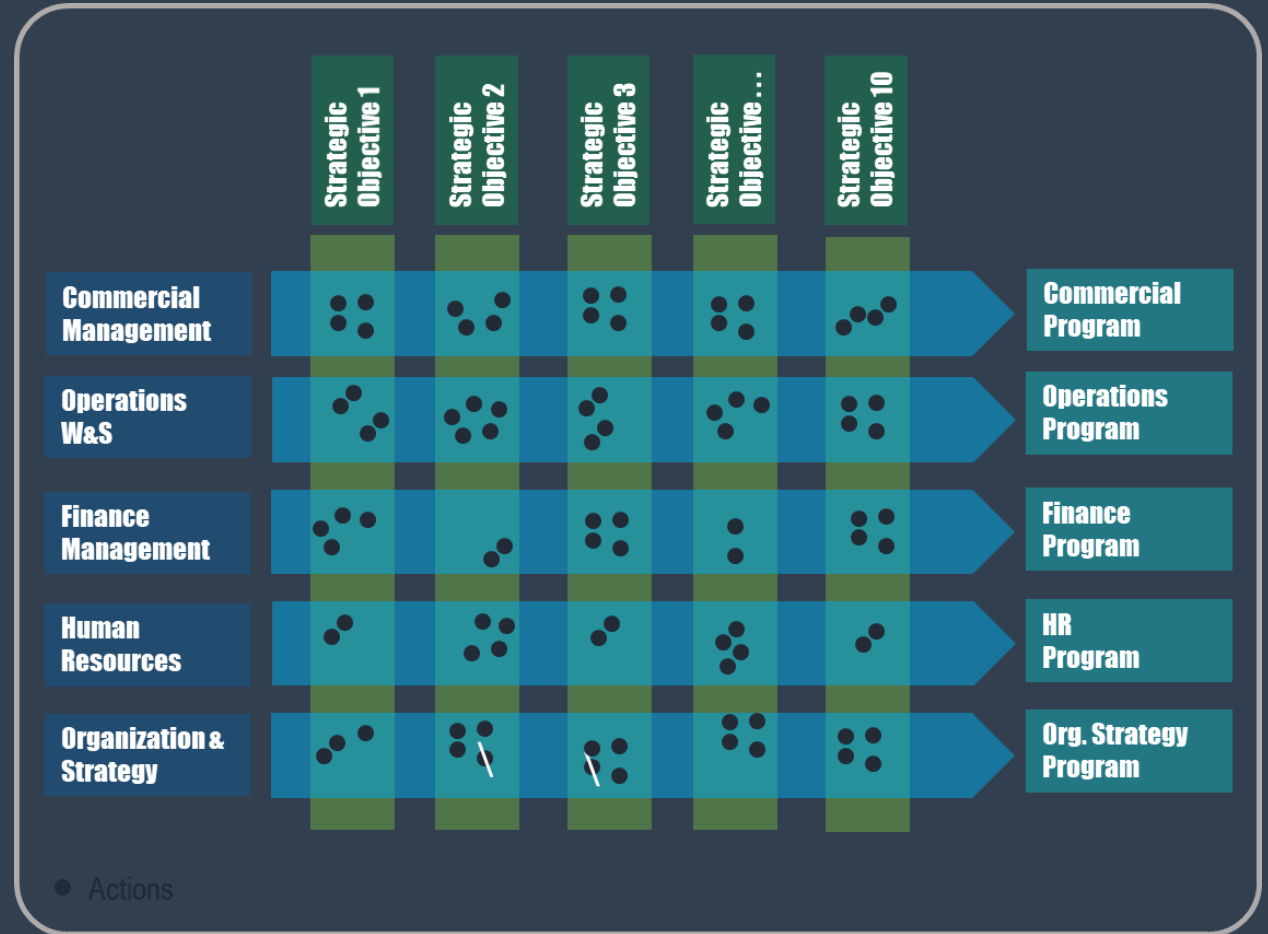

Imagine the future

Imagine the future

- Review, update and/or change the elements of the strategic framework
- Develop high-level strategic program per element

