ADB

Solving Complex
Challenges Together

A brief about ADB

- Founded in 1966, HQ in Philippines
- 69 members
- 50 regional & 19 non-regional
- 42 borrowing members

To support its clients, ADB works with:

- Private sector
- NGOs and CSOs
- Foundations
- Academia & think tanks
- Donors & international organizations

Main instruments: loans/grants, technical assistance, equity and guarantees

Delivered through: ADB's own resources (ordinary; concessional; special funds) and cofinancing

Largest borrowers in 2024: India, PR China, Bangladesh, Philippines, Pakistan

Strategy 2030: Seven Operational Priorities

Addressing remaining poverty and reducing inequalities

Accelerating progress in gender equality

At least 75% of committed operations by 2030

Tackling climate change, building climate and disaster resilience, and enhancing environmental sustainability

At least 75% of committed operations by 2030, \$80 billion from own resources from 2019–2030

Making cities more livable

Promoting rural development and food security

Strengthening governance and institutional capacity

Fostering regional cooperation and integration

Key Approaches

Expanding private sector operations

1/3 of ADB operations by 2024

Catalyzing and mobilizing financial resources for development

\$1 in private sector operations financing matched by \$2.50 of cofinancing

Strengthening knowledge services

<https://www.adb.org/documents/strategy-2030-prosperous-inclusive-resilient-sustainable-asia-pacific>

Active Committed Portfolio Snapshot

Sovereign and Nonsovereign (as of 31 December 2025, \$ billion)

() = negative, ADF = Asian Development Fund, COL = Concessional Ordinary Capital Resources Lending, OCR = Ordinary Capital Resources, TASF = Technical Assistance Special Fund, OSF = Other Special Funds.

Notes:

Figures may not sum precisely because of rounding. Nonsovereign closures include prepayments, repayment, valuations, disposal of equity investments, and expired guarantees.

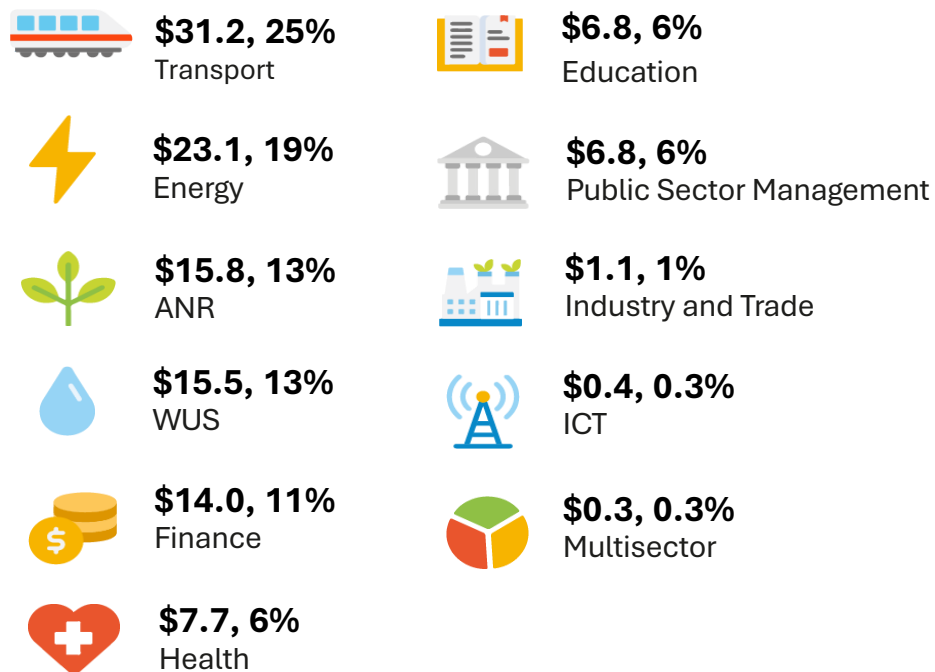

^a Closures in sovereign refer to projects that had reached end of implementation period, i.e., financial transactions from the loan account were finalized. Nonsovereign closures include prepayments, scheduled repayments, divestments, and disposal of equity investments. Closures include reduction in guarantees. ^b Year-end balance includes fair value adjustments.

