ENVIRONMENTAL & SOCIAL (ES)

RISK MANAGEMENT

- Bank supports infrastructure development US\$114 billion globally which includes a significant volume of civil works contracts
- Multiple global initiatives and organizations emphasize sustainable infrastructure with very similar approaches
- Bank has developed specific policies to manage Environmental and Social (ES) risks, with additional requirements for large civil works
- Such risks include:
 - resettlement
 - labor force influx
 - community health and safety
 - occupational accidents
 - environmental protection
 - sexual exploitation and abuse (SEA) and sexual harassment (SH)

ENVIRONMENTAL & SOCIAL (ES)

RISK MANAGEMENT

- Bank's ES policies are a cornerstone of the World Bank's approach to ensure strong protections for people and for the environment
- Bank's policies require ES risks to be assessed and addressed through specific ES instruments (e.g., Environmental and Social Management Plans)
- Many ES risks must be managed by the contractor building the infrastructure so the Bank has integrated ES considerations throughout the procurement process e.g.:
 - specification and KPIs
 - contractor's Code of Conduct
 - ES reporting contractors ESMPs regularly updated
 - contract variations to address ES risks
 - - role of engineer to oversee implementation
 - contractual remedies

PROTECTING VULNERABLE COMMUNITIES SEXUAL EXPLOITATION AND ABUSE/SEXUAL HARASSMENT (SEA/SH)

- Gender-based Violence (GBV):
 - affects 1 in 3 women in their lifetime
 - entails significant social and economic costs estimated at 3.7% GDP
- SEA/SH incidents have occurred in Bank financed projects perpetrated by contractors' personnel against community members
- The Bank's new SEA/SH measures apply to large Works contracts classified as high-risk SEA/SH
- New Bank remedy 2 years: "disqualification" for non-compliance with GBV obligations; after which strengthened qualifications must be demonstrated
