

Regional Workshop on Climate and Disaster Risk-Informed Investments

Session 1.2 Risk information for investing in a resilient future for Asia and the Pacific

22 June 2023

Climate and disaster risk in Asia and the Pacific is...

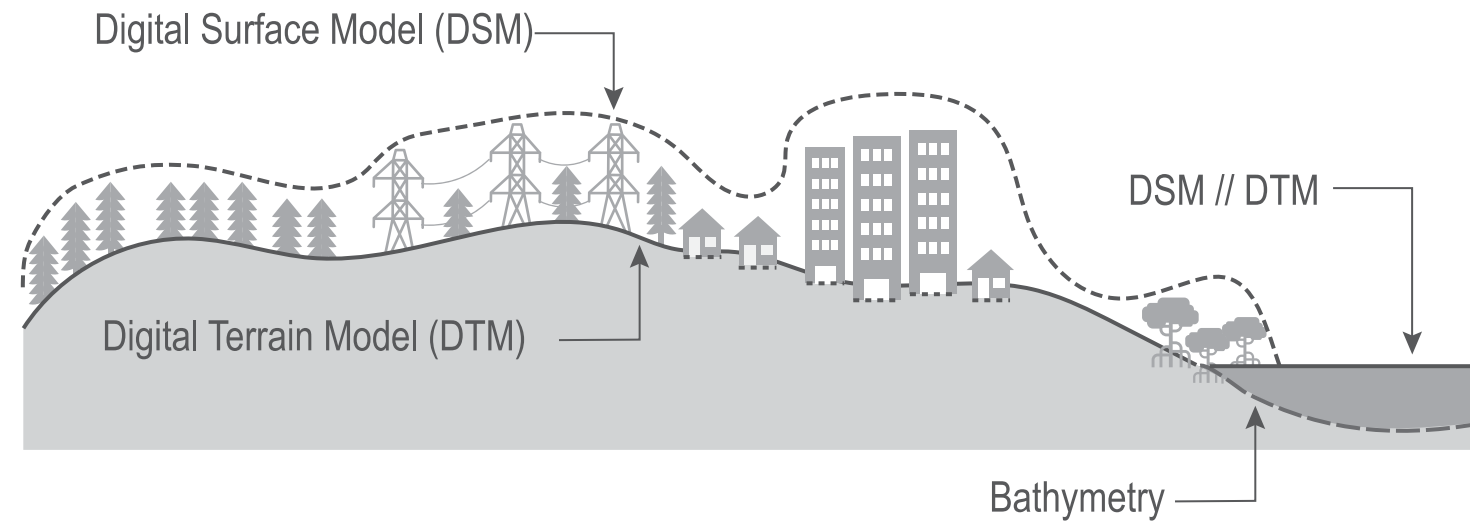

**Good
decisions
require good
information.**

For example...

digital elevation model

Poll

www.mentimeter.com Code 5265 8243

Climate and disaster risk data is **MOST useful** for...

- National policy/strategy
- Spatial planning
- Investment planning & budgeting
- Emergency preparedness
- Financial regulation
- Project design
- All of the above

CLIMATE DATA PROBLEMS

THERE ARE **2 MAIN ISSUES**
WITH CLIMATE DATA FROM THE
END USER'S PERSPECTIVE :