US\$40 Billion For food Systems Transformation over 2022-2030

Long-Term Food Security Future of Agriculture

ADB expands support to food systems transformation

ADB announced plans to expand its initial support of \$14 billion to food and nutrition security to \$40 billion over 2022-2030. ADB will mobilize an additional \$26 billion for 2025-2030—\$18.5 billion in direct ADB support for governments, and \$7.5 billion in private sector investments.

The assistance will fund a comprehensive program for food systems transformation to help Asia and the Pacific generate diverse and nutritious food, create jobs, reduce environmental impacts, and promote resilient agricultural supply chains. This fund will also support food systems projects that protect, restore, and manage natural capital sustainably across ADB's developing members.

Solving Complex Challenges Together

Procurement Directive for ADB Borrowers: What's Changed?

Key Updates Effective 1 January 2026

Objectives

Promote Innovation and Enhance Supplier Base

Early market engagement, collaborative forms of contracting.

Improve Quality and Value for Money

Merit point criteria on internationally advertised works, nonconsulting services and specific goods contracts.

Reward Sustainable Procurement

Focus on environmental, social, economic & institutional considerations.

Foster Economic Growth and Local Development

Local labor requirement on internationally advertised works contracts.

Main Changes

Early Market Engagement

Engaging the market before bidding to refine specs, attract bidders, and improve outcomes.

Merit Point Criteria

Evaluating bids on technical merit and cost to reward quality and innovation.

Local Participation

Requiring local labor on internationally advertised works to drive job creation and skills development.

Contract Management

Ensuring contracts of substantial/high risk and high value are actively monitored through contract management plans.

Sustainable Procurement

Embedding environmental, social, institutional and economic factors into procurement decisions, with up to 25% of the MPC technical score allocated to sustainability.

Main Changes (cont.)

Prequalification

Structured by default as a form of shortlisting, allowing the borrower to limit the firms invited to bid based on objective and transparent criteria.

Collaborative Contracting

Partnering with contractors and consultants to share risks, rewards, and expertise. May provide benefits on high risk/value contracts.

Financial Intermediation

Channeling funds to target sub-borrowers through local financial institutions rather than lending directly.

Contract Modifications

ADB prior review is required for time extensions affecting completion, material scope changes, price variations $\geq 15\%$, and contract termination.

Beneficial Ownership

Winners of internationally advertised contracts must disclose the natural person(s) who ultimately own or control the entity.

Early Market Engagement

Required for internationally advertised contracts to advance market readiness, competition and transparency.

- **Refines specifications, cost estimates, and timelines**
by gathering intelligence on industry trends, pricing, and solutions.
- **Enables suppliers**
to introduce innovative solutions, enhancing sustainability.
- **Conducted early in the cycle**
by project teams and procurement specialists during preparation and design phases, before bidding.
- **Produces critical outputs**
such as market assessments, risk analyses, and procurement strategies, informing project design and bidding to reduce uncertainties.
- **Links with Strategic Procurement Planning (SPP)**
by validating market assumptions, identifying challenges, and aligning procurement with project goals.

Types of Early Market Engagement

Market Dialogues

- **Market sounding sessions:** Discussions with suppliers to gauge interest, capabilities, and market conditions.
- **Feedback on specifications:** Input from industry experts on draft technical specifications and performance requirements.

Information Tools

- **Advance contracting notices:** Early notifications about upcoming procurement opportunities to alert the market.
- **Request for information (RFI):** Requests for market data and capabilities, without commitment to procurement.

