Digital X ADB
A New Era of Digital – Envisioning a Future with Artificial Intelligence
ADB HQ, Manila, Philippines, September 24-26, 2024

Presentation on Session 5

Navigating the Ethical Use and Governance of AI
Building Responsible AI Ecosystems in the Asia Pacific Region

Peter Brimble

Board Director, AI Asia Pacific Institute

peter.brimble@aiasiapacific.org

AI ASIA PACIFIC INSTITUTE

Building Responsible AI Ecosystems in the Asia-Pacific - 1

Calling for a holistic approach balancing innovation, ethics, and inclusivity

AI ASIA PACIFIC
I N S T I T U T E

Establish Clear AI Governance Frameworks - comprehensive regulations that address AI ethics, data privacy, and accountability and ensure transparency, minimize bias, and protect user data.

Promote Ethical AI Development – incentives for AI systems that prioritize fairness, transparency, and inclusivity. Enforcing audits and ethical standards for AI deployment in critical areas such as healthcare, finance, and education.

Ensure Inclusive and Equitable AI Deployment – making AI technologies accessible to all, particularly underserved and rural populations. Investing in digital infrastructure and AI tools in key sectors to enable development across the board.

Establish AI Accountability Mechanisms - implement mechanisms for AI accountability and ethical standards, such as AI ethics boards, independent oversight bodies, and regulatory sandboxes.

Generative AI and its rapid development influences all elements!

Building Responsible AI Ecosystems in the Asia-Pacific - 2

Calling for AI Technical Assistance Facilities to Facilitate Institutional and Regulatory Foundations

AI ASIA PACIFIC
INSTITUTE

Stimulate Public-Private Collaboration - Foster partnerships between governments, tech companies, academic institutions, and civil society to drive innovation while maintaining ethical considerations.

Focus on Education and Workforce Development - Invest in ethical AI education, digital literacy, and reskilling programs to ensure economic inclusion and address potential job displacement caused by automation.

Encourage Cross-border Cooperation - the Asia-Pacific region should collaborate on AI governance to develop standardized practices and frameworks, sharing research and harmonizing data protection laws.

Invest in Sustainable AI - encourage AI innovations that align with the UN Sustainable Development Goals (SDGs) and address environmental challenges like climate change, resource management, and energy efficiency.
The AI Asia Pacific Institute – Our Mission
Facilitating the Responsible Development and Adoption of AI

The AI Asia Pacific Institute (AIAPI) is a global nonprofit organization committed to strengthening the Asia-Pacific economies by facilitating the responsible development and adoption of artificial intelligence.

The AIAPI serves as an independent catalyst, uniting stakeholders to guide AI's responsible development through interdisciplinary research, awareness raising, international collaboration, and policy advisory activities.

Thank you!