← ACCESSIBILITY

+

RELIABILITY →

END USERS DON'T KNOW
WHICH DATA TO USE,
OR WHERE TO FIND IT

Session overview

Climate and natural hazard risk data types

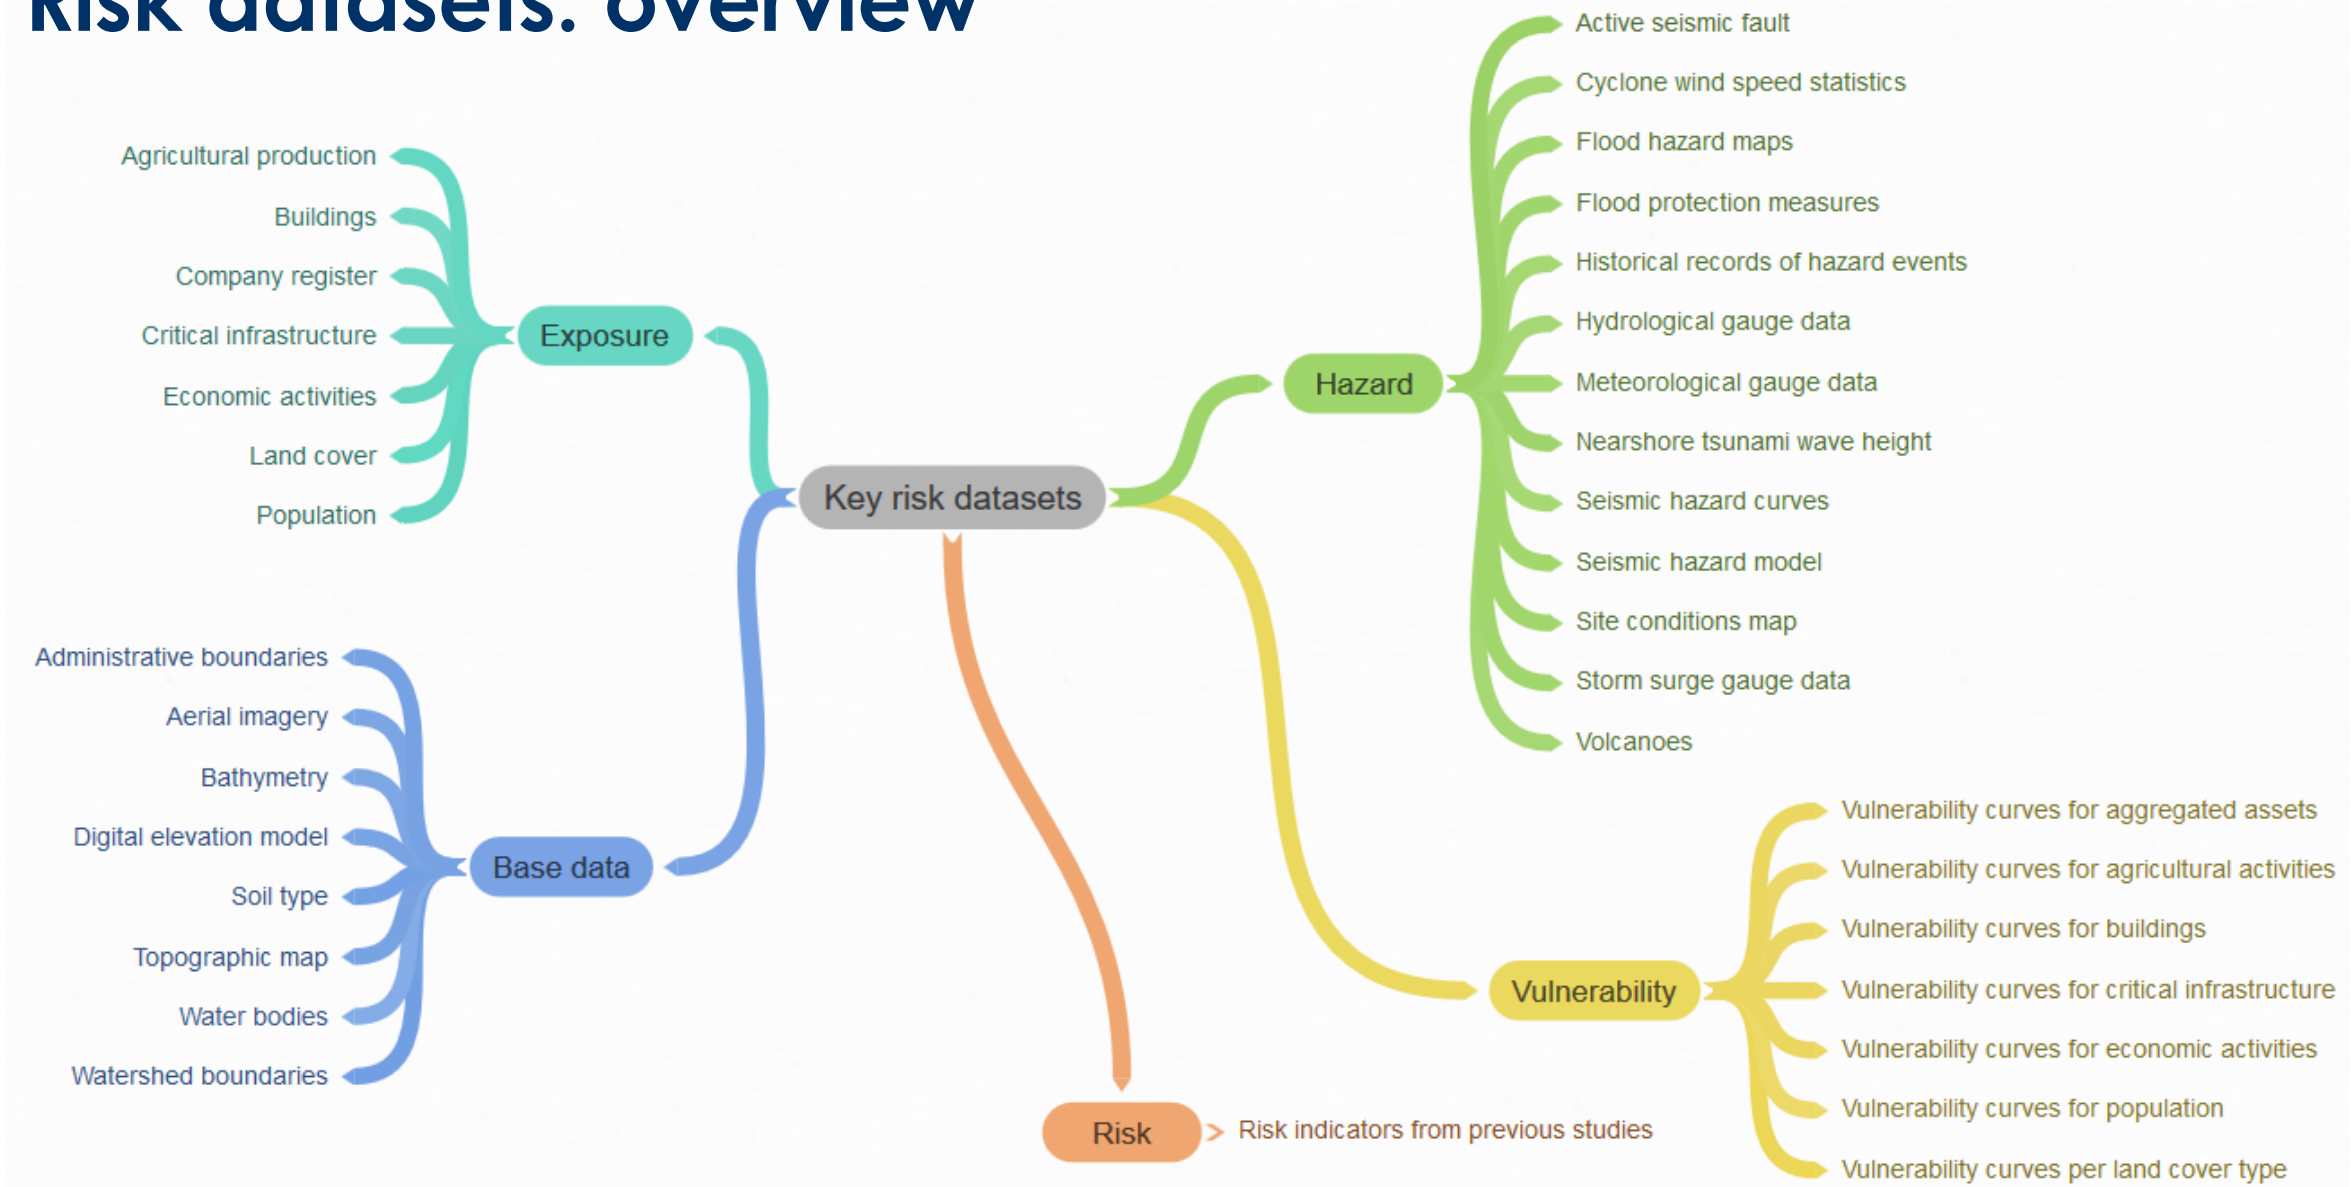

