1 INTRODUCTION

1.1. BACKGROUND AND PROJECT RATIONALE

The Inclusive Cities Dialogues (ICD) project directly contributes to the ASEAN Australia Smart Cities Trust Fund (AASCTF or “Trust Fund”) program’s aim to build liveable, resilient, and inclusive cities across Southeast Asia, while in the process identifying scalable best practices that can be replicated across cities in Asia and the Pacific. Through a series of regional dialogues with key city actors pursuing reform or with decision-making roles, the ICD Project will provide a platform for dialogue on the potential for planning and implementing more inclusive cities. These dialogues bring together a diverse range of stakeholders from “bronze,” “silver,” and “gold” level cities on dynamics of exclusion to build consensus and incentivize actionable and participative reforms to strengthen inclusion on salient urban issues.

At its core, the ICD project seeks to embed a gender equality and inclusion lens in how cities are designed and governed, and thereby to improve responsiveness, accessibility, and quality of urban governance to effectively address and meet the needs of women, people with disabilities, children, older persons, and members of other marginalized groups. In seeking solutions to some of these challenges, the project focuses on the intersection between Smart and Inclusive. By “smart,” we mean the ways in which urban living is being improved through innovations in technology, design, planning and policy. By “inclusive”, we mean the ways in which urban living is being improved through greater access to opportunities, services and resources for all citizens, but in particular the marginalized and disadvantaged.

The ICD project has been designed to ensure early and continuous engagement with stakeholders throughout the project period. The project began with a stakeholder and issues mapping analysis. Based on the stakeholder and issues mapping analysis, the ICD team identified three issues that were seen as salient by a diverse set of actors within each city and across the various cities. Each multi-stakeholder dialogue focuses on one of these issues, namely:

- Module 1: Access to infrastructure and services
- Module 2: Safety and security
- Module 3: Access to decent work and income

In line with the project’s strategic approach of local ownership; political feasibility; and inclusive process, the multi-stakeholder sessions have been framed from the perspective of disadvantaged groups and are intended to enable peer learning among city-level and national stakeholders. In order to maximize engagement, participants have been divided into three cohorts. The first two cohorts comprise of city-level actors from government and non-governmental organizations, while the third cohort comprises of national and regional level actors. Each participant cohort will attend a total of three dialogues, each focused on one significant inclusion issue. Table 1-1 summarizes the key activities under the ICD project:

No.	Key Activities		Timeline
i.	Stakeholder and Issues Mapping		October to November 2022
ii	Multi-stakeholder dialogues	Module 1: Access to infrastructure and services	4th, 17th, and 24th March 2022
		Module 2: Safety and Security	12th May, 19th May and 01 June 2022
		Module 3: Access to decent work and income	June-July 2022
iii.	Inclusive Cities Event		September 2022
iv	E-Learning Module		September 2022

1.2 MODULE 2- OVERVIEW

The second module of the inclusive cities multi-stakeholder dialogues focused on urban safety. This issue was the second significant urban issue identified by city-based stakeholders during the stakeholder and issues mapping process conducted between October – December 2021. Following from those conversations, the theme of urban safety was understood as encompassing the different dimensions of urban spaces, services and governance that impact the ability of urban residents to live, work and participate in urban life without fear of bodily harm or intimidation. Inclusive urban safety, therefore, entails addressing a complex set of ever-changing and interconnected problems that have varying impacts on different individuals and group, ranging from, physical built environment, socio-economic practices, and systems (governmental, service provision, environmental).

A total of three dialogues were hosted on the issue of urban safety. Each dialogue highlighted two-three on-going initiatives across Trust Fund cities to promote urban safety, particularly for at-risk groups such as women and girls, people living with disabilities, and across different spaces, from within the home to work and in public spaces and on roads.

Together the dialogues aimed to deepen urban stakeholders understanding of the various dimensions of urban safety and introduce different approaches to addressing these challenges with the hope to facilitate connections through peer learning and generate greater buy-in among decision-makers to prioritize responsive and inclusive urban safety reform.

Table 1-1 represents the dates of Module 2 delivery to Cohort A, B and C.

Table 1.1 Module 2 Dates of Delivery

No.	Cohort	Date of Delivery
i.	Module 2 – Cohort A	12 May 2022
ii	Module 2 – Cohort B	19 May 2022
iii.	Module 2 – Cohort C	02 June 2022

1.3. REPORT STRUCTURE

This report is divided into three sections, starting with a brief description of the dialogues hosted under Module 2. This includes details on speakers and participants, a summary of key discussion points and participant feedback. The report concludes with a section on key learnings and next steps.