Collaborative Platforms

- **Webinars and virtual briefings:** Online sessions to share project info and engage global suppliers.
- **Innovation calls and challenges:** Programs to solicit novel solutions for specific development challenges.

Site Visits and Demonstrations

- **Factory visits:** Inspections of production facilities to assess manufacturing capabilities and quality control.
- **Product demonstrations:** Suppliers showcasing products or solutions to illustrate functionality and effectiveness.

One-on-One Supplier Meetings

- **Bilateral meetings:** Discussions with individual suppliers to address questions or clarify capabilities.
- **Supplier capability assessments:** Reviews of individual supplier's technical, financial, and managerial capacity.

Local Participation

Required for internationally advertised works contracts to advance job creation, skills development and economic growth.

Investing in local labor

Strengthens community ownership and support, empowering people to lead and sustain development efforts beyond the project.

Reduces poverty and improves local livelihoods by fostering inclusive, resilient, and sustainable economic opportunities.

Builds local capacity and partnerships by developing community skills and promoting inclusive collaboration.

Local Participation: Key Requirements

Qualification Criteria

- Half of the workforce shall be local labor.
- Lower threshold permitted in certain situations, if justified in SPP report.
- Calculation by person-days of inputs under the contract.

Evaluation Criteria

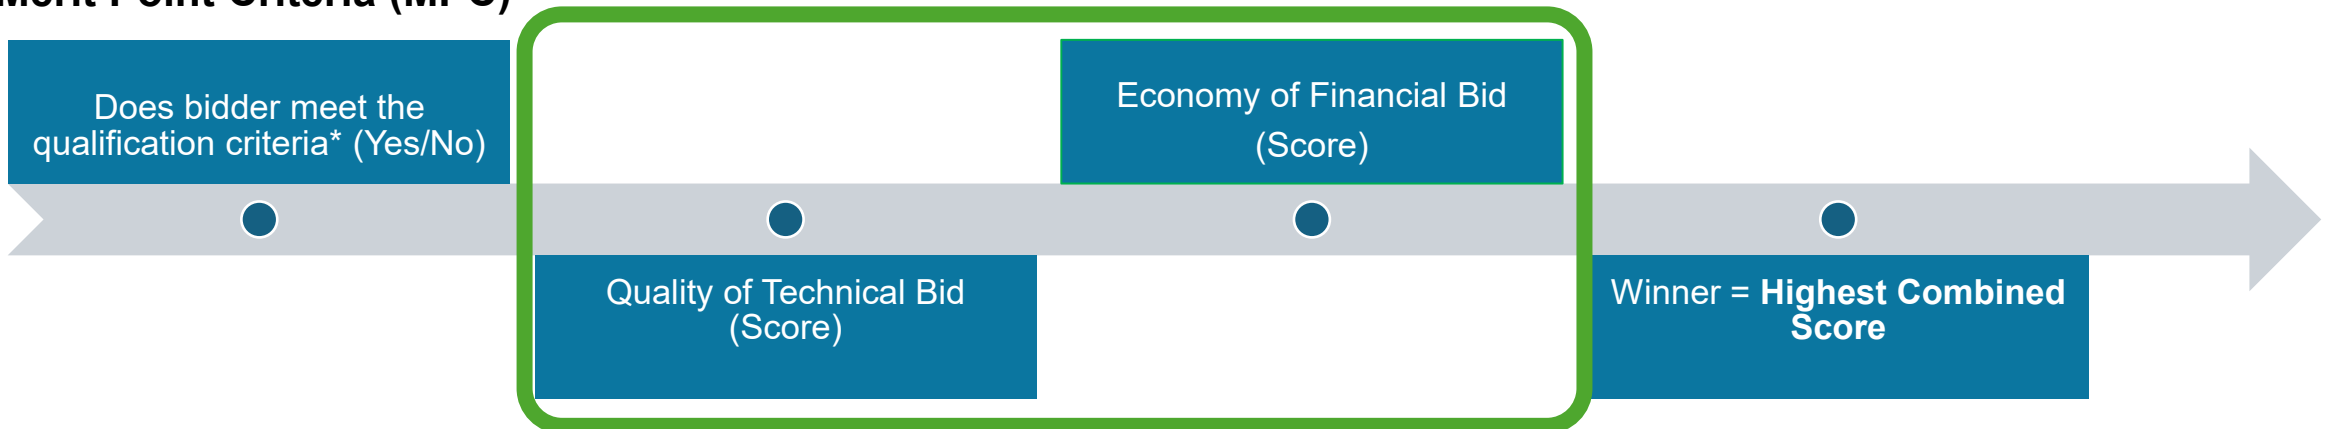

- Borrowers may give MPC scoring benefits to contractors exceeding the minimum local participation requirement.
- MPC can also support other local participation objectives.

ADB's Evaluation Methods

Lowest Evaluated Substantially Responsive Bid (LESRB)

Merit Point Criteria (MPC)

**Includes eligibility, historical contract nonperformance, financial situation, bidder's experience, organizational environmental, health and safety system and subcontractors.*

Merit Point Criteria

Required for internationally advertised works, nonconsulting services and specific goods to advance quality, sustainability and value for money.

Evaluating bids using MPC

Focuses on value for money and fit for purpose procurement by evaluating bids on technical merit as well as cost.

Rewards quality and innovation, encouraging stronger, more competitive bids.

Establishes well-defined and consistent quality standards that level the playing field.

