What is ADB's Procurement Dashboard

A modern reporting tool on ADB Operational Procurement that

provides relevant and consistent data and analysis of ADB operational procurement; facilitates decision making

serves as “single source of truth” for internal and external procurement research in ADB operations

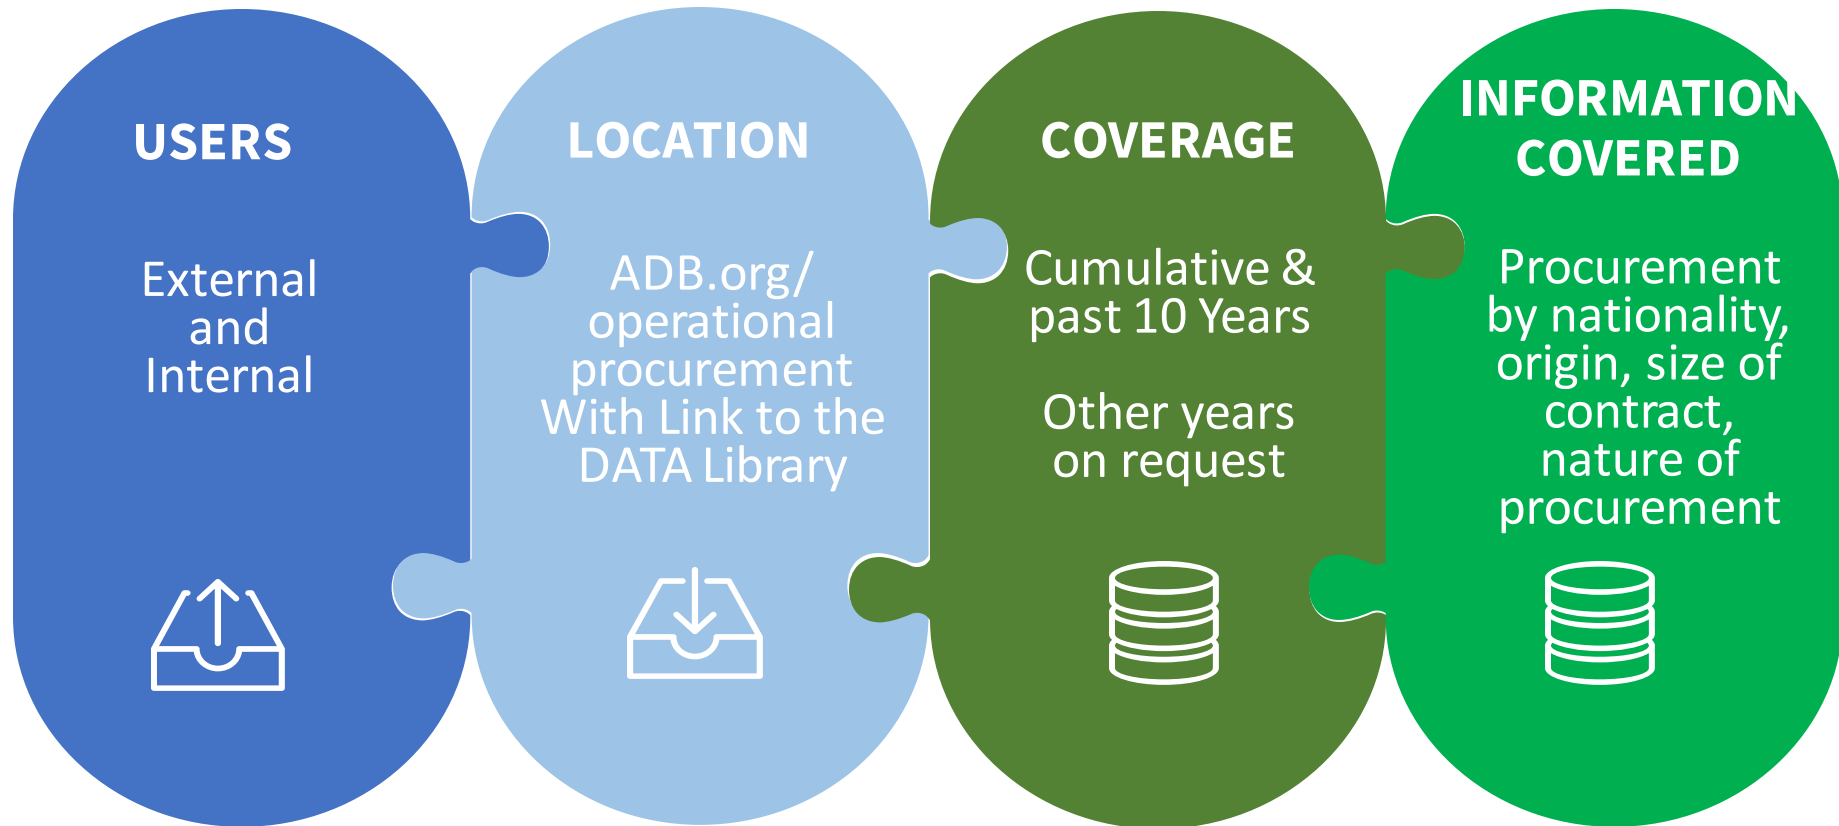

promotes transparency and accountability of ADB operations

contributes to business efficiency by negating the need for separate tools, data reconciliation, and streamlining the preparation and dissemination of reports.

Operations Procurement

The Procurement, Portfolio and Financial Management Department (PPFD) provides fiduciary oversight of procurement of goods, works, non-consulting and consulting services. PPFD supports ADB staff and borrowers on procurement planning and implementation, contract management, and related risk assessment and mitigation throughout the project life cycle. It also leads procurement and consulting services innovation and capacity building initiatives.

Goods, Works, and Non-Consulting Services

ADB extends loans and provides technical assistance to its developing member countries for a broad range of development projects and programs involving the procurement of goods, works, and services.

Consulting Services

ADB engages individual consultants and consulting entities to provide expert advice such as in contract preparation and project supervision, and to help ADB to prepare studies, appraisals, and reports.

Procurement Dashboard

Operational Procurement Statistics Dashboard (ProcDash)

Asian Development Bank Public sector governance

Welcome to ADB's Operational Procurement Statistics Dashboard (ProcDash)

The Operational Procurement Statistics Dashboard (ProcDash) presents the value of all goods, works and consulting services contracts awarded for projects under the Asian Development Bank operations. It has four sections, namely, overview, operational procurement by nationality, operational procurement by origin of goods and services, and operational procurement by threshold. For purposes of this dashboard, **value of operational procurement is reported in terms of the amount financed by ADB.**

The overview section presented below shows data on operational procurement statistics by region, nature, sector and by borrowing country. Data can be further filtered by contract year and modality. To determine the allocated procurement for policy-based support and results-based lending, click these two items in the modality filter.

For other details about ProcDash, refer to [ProcDash FAQ](#).