2 MODULE 2- URBAN SAFETY AND SECURITY

Photo: Adobe Stock

2.1 PROGRAMME

The multi-stakeholder dialogues on urban safety were structured similar to the previous module on Access to Infrastructure and Services, with each dialogue comprising of three sessions in line with the three dialogue objectives, namely:

- *Session 1/Objective:* To Deepen understanding of the ways in which marginalized groups experience exclusion and discrimination in relation to urban safety, and why these issues continue to persist
- *Session 2/Objective:* To learn from on-going efforts across ASEAN cities to address exclusion and marginalization, exclusions in urban environments
- *Session 3/Objective:* Small group discussions on opportunities for reform and potential action to strengthen urban safety in trust fund cities

Each dialogue began a session on framing the issue followed by plenary discussion to capture levels of experience and engagement on the issue of urban safety. The focus of this session was to demonstrate the complexity of addressing the issue on urban safety as it relates to the physical built environment, socio-economic practices, and the systems of governance and service provision. The Asia Foundation developed an animated video to demonstrate the different dimensions of urban safety by including reflections from three case studies from Indonesia, Cambodia and Vietnam. These case studies helped illustrate the issue of safety within the workplace, using the example of female garment workers; and the intersecting disadvantage that can increase the risks of experiencing violence in public spaces and when using public transport. In particular, the video and following discussion focused on exploring why these issues continue to persist, while alluding to some of the ways in which stakeholders in each of these contexts have tried to address these issues.

2.2. PARTICIPANT BACKGROUND

Dialogue participants for Module 2 were the same as those as the first dialogue, with the addition of 5 participants from Hue. As with the previous dialogue, participants were divided into three cohorts. The first two cohorts included city-based actors, while the third cohort included national and regional level actors responsible for or working on urban safety. Due to the on-going national elections and subsequent government handover in Philippines, few of the participants were unable to join module 2 discussions.

The majority of participants across all three cohorts had experience working on the issue of unsafe public infrastructure such as street lighting, ensuring side walks etc. Fewer participants had experience addressing the issue of domestic violence and public sexual harassment and abuse. A total of three participants across the three cohorts had experience working on addressing harassment and abuse in the workplace. A large proportion of participants, especially in Cohort A and C had reported working on the issue of urban safety but topics beyond those that were mentioned. These included reducing the risk of violence and harassment for people living with disability, improving road safety, and homeless children.

Cohort A

A total of 45 participants attended the first cohort from the following cities:

- | | |
|----------------------|--------------------|
| • Coron (PHI) | • Phnom Penh (CAM) |
| • Semarang (INO) | • Hue (Vietnam) |
| • Kaysone City (LAO) | |

The following figure represents the Cohort A participants experience in working on urban safety issues

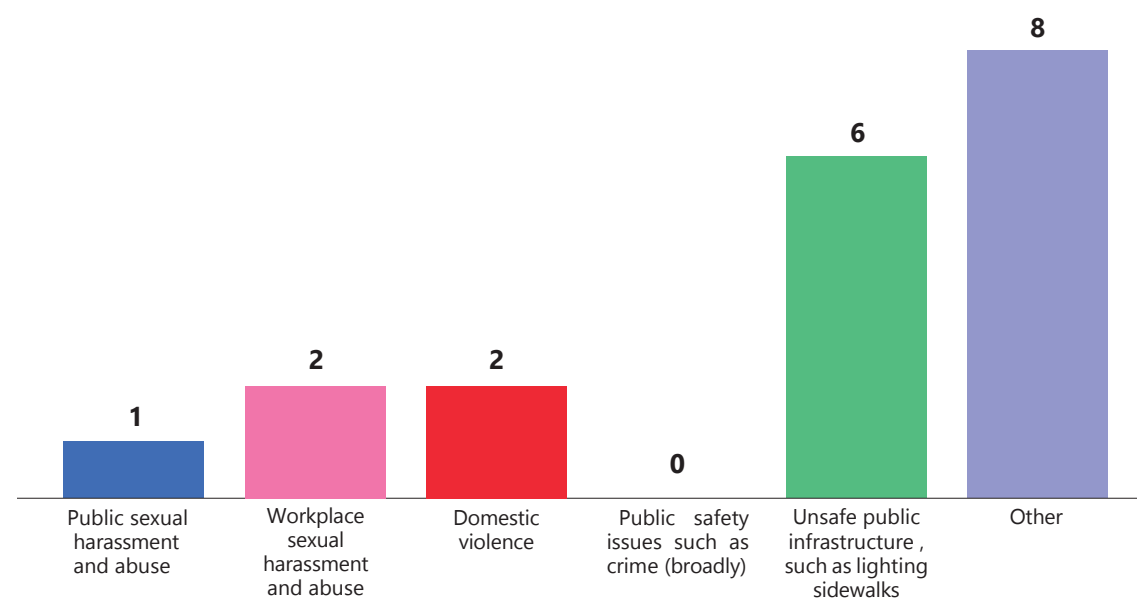

Figure 2.1 Cohort A

Cohort B

A total of 62 participants attended the second cohort from the following cities:

- Baguio (PHI)
- Davao (PHI)
- Battambang (CAM)
- Luang Prabang (LAO)
- Pakse (LAO)
- Makassar (INO)
- Chonburi (THA)
- Penang (MAL)

The following figure represents the Cohort B participants experience in working on urban safety issues.