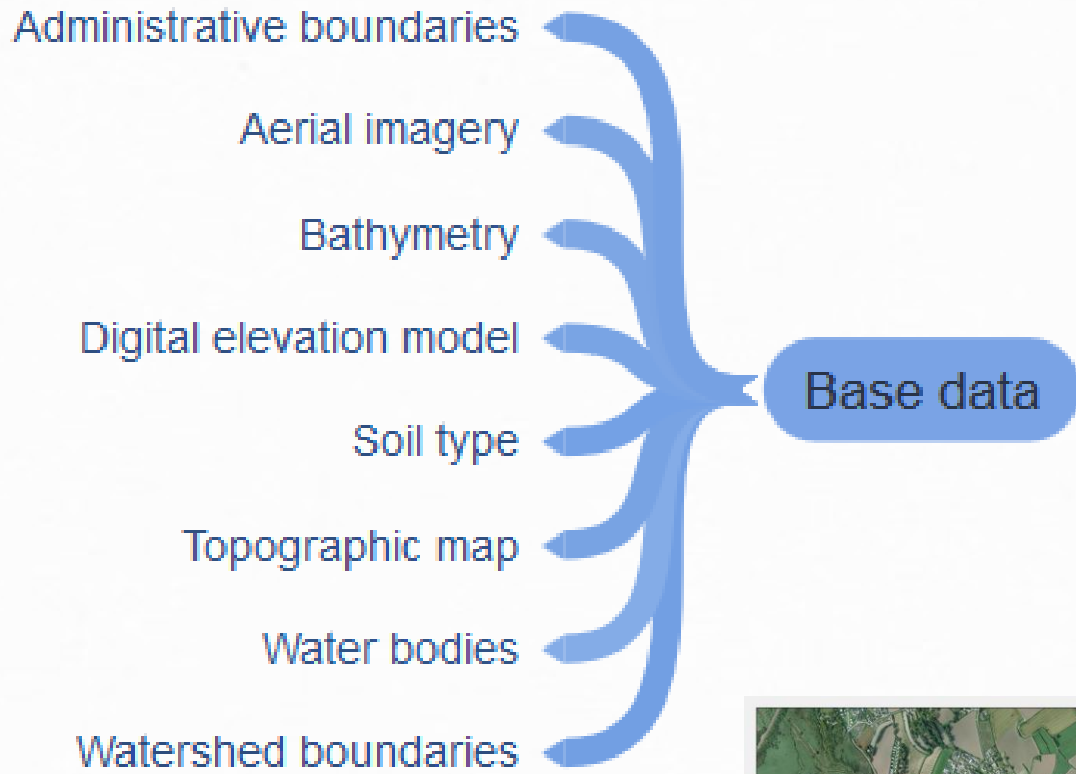

Opportunities for strengthening national risk data

Climate data activity

Risk datasets: overview

Agricultural production

Buildings

Fathom's Flood Hazard Data & Maps

Fathom's datasets solve some of the greatest challenges facing flood mapping and hydrology

Global Flood Map
Global flood mapping from the cutting edge of scientific research.