YouTube

Maximizing Procurement Impact with Merit Point Crit

As part of ADB's commitment to quality, sustainability, and value for money in its projects, ADB is implementing changes in its procurement approach effective 1 January 2026 that ensures

❏ MPC does not apply to pharmaceuticals, vaccines, commodities, and low-value off-the-shelf goods.

Use of MPC to Date

2017

First MPC transaction

2017

- Solomon Islands

2019

- Bangladesh
- Maldives
- Philippines

25

Countries using MPC

2021

2023

- India
- Mongolia

2025

- Nauru
- Palau

2018

- Sri Lanka

2020

- Fiji
- Tonga

2022

- China, People's Republic of

2024

- Indonesia
- Kazakhstan
- Kyrgyz Republic
- Pakistan
- Papua New Guinea
- Samoa

MPC Contracts by Year (2017-2025)

❑ MPC transactions nearly doubled in 2025 (39 contracts), signaling rapid acceleration in borrower adoption of merit-point criteria.

Strategic Impact of MPC

Prioritizes Quality

Evaluates bids based on operational performance, lifecycle value, and technical merit, moving beyond upfront costs.

Incentivizes High-Quality Bids

Signals to the market that superior quality will be rewarded, fostering innovative and effective solutions.

Enhances Transparency & Objectivity

Reduces subjectivity in evaluations, thereby strengthening trust among all stakeholders.

Fosters Fair Competition

Ensures all suppliers adhere to clearly defined quality standards, thereby leveling the playing field.

Supports ADB Strategic Priorities

Aligns procurement with goals such as climate resilience, sustainable infrastructure, gender inclusion, and innovation.

When Does MPC Apply?

MPC will be utilized on internationally advertised contracts

For contracts with substantial/high procurement risk, minimum technical weighting is 50%

How is advertising determined?

- **International Advertising:** Used when participation by foreign firms will increase competition and help achieve VfM.
- **National Advertising:**
 - May be used if procurement is unlikely to attract international competition.
 - Decision informed by supply market, procurement risk, contract complexity & value.
 - National Advertising: Subject to ADB approval.

How is Procurement risk determined?

- Procurement risk is based on **procurement capacity, market conditions, contract complexity, contract size and implementation environment.**
- Borrower presents the procurement risk in the SPP report for ADB endorsement.

How is technical weighting applied?