Figure 2.2 Cohort B

Cohort C

A total of 35 participants attended the third cohort from national and regional government. They included representatives from regional organization such as the ASEAN Secretariat.

The following figure represents the Cohort C participants experience in working on urban safety issues

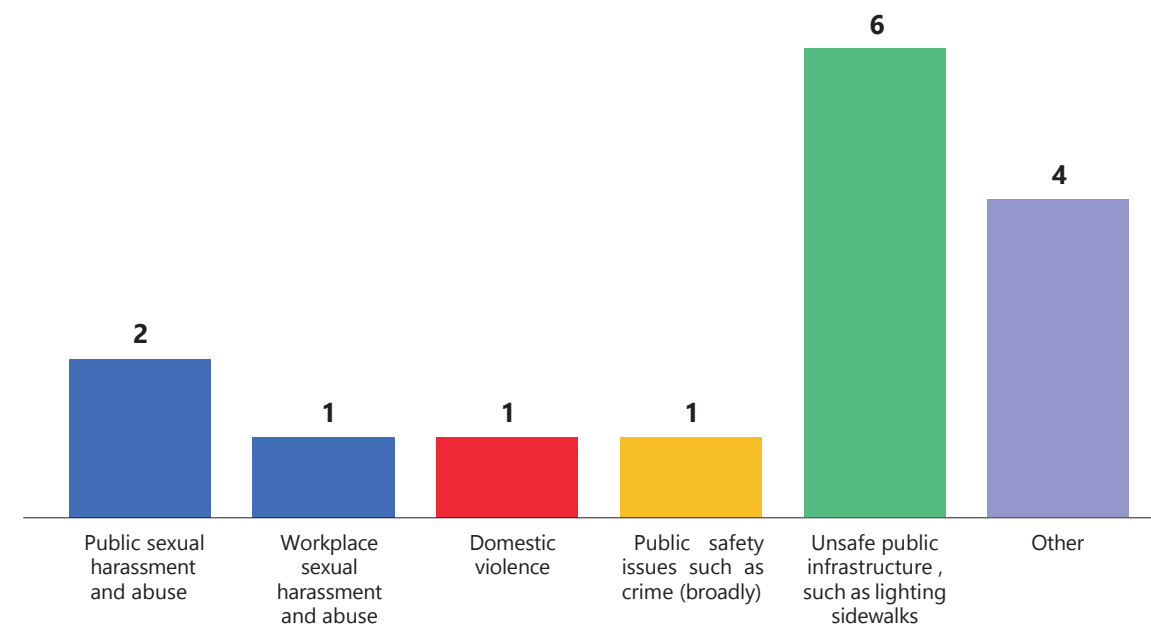

Figure 2.3 Cohort C

The following session on deepening our collective reflections on efforts to improve urban safety. Each session began with a presentation on the approaches to addressing gender-based violence (GBV) prepared by Kore Global and The Asia Foundation. The key focus of this presentation was to highlight the distinction between prevention and response and to highlight the need to accompany responses that reduce the risk of harassment and violence in the short-term, with more transformative approaches that tackle the root causes of violence in the first place. The latter include interventions that seek to transform gender discriminator attitudes, behaviours and norms that help sustain GBV.

The final session comprised of a facilitative country-based discussion on noting the significant urban safety challenges in each city and country and identifying potential opportunities for reform at present. The following figures represents a sample of country-based discussions from Cohort A.

Cambodia - Phnom Penh

What is the biggest inclusion challenge in your cities/country when it comes to improving urban safety..?

Commitment from leadership level (PS, Govt, Employers)	Safety measures street lights, regular patrolling police/civil movement in high-risk spots.)	Urban infrastructure/road pathway/lighting/traffic/signages
Accessibility facilities in urban infrastructure/ public transportation	Transportation (facility and safety requirement and control) for factory workers	Community policing comprehensive/inclusive approach by police community, local authority, and CSO stakeholders.
Educated police/ patrolling agents (on safety, LGBT, CBV, harassment and reporting)	Safety place/public space in urban such as park, riversides playground/bus stops/ stations for all people includes women/ girl with disabilities	Harassing behaviors by me (requires campaign to change behaviors)

Are there any opportunities for change or reform? where and who needs to be involved

Holistic approach (workers, factory owners, brands, suppliers, govt, consumers) to ensure both demand & supply side are putting this compliance issues at the center	More investment in accessibility facilities/user-friendly in all infrastructures/ public building/ public space in urban/city	More improvements to public transportations and make them more friendly and accessible to everyone
Improvement included better light side walk and security officers	More educated population, esp. young people. opp for mass campaigns for men's behavior change and more responsive services and appropriate patrolling	One campaign Agenda : My body, choice (don't tell women not to walk at night, tell men not to harass)
Law/policies enforcement	Another Campaign agenda : Anti- CBV Policing. Add more Women and LGBT police on streets	Threat: Harm reduction the inhumane practice of drug law
		Potential threats: draft law on the public orders

Figure 2.4 Cambodia Group Discussion in Cohort A

Vietnam - Hue

What is the biggest inclusion challenge in your cities/country..? when it comes to improving urban safety..?

