years

140+
founders

150+
startups

100+
meetups

50+
collaboration

A band of curated, Bandung-based founders of Tech-Startup companies, ecosystem players and stakeholders with proven track record and impact to the world.

Startup Bandung Community gives opportunity for founders to expand their network, share and contribute to the society in a higher scale with the power of collective cooperation among its members.

Founded in 2014 as a small WhatsApp group of passionate startup founders, Startup Bandung has grown into a vibrant community of over 100 startups, spanning sectors from AI to biotech. Our members include entrepreneurs, mentors, academics, investors, and ecosystem players, fostering rich collaboration and mutual support.

With global achievements — from winning pitch battles to headlining major conferences and awards — many of our members have become industry leaders. Despite our success, we remain a close-knit group, supporting each other through the challenges of building startups while contributing to local and global tech ecosystems.

Highlighted Members' Impact

The first aquaculture unicorn in the world
