

ADB

Upstream Climate Assessment: Supporting the Development of Country Partnership Strategies

23 September 2022

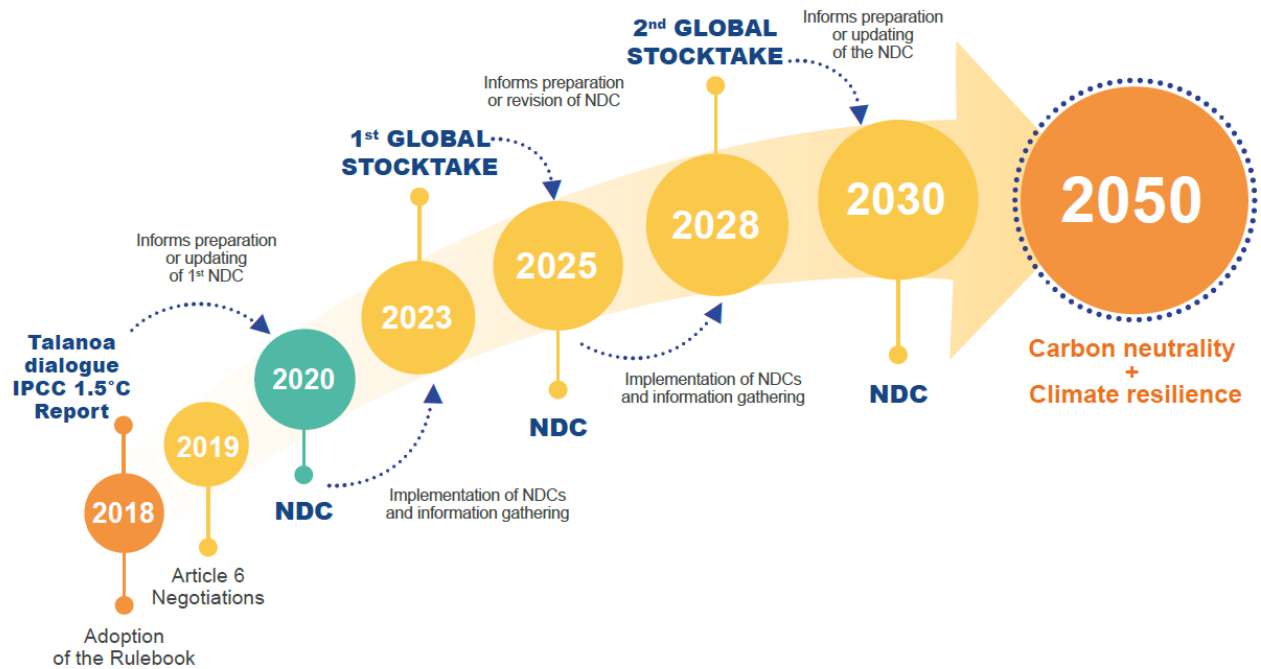

The views expressed in this presentation are the views of the author/s and do not necessarily reflect the views or policies of the Asian Development Bank, or its Board of Governors, or the governments they represent. ADB does not guarantee the accuracy of the data included in this presentation and accepts no responsibility for any consequence of their use. The countries listed in this presentation do not imply any view on ADB's part as to sovereignty or independent status or necessarily conform to ADB's terminology.

“...most **country partnership strategies are not underpinned by systematic and robust climate analysis**, leading to weaknesses of ambition, lack of focus, an absence of support for transformational change, and lack of private sector engagement. **ADB’s current strategic approach lacks sufficient relevance to the rapidly evolving climate context** and to the urgent needs of the **Asia and Pacific region in future. Countries need ADB to provide support as they transition away from fossil fuels and put in place low-carbon and carbon-resilient economies.**”

Recommendation 2:

ADB country partnership strategies and associated programming should be informed by and reflect country-specific climate change diagnostic assessments and should clearly specify the path of engagement and results through both public and private sector operations.

COMMITMENTS AND THE POLICY LANDSCAPE

- To strengthen climate change and disaster risk management integration in country programming and dialogues
- Solutions needs to be tailored to country context, aligned with the country's climate and development plans
- Building on and complementing existing country analysis
 - e.g. Joint ADB-WBG Climate Risk Country Profiles, WBG Country Climate and Development Reports
- To support real transformation, a good understanding of issues and drivers relating to CC DRM is necessary early in the process

Per Focus Area

NDC Advance is a TA platform which supports DMCs to develop climate investment plans, mobilize finance, and build capacity to implement and monitor NDCs

Cluster TA - Regional: Supporting the Implementation of ADB's Climate Change Operational Framework 2017–2030

SUBPROJECT 1	SUBPROJECT 2	SUBPROJECT 3	SUBPROJECT 4
---------------------	---------------------	---------------------	---------------------

[\(TA 9716\)](#)

\$4.5 million

Target completion:
31 Dec 2023

Translating NDCs into climate investment plans and projects.

[\(TA 9744\)](#)

\$1.92 million

Target completion:
30 Nov 2023

Improving DMCs' access to climate finance, including support for financing mechanisms and linking to private sector.

[\(TA 9720\)](#)

\$1.7 million

Target completion:
31 Dec 2023

Developing methods and tools to measure, monitor and report on commitments made under NDCs.

[\(TA 6933\)](#)

\$1.0 million

Target completion:
30 June 2024

Identification of climate investment priorities.

Links NDCs and ADB's operations at CPS and project level, including linking private sector investments with NDCs.