Commitment from leadership level (PS, Govt, Employers)	Safety measures street lights, regular patrolling police/civil movement in high-risk spots..)	Urban infrastructure/road pathway/lighting/traffic/signages
--	---	---

Are there any opportunities for change or reform? Where and who needs to be involved?

Conventional social(gender) norms seem enable men/people to underestimate women or not treat them with expected respect. This is along-term mission/vision to eliminate it, not only a few training courses.	Bus system from urban to rural zones increase ,and it seems everything works well with all passengers,including women. Sexual harassments in different forms may happen,but it is not easy to control these. Voicing up also	it is multidimensional a multilayer issues,so it should be involvement of many gov bodies,C-SOs,mass organizations.It needs a good coordination mechanism to implement and protect these groups.
Awareness raising for all stakeholders; govt bodies to issue regulations. For the revision of domestic violence law: detail sanctions and stakeholders in the law so that it would be easier to implement in the later		Challenges:coordination, mechanism, and also awareness

Figure 2.5 Vietnam Group Discussion in Cohort A

Philippines - Baguio and Davao

What is the biggest inclusion challenge in your cities/country when it comes to improving urban safety?

Increase in population due to migration, difficult to track/ identify people coming in and out of the city	Accidents are due to traffic congestion	Improper disposal of garbage by residents clogging of waterways and rivers.	Enforcement of local policies on settlements, safeguarded and hazard prone areas.
Low awareness on environment-related risks	Improper liquid waste disposal goes to natural drainage systems	Address gender-based violence	Increase cases of VAWCs

What is the biggest inclusion challenge in your cities/country when it comes to improving urban safety?

Push for the development of adjoining localities	Build community sewer systems
--	-------------------------------

Figure 2.6 Philippines Group Discussion in Cohort A

2.2 OVERVIEW OF SPEAKERS

Speakers for each module were identified by The Asia Foundation’s national focal points. Most speakers were identified from attending participants or “sharers” who were already working on improving urban safety in their city. In some cases, the Foundation, brought in external actors to share perspectives and approaches to improving safety on key dimensions of urban safety that participants were not currently engaging on.

Table 2.1 Overview of Speakers and their presentations

Cohort	Name	Title, Affiliation	Country	Title of Presentation
A	Merlyn Sopjan	Program Manager, Indonesian Family Planning Association (PKBI)	Indonesia	Living in the Cities: Experience and Challenges of Transgender Women
	Sovattha Neou	Country Director, CARE Cambodia	Cambodia	The Efforts to Improve the Safety for Women/ Girls in Urban Settings
B	Hasanah Akhir	Penang Women Development Corporation (PWDC)	Malaysia	Safety and Security: Penang State Government and PWDC Initiative
	Leang Veasna	Deputy Governor, Battambang City	Cambodia	Safety and Security in Battambang City
	Atty. Kristine Rosary E. Yuzon-Chaves	Executive Director, Philippine Commission on Women (PCW)	Philippines	PCW’s Initiatives on the Safe Spaces Act
C	Dr. Bahrul Fuad	Commissioner of National Commission Violence Against Women	Indonesia	Protecting Women Against Violence in Indonesia
	Hein Htet Aung	Project Assistant, Women for the World	Myanmar	Communicating Safety in Urban Context

In Cohort B, Vice Mayor of Pakse, Lao PDR shared with the participants challenges faced by the city of Pakse on Road safety and Fire safety. He brought to light major problems faced such traffic congestion which is aggravated due to density of population in the city.

2.3 SUMMARY OF DIALOGUE SESSIONS

Considering that participants have diverse lived experiences and inclusive work knowledge, the sessions opened up discussions by providing prompts.

In session 1, the participants were invited to share issues they have observed and their opinions on why these issues still persist. A participant from the Philippines mentioned about the intersectionality of women with visual impairment as they navigate cities. While receiving help from kind strangers, sometimes there are sexual harassment cases since the perpetrators would take advantage of the visual impairment. Another participant from Indonesia shared that the attitudes and policies that take more profound understanding of marginalized communities should become more prevalent.

In session 2, speakers from different cities shared their current work streams focusing on urban safety. The presentations include from the safety and security works of Battambang, Cambodia with an extensive policy covering issues such as crimes, harassment, domestic violence, and disasters. One of the presenters was from Myanmar who works with Women for the World. His presentation talks about the urban safety audit they did in three cities across Myanmar cities. A presenter from Indonesia shared her work on safety of LGBTQ communities and step by step of how they have been galvanizing change for the betterment of these communities.