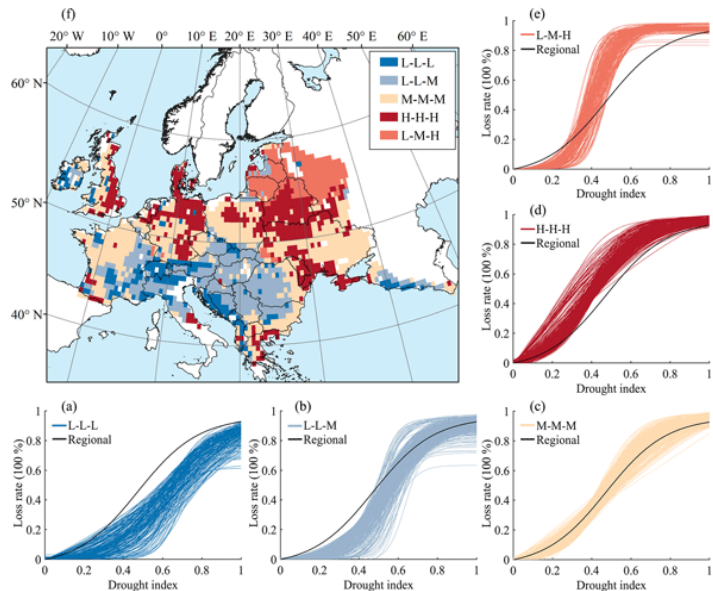

UK Flood Map
Comprehensive flood modelling for the whole of the United Kingdom.

US Flood Map
A par... flood

Appendix D – Vulnerability ratings

Table 1 presents the vulnerability ratings of project sectors based on expert judgment and a review of the engineering literature

Table 1 Vulnerability ratings of project sectors (based on expert judgment and a review of the engineering literature)

Sector ⁹	Geophysical hazard			Climate hazard						Climate-related long-term changes	
	Earthquake	Seismic induced landslide	Volcanic activity	Flood	Tropical Cyclones / Strong winds	Drought	Wildfire	Rainfall-induced landslide	Heat wave	Mean surface temperature	Water scarcity
Food security (agricultural production)	2	1	2	3	3	3	3	1	3	3	3
Housing	3	3	3	2	2	2	2	3	2	2	2
Road transport	3	3	3	3	2	1	1	3	2	2	1