The Timeline

Implementation: Remote

Implementation Plan 

Utility assessment  1-2 weeks

100-day action plan  2-4 weeks

Implementation 100-day plan  15 weeks

5-year strategic plan  2-4 weeks

Implementation 5-year plan  5 years

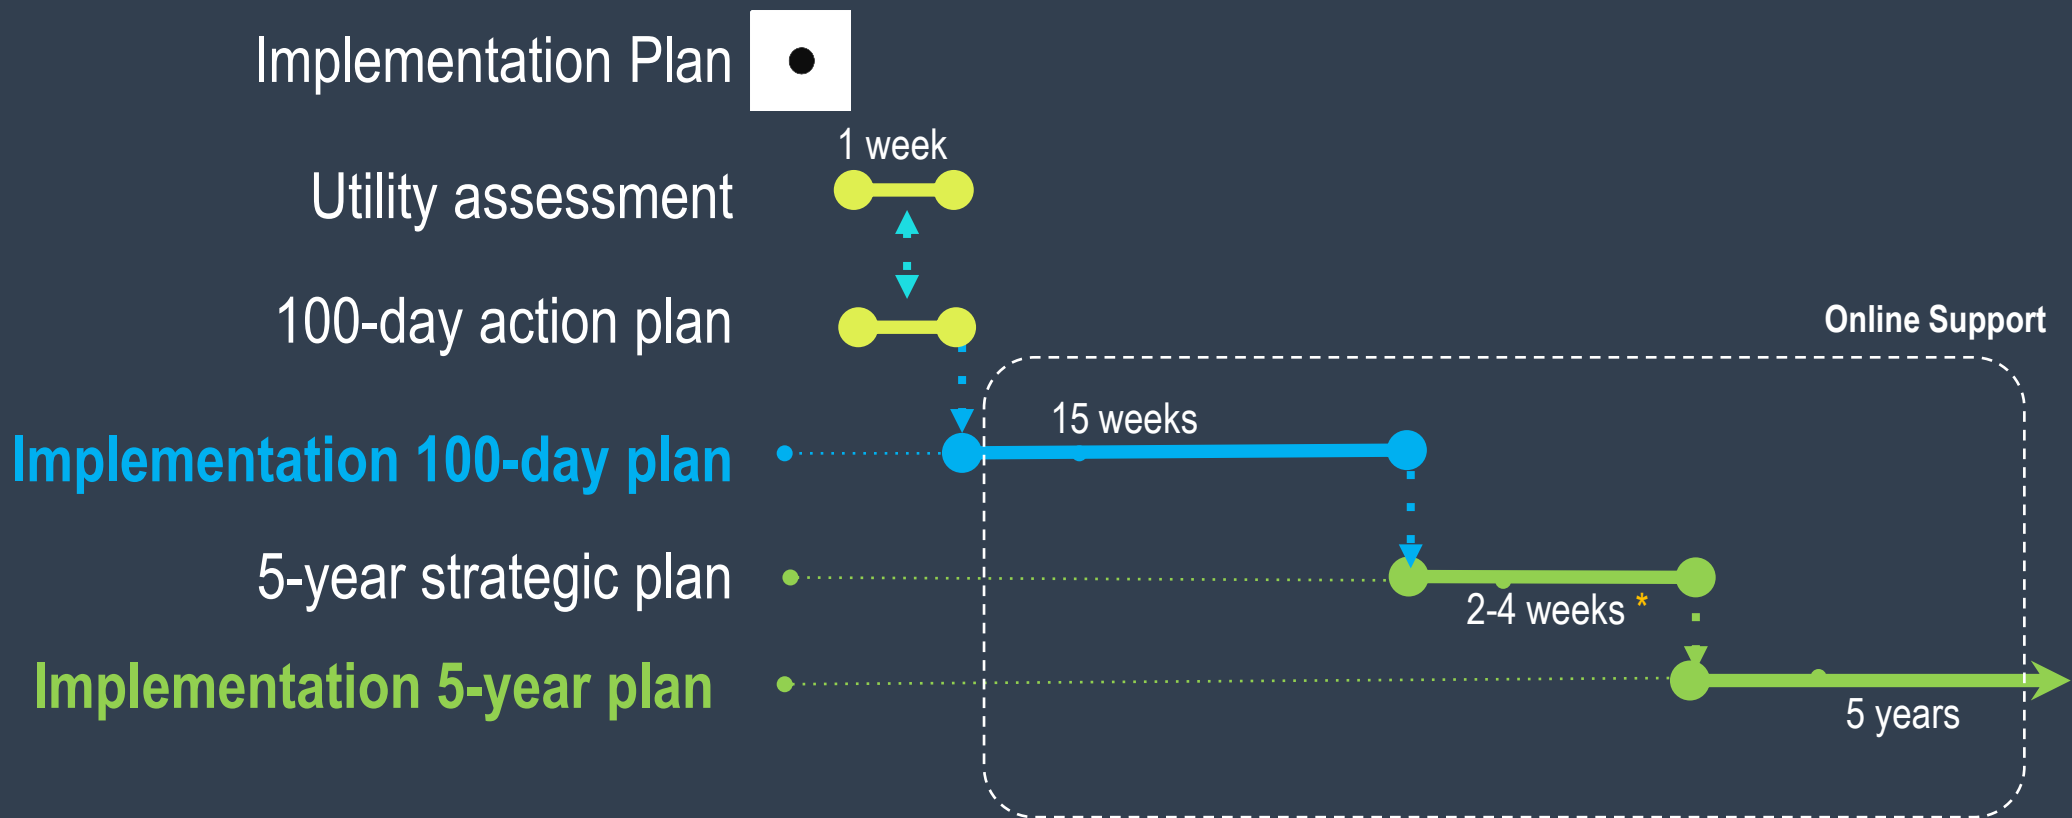

Ignition

Week

Implementation: Ignition Week

It could also be done on-site after the 100-day plan (5 days approx.)