Session 3 is when we encourage the participants to share with each other of the issues they can mitigate with potential solutions. A participant from the Philippines shared that there should be a “checklist of minimum comprehensive accessibility standards in the procurement guidelines and processes” to promote urban safety in the cities. He also emphasized that there should be partnerships among People with disabilities (PWD) organizations, women’s organizations, and other vulnerable communities to develop short- and long-term plans where these organizations will also be invited in implementation, and M&E.

2.3.1 Summary Discussion Points

The table below highlights the country-based discussion points during the second multi-stakeholder dialogue series across Cohort A, B and C.

Table 2.2 Highlighted Country based discussion points

Country	Priority Inclusive Urban Safety issues	Potential opportunities for reform
Philippines	<ul style="list-style-type: none">• Need to address social norms• Stereotyping women and girls, who are often perceived as weak• Persistent gender discrimination when it comes to hiring women especially in professions perceived as male only• Increase in urban population due to migration resulting in lack of documentation and data on migratory patterns in and out of the city,• Increase risk of accidents due to traffic congestion• Enforcement of local policies on settlements, safeguarded and hazard prone areas• Persistence of gender-based violence and increased number of violence against women cases.	<ul style="list-style-type: none">• Adopting gender-neutral language across policies and plans• Expanding laws/policies to promote gender inclusion• Promoting integrated development of adjoining localities• Investing in community sewers systems
Thailand	<ul style="list-style-type: none">• Improve road safety through better managed of vehicles and physical infrastructure• Improve safety across public transport	<ul style="list-style-type: none">• Change in city leadership due to the upcoming election of Pattaya city and recently concluded elections in Bangkok that led to the election of a new mayor present new opportunities for inclusive urban reform.
Lao PDR	<ul style="list-style-type: none">• Road safety: improve management of traffic, vehicles and streetlight to reduce accidents• Address rising housing needs and employment insecurity due to increased urban migration in order to promote safety.	<ul style="list-style-type: none">• Raising awareness of city residents to increase their engagement in policy development.

Country	Priority Inclusive Urban Safety issues	Potential opportunities for reform
Cambodia	<ul style="list-style-type: none">• Increasing commitment across leadership (Private Sector, Gov't, Employers)• Need for safety measures such as street lights, regular police presence in high-risk spots• Improving urban infrastructure such as road, pathway, lighting, traffic, signages, etc• Improving transportation facility and safety requirement for factory workers• Explore instituting community security approach: These entail a comprehensive and inclusive multi-stakeholder approach including police, community members, local authorities, and civil society actors.• Improving safety across public spaces in the city such as park, riversides, playground, bus stops and stations, especially for women and girl living with disabilities• Address harassing behaviours by men• Reduce incidence of traffic accidents by increasing respect to traffic law,• Improve safety of street children	<ul style="list-style-type: none">• Designing holistic and multi-stakeholder approaches, including workers, factory owners, brands, suppliers, gov't, consumers to ensure both demand & supply side are placing compliance and safety issues at the center• Increasing investment in accessibility facilities/ user-friendly infrastructures such as public buildings and across public spaces in urban/ city• Openness to increased improvements to public transport and make them safer and more accessible to all• Interest among educated populations, especially young people. Exploring ways to address opposition towards mass campaigns for men's behaviour change and promoting more positive forms of masculinity.• Strengthen implementation/ enforcement of existing laws and policies
Indonesia	<ul style="list-style-type: none">• Increase responsiveness and protection against safety risks faced by vulnerable women groups, transgender communities, persons with disabilities. This includes risk of violence from family and other close members from the community.• Respond to needs of survivors of GBV.	<ul style="list-style-type: none">• Promoting law enforcement involving all stakeholders• Integrating gender lens across government planning and budgeting• Promote affirmative action for vulnerable groups• Provide comprehensive training not only for the most marginalized groups but more importantly for policy maker and development agencies.• Raising awareness and positive norms building, through the use of mass media, especially when it comes to survivors of GBV• Integrated and community responses to addressing GBV

Country	Priority Inclusive Urban Safety issues	Potential opportunities for reform
Malaysia	<ul style="list-style-type: none">• Address resistance when it comes to inclusivity especially with respect to promoting gender equality• Understanding of domestic violence also as a crime, not only as a family issue or private matter.	<ul style="list-style-type: none">• In Penang, both government and private sectors are involved in implementing inclusive policies which make the reform is easier.• Work with stakeholder who can fill in the gap by promoting value and norms change across the community and its leadership.