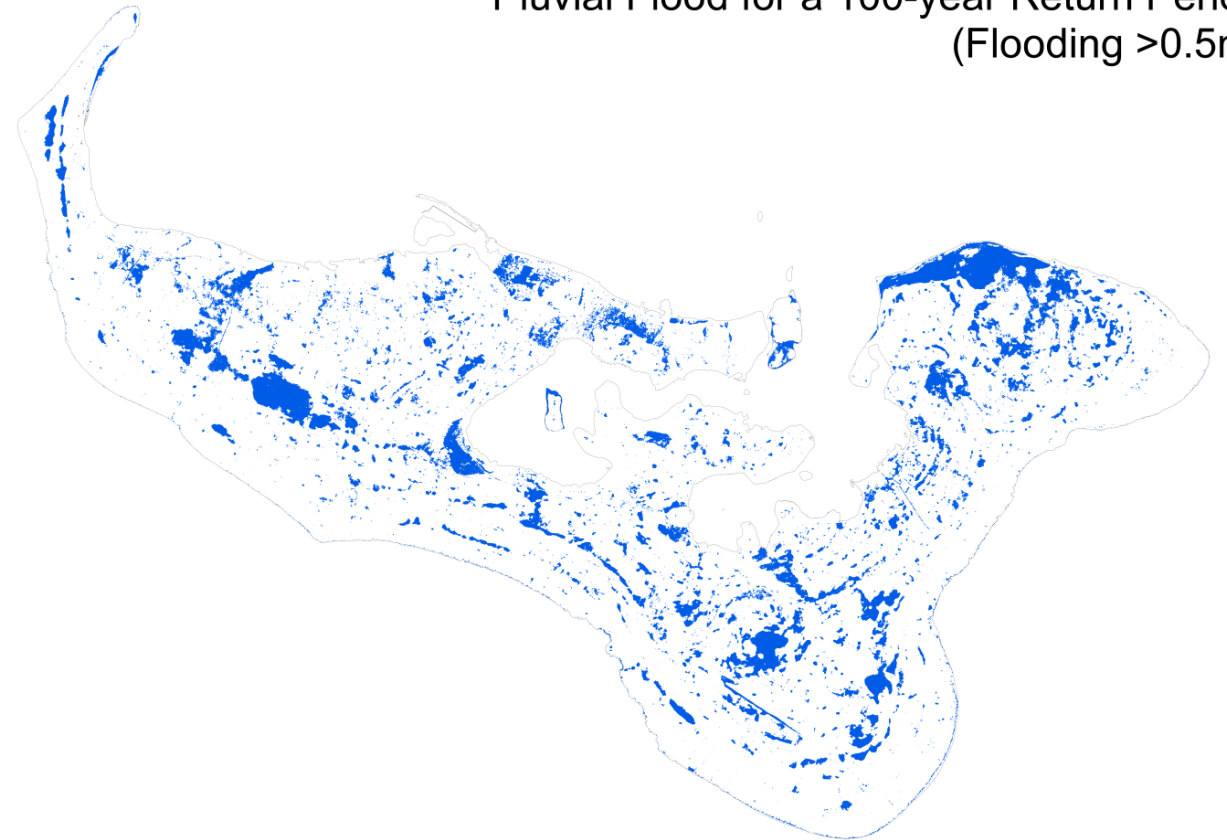

Risk metrics

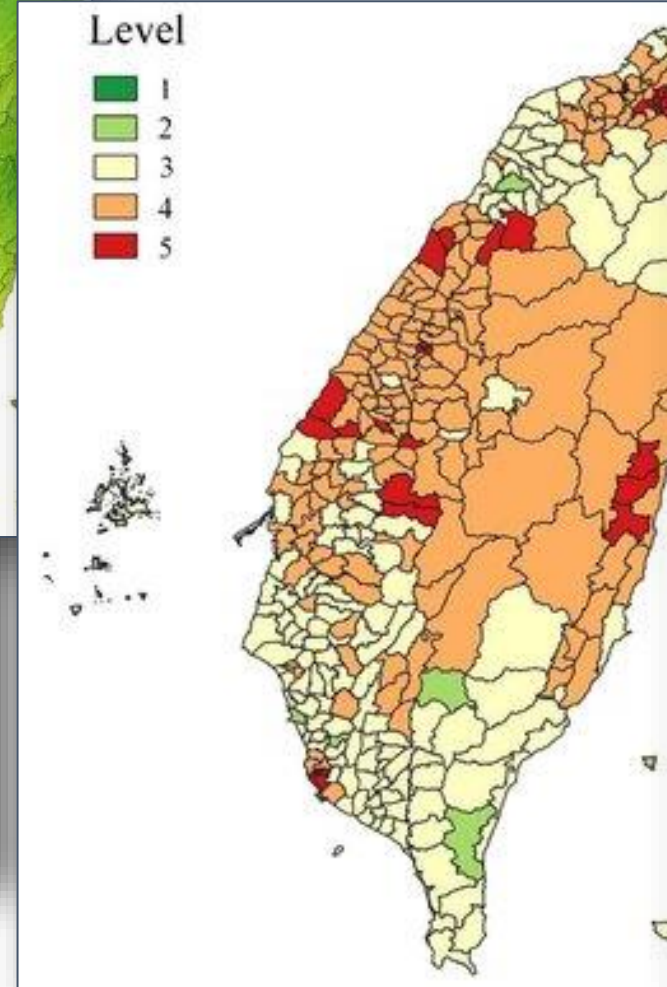

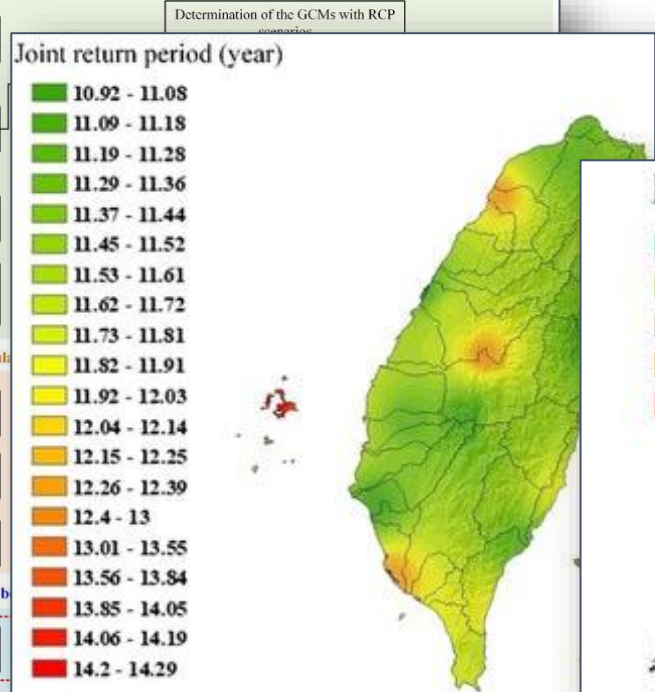