ProcDash can also be used to supplement the operational procurement statistics under the Operational Data section of the ADB [Annual Report](#) and the figures from the member Fact Sheets. More information on operational procurement contracts is available on the [Tenders](#) page of ADB's website (*choose "Contracts Awarded" from the "Type" selection*).

The ProcDash currently shows data as of 30 June 2023. This will be updated every month.

ADB.org

Operational Procurement Database (2013 - 2023)

Asian Development Bank

The operational procurement database covers the list of goods, works, and consulting services contracts awarded for projects approved by the Bank for the past 10 years. It aims to promote transparency in ADB procurement and facilitate both internal and external procurement research in ADB operations by providing users the capability to download the data in raw data form in line with ADB's access to information policy.

The database currently shows data as of 30 June 2023.

Data and Resources

Procurement by Nationality, 2013 - 2023 (XLSX)

Procurement by nationality presents the list of all goods, works and consulting services contracts awarded by nationality of the contractors, suppliers and consultants. Nationality corresponds to the place of incorporation or the location of the head office (center of administration) of the contractor. In the case where the supplier/contractor is a subsidiary of an international corporation, the subsidiary's place of incorporation should be used to determine the nationality of the contractor which should still be an ADB member, unless a waiver to procure from non-members has been secured. For consulting services, the home office of the consulting firm would be the country of procurement of the services. In case of a joint venture, the nationality of the lead firm representing the joint venture or associations serves as the nationality. In case of an individual, the nationality is as indicated in the passport and the consultant registration.

Procurement by Origin of Goods and Services, 2013 - 2023 (XLSX)

Procurement by origin presents the details of procurement by origin of goods and services. Origin of goods is the place where the goods have been mined, grown, cultivated produced, manufactured, or processed (or through manufacture, processing, or assembly, another commercially recognized article results that differs substantially in its basic characteristics from its imported components). In case of works, consulting and other services, it is the nationality, or the place of incorporation, of the service provider. The origin should also be an ADB member.