2.4 COMMUNICATIONS AND ONLINE ENGAGEMENT

Similar to Module 1, outreach for Module 2 was continued through social media, primarily through the AASCTF channels in Facebook, LinkedIn, and Twitter. Specially made graphics, such as a photo carousel and speaker cards, were prepared to introduce the topic of Urban Safety and Security and to showcase the speakers for each cohort. The photo carousel was also released in time with the International Day Against Homophobia, Transphobia, and Biphobia on 17 May, further highlighting the importance of the module topic and, in particular, the safety challenges faced by the LGBTQ+ community.

Figure 2.7 Images for the Urban Safety and Security photo carousel

Figure 2.8 Social media speaker card for Cohort A

During each dialogue, live tweeting was conducted to capture highlights and interesting takeaways. When available, speakers and/or their organizations were tagged to help encourage likes, retweets, or shares, and amplify the message. The tweet threads from each live tweeting per cohort are available below:

Cohort A:

<https://twitter.com/aasctf/status/1524571267135057920?s=20&t=iU5UYBDuDtBYQYg--Vk4ig>

Cohort B:

<https://twitter.com/aasctf/status/1527107363630891008?s=20&t=iU5UYBDuDtBYQYg--Vk4ig>

Cohort C:

<https://twitter.com/aasctf/status/1532181404070871040?s=20&t=iU5UYBDuDtBYQYg--Vk4ig>

These links were also shared in LinkedIn, Facebook, and the private Facebook group for participants. In addition to these promotions, an article summarizing the highlights and key ingredients for inclusive reform from Module 1 was published in Urbanet, an international blog on sustainable urban development supported by GIZ. This was promoted across the AASCTF channels, as well as in Urbanet's Twitter and Facebook channels. The article can be seen **here:** <https://www.urbanet.info/ingredients-for-inclusive-and-effective-urban-reform/>

2.5. SUMMARY OF POST-MODULE SURVEY FEEDBACK

Similar to Module 1 Dialogue Session, after each dialogue session in Module 2, a post module survey form was disseminated to all participants to receive their feedback on the content, conduct of the sessions.

A facilitation plan had been developed to increase the rate of responses from the participants. The facilitation plan included introducing the link and QR code to access the survey form during the breakout room discussions, along with sharing the link mid-discussion (chat function, prompt from facilitator). Furthermore, post sessions emails were sent to participants to receive their feedback.

Responses received to the post-module survey were 8 for Cohort A, 10 for Cohort B and 7 for Cohort C. (see Appendix D for details). 84 percent of the participants across all three cohorts agreed that their knowledge base on urban safety and security for marginalized groups in their city had improved after attending the sessions.

Similarly, 84 percent agreed that the information and materials presented during the session were relevant to them. General response was to increase the time slot for discussions amongst the participants.

3 CONCLUSION

Photo: Adobe Stock

3.1. KEY LEARNINGS

While the second module built upon learnings from the first dialogue series, reflections with the project team at the end of each dialogue have provided additional insight on how to deepen discussions and improve participation during the dialogues. Based on these insights and after incorporating participant feedback, the project team made three additional changes to the dialogue design:

- Addition of “Respondent” role: Given that cities are varying experience on improving inclusion, the project team added the role of respondent to encourage participation of stakeholders who are interested to engage on the said issue but might not have extensive experience in doing so. As “respondent” stakeholders are provided an opportunity to share their reflections on how the issue plays out in their context during session 1 and their reflections on the on-going to improve inclusion in other cities during session 2. This addition has provided a valuable role for participants, particularly from government, to formally participate in the dialogues even if they are newer to the topic.
- Presentation on framing key approaches: During the first dialogue, the ICD project team provided a framing of the issue from an inclusion perspective to set the stage for subsequent conversations. During the second dialogue series we have added another brief presentation at the beginning of session 2 to frame approaches to addressing the issue to share latest thinking and learnings from the field.
- Increased time for discussion, particularly for Cohort C: Many participants have requested to increased space for cross-country dialogue. As the dialogues are hosted on zoom, simultaneous translations are only available in plenary. Given this constraint, the ICD team increased the time for discussion during plenary. At the same time, for Cohort C, which is attended by regional and national level actors, discussions during session 3 were conducted entirely in the plenary discussion.

3.2. NEXT STEPS

The ICD team is now preparing for the third and last dialogue series which will focus on decent work and income. The final dialogues will be hosted in the month of July 2022. In parallel the team is also consolidating all the material into an e-learning platform and exploring partnerships with key stakeholders to improve engagement once the platform is live. Finally, alongside the third multi-stakeholder dialogues, the ICD team will commence planning for the public inclusive cities event scheduled for September 2022.

ALL COHORTS: KORE GLOBAL: APPROACHES TO IMPROVING URBAN SAFETY

Approaches to improving urban safety

Addressing gender based violence

RESPONDING to GBV

Multiple Actors

Across Sectors

Thinking about PREVENTION...

Some starting points...

