Facts

Some Indonesian cities have been informed and socialized about the climate funds

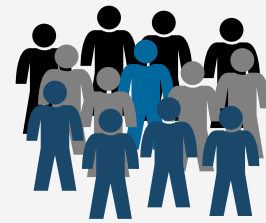

Several Indonesian cities are able to access the climate funds

Limited capacities

Complicated procedure

Local head periode

How to leverage

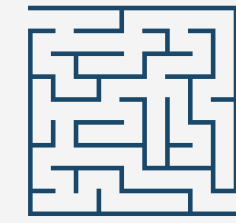

In-dept socialization to all regions massively

Assistance the regions until they are able to prepare procedures correctly.

Climate finance helpdesk for local governments

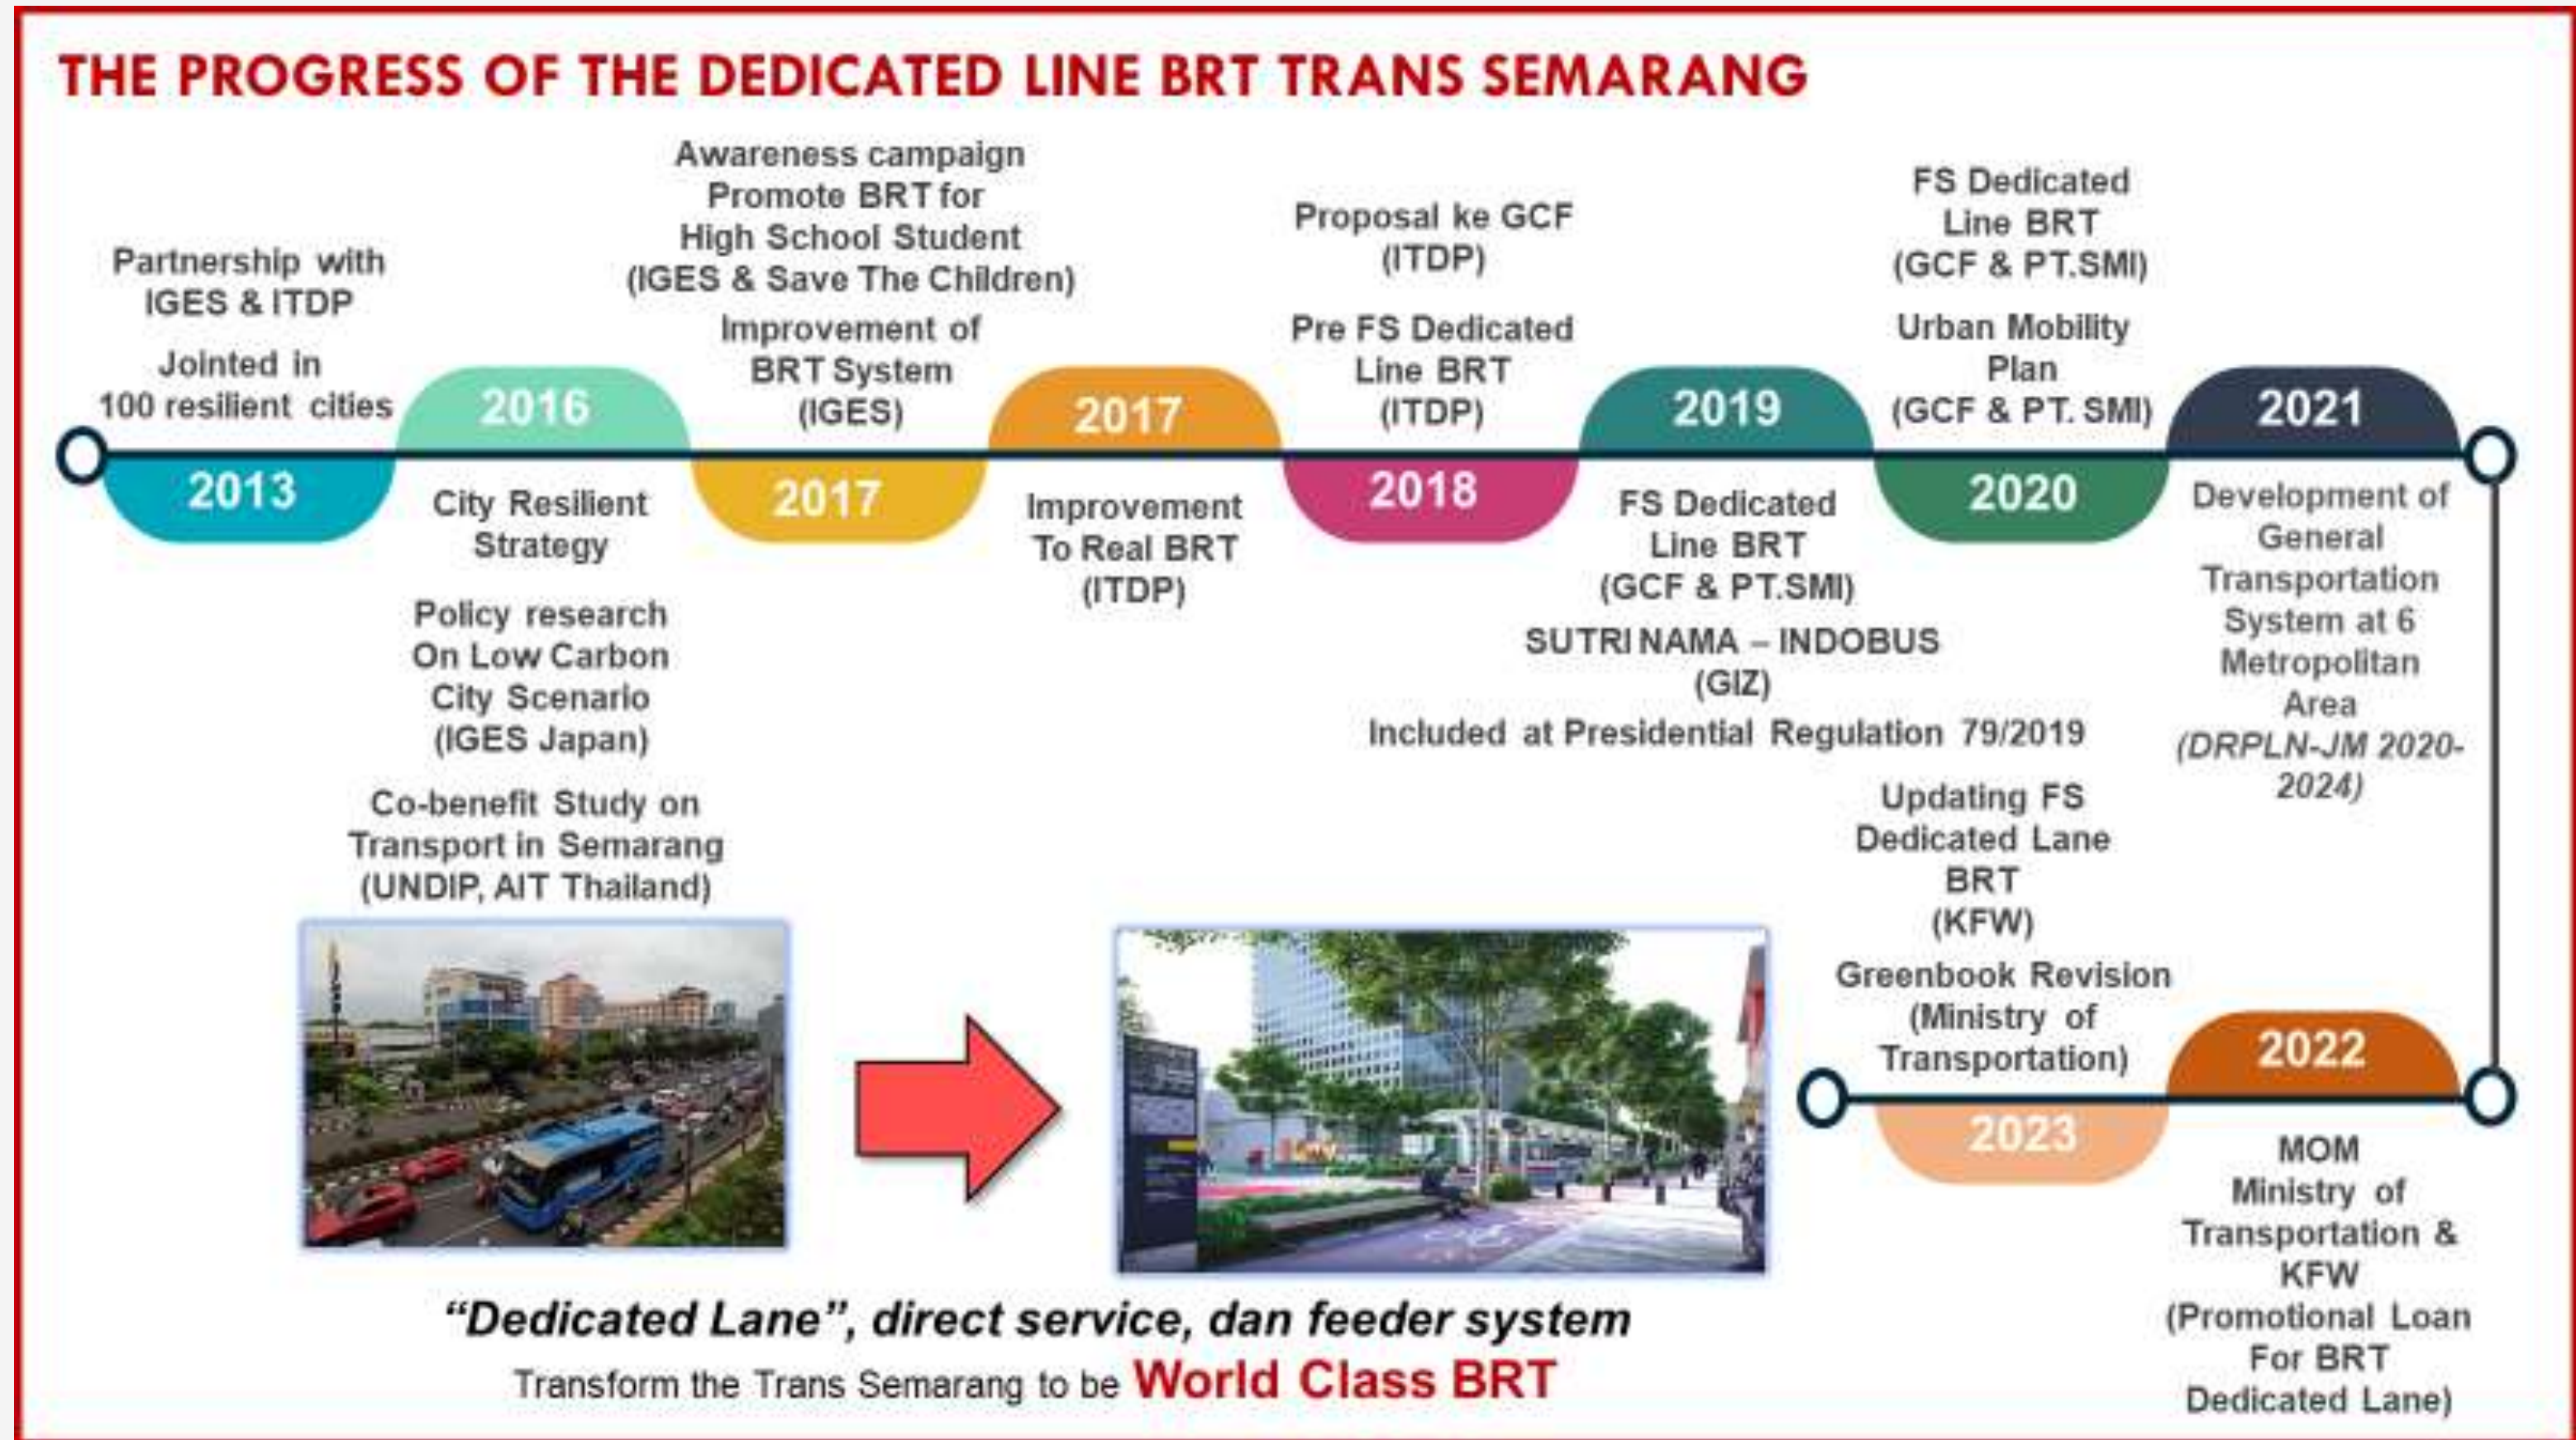

Simplify the procedures

Experiences

Development of an integrated and sustainable Bus Rapid Transit (BRT) system in Semarang City, supported by several international institutions.

Experiences

Jakarta is collaborating with Bloomberg Philanthropies and Vital Strategies in overcoming air pollution from 2019 to 2021.