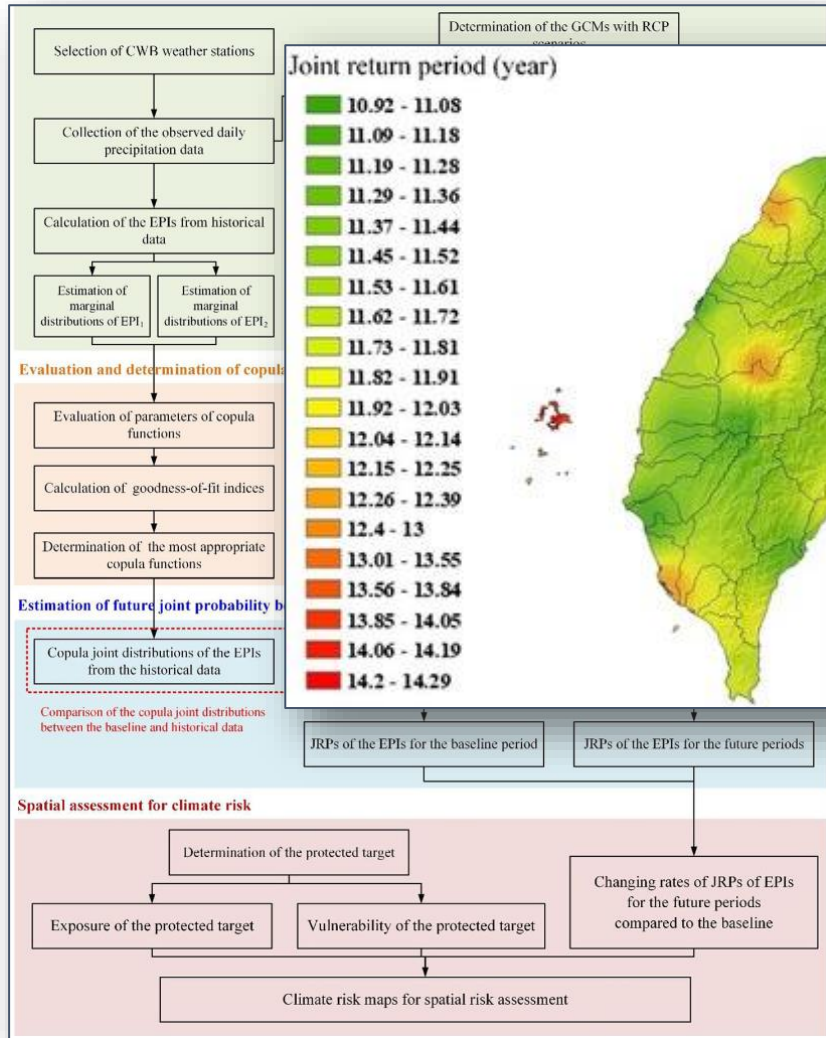

Risk

> Risk indicators from previous studies

Pluvial Flood for a 100-year Return Period
(Flooding >0.5m)