Raising awareness and transforming attitudes

Engaging women, girls and the LGBTQI+ community

Targeted interventions e.g. workplace harassment

COHORT A: MERLYN SOPJAN LIVING IN THE CITIES: EXPERIENCE AND CHALLENGES OF TRANSGENDER WOMEN

**LIVING IN THE CITIES:
EXPERIENCE AND CHALLENGES
OF TRANSGENDER WOMEN**

Merlyn Sopjan
Program Manager
Indonesia Family Planning Association (PKBI)
May 12, 2022

Main challenges

The family, which is expected to be the safest and the most comfortable place, becomes the perpetrator of physical and verbal violence, so transgender women choose to leave their homes and live separately from their families at a young age.

Along with puberty, the urge and desire for self-expression as women becomes it ronger.

Bullying experienced by trans women at school and within their community makes them feel isolated, unsafe, and uncomfortable.

Vulnerabilities

Faced by transgender women who live separately from their families

- Either forced to leave their houses by their family members or leave their homes by their own choices, transgender women below 18 years old usually lack of skills and capacities to make their own living.
- Going to a big city and becoming a sex worker is considered as the only 'solution' that enables them to survive and to be independent.
- As children, transgender women are not ready to live in such a hard, unpredictable situation in the city streets.
- Conservative groups, especially religious-based community organizations, are aggressively resisting and often resort to violence.
- Not all transgender women support each other because each of them prioritize their own survival.

ACTION CONCEPTS

```

graph LR
    Problem[Problem] --> Input[Program Input/Process]
    Input --> Output[Output/Current situation]
    Output --> Outcome[Outcome]
    Outcome --> Goal[Goal]
  
```

Problem: Socially excluded Transgender Women

Program Input/Process:

- Community organization
- Family Acceptance
 - freedom of expression
 - improved living conditions
 - No oppression to be a man
 - Having no suicidal thoughts
- Fulfillment of Civil Rights
 - Ownership of legal identity card
 - Access to decent jobs
 - No risk of involvement in unlawful act
 - increased public participation
- Advocacy and services

Output/Current situation: Transgender women's well-being and independence

Outcome: Transgender women's societal living

Goal: Inclusive Society

Results and recommendations

In a period of 6 years, PKBI has succeeded in providing organizational strengthening to transgender women's organizations in 3 provinces. These transgender women's organizations now have a **legal certificate** of organisation and are registered with the Ministry of Law and Human Rights.

The continuity of the organisation is maintained even though the Padiak Program ended a year and a half ago. The organisation's programs continue to provide benefits to its members.

The family forum that was formed since the beginning of the Padiak Program in 2014 is still running. The number of families who have accepted their female transgender family members continues to grow and it succeeded in providing transgender women's family members with various knowledge, including parallel.

Inclusive Village in South Kalimantan continues to develop and can be an example of a successful pilot project that can be adopted in other areas.

Intersector activities and trainings to improve transgender women's capacities for food security still need to be improved and reformulated, because during the pandemic these activities have not been able to bring out the positive impact as expected.

LEAVE NO ONE BEHIND

1. We the sons and daughters of Indonesia, acknowledge one motherland, Indonesia.
2. We the sons and daughters of Indonesia, acknowledge to be of one nation, the nation of Indonesia.
3. We the sons and daughters of Indonesia, uphold the language of unity, Indonesian.

Why?

EMPLOYMENT

- **Unequal status** at work: despite 85% of workforce

- **Lack of voice**: due to structure & knowledge
- **Unequal pay**: 1-3\$/day < man, 2 in 5 women

- **Sexual harassment**: 33% & 32% reported from garment & construction industry respectively.
- **Perceptions & stereotypes**: occupations

HEALTH

- Low understanding of contraception can result in unplanned pregnancies
- Low levels of nutrition affect concentration and productivity
- Poor hygiene leads to sickness-related absences

SUPPLY CHAIN

- Business performance:
 - 89m.\$ lost annually
 - 56% Cambodian workers experienced at least 1 form of sexual harassment (female & male)
- Compliance & reputational risk:
 - Occupational Health & Safety
 - Buyers & brands
 - Compliance with future laws

Our TARGETS

Women and girls in **RURAL AREAS** who are from ethnic minorities denied multiple rights

Women in **URBAN AREAS** who are marginalised by occupation or denied multiple rights

PROVINCES CURRENTLY COVERED

- Phnom Penh
- Kandal
- Takeo
- Kampong Cham
- Kampong Chhnang
- Kampong Speu

Better Factories

#M

LEVI STRAUSS FOUNDATION

DIAGEO

GAP

M&S

Workers

Factories

National stakeholders

International partners

Fighting global poverty & social justice

Promoting gender equality in a number of ways:

Health & Financial Literacy

- Focused training to support women to plan their spending and manage their money effectively.
- Support to factory infirmiry staff to improve the services they provide, particularly to women of reproductive age.
- A range of activities in and around factories aimed at young women of reproductive age.
- Engagement with food vendors around factories to improve availability of nutritious, hygienic food for workers.