Bloomberg Philanthropies and Vital Strategies is one of the Non-Government Organizations (NGOs) which is engaged in overcoming the problem of funding urban development, the environment and also health.

The aim of cooperation to increase government and public awareness of air pollution as a critical public health problem, reduce PM2.5 pollution and increase transparency about air pollution problems.

| Infrasructure Development | Inovation Support | Community Communication Strategy | Technical Assistance & Training | Research & Monev |
|--|--|---|-----------------------------------|--|
| Development of Air Quality Monitoring Stations | Guidance for innovation and action to tackle air pollution | Launched the site https://jakarta.cleannair.id/ as a forum to provide evidence-based information to the people of Jakarta | Technical assistance | Research: academics from ITB by installing air quality monitoring devices installed at several points |
| Air Quality Standards | Trial installation of air quality monitoring stations | about sources, impacts and solutions to air pollution | Training | Monitoring air quality that occurs during the dry season and rainy season to see developments in air quality |
| Development of an Air Pollution Standard Index | Testing in several areas to find out the causes of air pollution | | | Evaluation |
| | Lesson learned other cities in other countries | | Source: Shusein and Papalia, 2023 | |

Platform or Network

APEKSI has a Climate Change Working Group which annually holds a Knowledge Management Forum (KMF). KMF is a forum to share the cities's experiences, with various parties, discussing and compiling recommendations which are then discussed/dialogued with the government.