Risk Information: Qualitative vs Quantitative

(a) Assessment matrix for exposure and vulnerability

Assessment matrix for exposure and vulnerability		Level of vulnerability				
		Very high	High	Moderate	Low	Very low
Level of exposure	Very high	Very high	Very high	High	High	Moderate
	High	Very high	High	Moderate	Moderate	Low
	Moderate	High	Moderate	Moderate	Moderate	Low
	Low	High	Moderate	Moderate	Low	Very low
	Very low	Moderate	Low	Low	Very low	Very low

(b) Risk Assessment Matrix

Risk Assessment Matrix		Level of exposure and vulnerability				
		Very high	High	Moderate	Low	Very low
Level of hazard	Very high	Severe	Severe	Significant	Significant	Moderate
	High	Severe	Significant	Moderate	Moderate	Minor
	Moderate	Significant	Moderate	Moderate	Moderate	Minor
	Low	Significant	Moderate	Moderate	Minor	Negligible
	Very low	Moderate	Minor	Minor	Negligible	Negligible

**Endorsing &
downscaling**

**Data
generation**

**Improving
data
management**

**Translation &
communication**

**Guidance &
capacity
building**

**Resource
pooling**

Poll

www.mentimeter.com Code 5265 8243

What is the biggest **climate/natural hazard data gap** that you currently face?

- **Base data** (e.g., digital elevation model)
- **Exposure data** (e.g., assets, economic activity)
- **Hazard data** (e.g., climate/seismic models)
- **Vulnerability data** (e.g., social wellbeing, asset condition)

Poll

www.mentimeter.com Code 5265 8243

Which area is the greatest priority for your institution now?

- Endorsing & downscaling regional datasets
- Data generation
- Strengthening data management
- Translation & communication
- Guidance & capacity building
- Resource pooling

Role of the private sector

EM-DAT: DISASTERS OF THE WEEK

Week 20-2023: May 15 - May 21

Natural disasters:

- 2023-0293 Floods; Emilia-Romagna Region, Italy
- 2023-0296 Severe weather; Phichit Province, Thailand
- 2023-0297 Severe weather; Mongolia
- 2023-0298 Wildfires; Cáceres Province, Spain
- 2023-0300 Typhoon 'Mawar'; Guam
- 2023-0319 Floods; Gracac Municipality (Zadar County), Croatia
- 2023-0320 Volcano Popocatepetl eruption; Mexico
- 2023-0321 Floods; Bosnia and Herzegovina

Technological disasters:

- 2023-0310 Stampede at the entry of Cuscatlan stadium , San Salvador, El Salvador
- 2023-0311 Shipwreck; Nsanje, Malawi

Who can access Sentinel data and how?

A free, full and open data policy has been adopted by the EU for the Copernicus programme, which foresees access by all users to the Sentinels core products. Outlined below are the main data access portals, however there are a number of others available that are not mentioned. As a participant of the Copernicus Masters, you

Climate Risk Country Profiles

REPORTS | 18 NOV 2021

Climate Risk Country Profile: Timor-Leste

This publication synthesizes climate characteristics and projections, vulnerability to natural hazards, sectoral climate change impacts, and adaptation priorities in Timor-Leste.

REPORTS | 29 SEP 2021

Climate Risk Country Profile: Uzbekistan

This publication synthesizes climate characteristics and projections, vulnerability to natural hazards, sectoral climate change impacts, and adaptation priorities in Uzbekistan.

REPORTS | 29 SEP 2021

Climate Risk Country Profile: Tajikistan

This publication synthesizes climate characteristics and projections, vulnerability to natural hazards, sectoral climate change impacts, and adaptation priorities in Tajikistan.