RESULTS

Women are making better decisions:

- Doubled use of modern contraception
✓ 48% compared to 24.2%
- More than doubled use of health services
✓ 20% compared to 8.6%
- Tripled confidence to refuse sex with a partner
✓ 50% compared to 16.8%

Factories are more competitive:

- Increased productivity
✓ 6% more workers reaching productivity targets
- Reduced absenteeism
✓ 24% less leave without permission
- Reduced turnover
✓ 7% less turnover
- Increased worker satisfaction

Sexual Harassment prevention

CARE's sexual harassment prevention tools were developed with national stakeholders and tested with factory HR managers to integrate with existing systems

Chat! Contraception

Chat! is a system, not a one-off training. It builds in-factory capacity and includes customised measurement.

RESULTS

Women feel safer @workplaces

- 24% Reduction in perceived risk of sexual harassment among workers
- Increase in understanding of what behaviours were not acceptable at work
- Reported reduction in sexually inappropriate verbal teasing by male co-workers
- Increase in women's confidence to report issues to management

Businesses are more stable

- Managers report reductions in turnover
- Safer factories perceived as a more desirable place to work
- Managers report reduction in conflict on the factory floor

Challenges of cooperation

Brands/buyers: provide clear message on Sexual Harassment compliance

Senior management of the factories: show high commitment to prevent sexual harassment and give enough space for management and workers to engage prevention activities.

COHORT A: MERLYN SOPJAN LIVING IN THE CITIES: EXPERIENCE AND CHALLENGES OF TRANSGENDER WOMEN

- International Day for the Elimination of Violence against Women**
- Women's rights activists have observed **25 November** as a day against gender-based violence since 1981.
 - 7 February 2000**, the General Assembly officially designating **25 November as the International day for the Elimination of Violence Against Women**.
 - In 2008 launch **UNITE to End Violence against Women** campaign an initiative of 16 days of activism
 - it starts on the 25 November till 10 December (International Human Rights Day)

- Penang Goes Orange' is a state-level campaign by the Penang State Government in conjunction with the worldwide campaign 16 Days of Activism to Eradicate Violence Against Women (VAW).
- It started since 2014, with PWDC being the implementation agency for the campaign.

Republic Act No. 11313: Safe Spaces Act (Bawal Bastos Law)

What does the Safe Spaces Act cover?
The law covers all forms of gender-based sexual harassment (GBSH) committed in public spaces, educational or training institutions, workplace, as well as online space.

Philippine Commission on Women

LEAD OF THE IAOCSSA

RULE IX: OVERSIGHT MECHANISM

SEC. 34 Oversight Mechanism. — An oversight body composed of agencies mandated to implement the law and its rules is hereby created to ensure the effective implementation of the law. The Philippine Commission on Women, the Department of the Interior and Local Government and the Department of Information and Communications Technology shall be co-chairs

Philippine Commission on Women

IAOCSSA Chairperson and Secretariat

following as members:

- a) Civil Service Commission;
- b) Commission on Human Rights;
- c) Department of Justice;
- d) Department of Education;
- e) Department of Labor and Employment;
- f) Department of Social Welfare and Development;
- g) Department of Health;
- h) Commission on Higher Education;
- i) Technical Education and Skills Development Authority;
- j) Land Transportation Office;
- k) Metro Manila Development Authority;
- l) Land Transportation Franchising and Regulatory Board;
- m) Philippine National Police;
- n) National Bureau of Investigation;
- o) Cybercrime Investigation and Coordinating Center; and
- p) Three (3) CSOs active on issues of gender-based violence

IAOCSSA Chairperson and Secretariat

The oversight body shall have the following functions.

- 1) Harmonize the initiatives in implementing the law and ensure that there are no overlaps in activities;
- 2) Ensure and facilitate coordination and collaboration among agencies involved;
- 3) Develop a monitoring and evaluation system including a database for all the forms of Gender-Based Sexual Harassments in the law, tools, and/or process to see whether the law is effectively being implemented;
- 4) Recommend policies, guidelines, or measures to ensure effective implementation of the law;
- 5) Develop and recommend strategies for the prevention of GBSH;
- 6) Formulate a comprehensive and integrated program to prevent and suppress GBSH;
- 7) Include other agencies and CSOs/NGOs to the oversight body as may be necessary;
- 8) Meet at least twice a year, or as often as may be necessary; and
- 9) Perform such other functions necessary to attain the purposes and objectives of the law.

ABOUT THE ASEAN AUSTRALIA SMART CITIES TRUST FUND

The ASEAN Australia Smart Cities Trust Fund (AASCTF) assists ASEAN cities in enhancing their planning systems, service delivery, and financial management by developing and testing appropriate digital urban solutions and systems. By working with cities, AASCTF facilitates their transformation to become more livable, resilient, and inclusive, while in the process identifying scalable best and next practices to be replicated across cities in Asia and the Pacific.