- 50% for high/substantial procurement risk and high value
- 60% for high/substantial procurement risk and low value
- 10% for moderate/low procurement risk and high value
- 20% for moderate/low procurement risk and low value

Updates to Instructions for Borrower-Administered Procurement

Staff Instruction

Purpose: Internal operational guidance for ADB staff

- Aligns internal processes with the new Procurement Directive (2026, as amended).
- Reflects updated delegation of authority, risk ratings, and terminology.

Technical Instruction

Purpose: External guidance for borrowers

- Elaborates on Procurement Directive for ADB Borrowers (2026, as amended).
- Details requirements on advertisement, procurement risk assessment, and post-review procedures.

1

Assess 5 criteria

- Procurement capacity
- Market conditions
- Contract complexity
- Contract size
- Implementation environment

2

Scoring

- Rate each criterion 1–4 (1 = low, 4 = high risk)
- Total score determines overall risk rating

3

Grouping

- With ADB agreement, similar contracts may be assessed as a group

Directive's Phased Implementation

1 January 2026

1 July 2026

1 January 2027

Phase 1: Directive Effective

Effective 1 January 2026, early market engagement begins for projects with concept notes approved after this date.

Phase 2: Expanded Application

Beginning 1 July 2026, MPC and local participation requirements extend to all projects approved after 1 January 2026.

Phase 3: Full Implementation

As of 1 January 2027, MPC and local participation become mandatory for all projects, regardless of approval date.

Key Updates to Standard Bidding Documents

User Guide Notes

Deleted from final SBDs

Terminology & Safeguards Updates

- Alignment with ADB's 2024 Environment and Social Framework (ESF)
- Mandatory Environmental and Social (E&S) and Sexual Exploitation, Abuse and Harassment (SEAH) plans

Evaluation Updates

- *First-ranked bid term* replaced with *Most Advantageous Bid*
- Revised MPC scoring

Qualification & Financial Requirements

- *Current* revised to *Major Contract Commitments*
- Financial (FIN) forms updated

Local Participation

- Minimum 50% local labor requirement

Performance & Incentives (Optional)

- KPIs linked to compliance and payment deductions
- Optional bonus provisions

Contract Management & Conditions

- Expanded monthly reporting (E&S, SEAH and labor metrics)
- New clauses on milestones, labor standards, and grievance mechanisms

Support to Borrowers

Borrowers informed of Procurement Directive

Government counterparts informed by letter in Q4 2025.

Guidance Material

New and updated Guidance Notes, Procurement Snapshots, and explanatory videos, available by Q4 2025.

Updated Project Procurement Site

The [Project Procurement site on ADB.org](https://www.adb.org/projects/procurement) offers resources and additional content for Borrowers, launched in Q1 2026.

Standard Bidding Documents

Updated in Q1 2026 to reflect the Procurement Directive and Environmental and Social Framework.

Technical Assistance (\$1.2M)

Dedicated technical assistance to support initial Directive implementation from 2026-2028, launched in Q1 2026.

Capacity Development

Comprehensive training programs provided by ADB staff and expert consultants.

Hands-on Support

Access to procurement experts pre-qualified under an ADB Framework Agreement, available from Q1 2026.

Early Market Engagement - Knowledge Materials

EARLY MARKET ENGAGEMENT

Advancing market readiness, competition, and transparency in ADB-financed projects

What is Early Market Engagement?

Early Market Engagement (EME) is a transparent and structured way to engage with suppliers before bidding. It allows borrowers to assess capacity, refine requirements, and identify risks and opportunities so projects are feasible, competitive, and aligned with market conditions.

Why EME?

- Improves Accuracy:** Refines technical specifications, budgets, and timeline, ensuring project expectations align with what the market can deliver
- Enhances Competition:** Alerts potential bidders, leading to more competitive and inclusive procurement
- Stimulates Innovation:** Allows suppliers to share emerging technologies and practices that improve sustainability and enhance development outcomes
- Identifies Risks and Opportunities:** Helps anticipate potential delivery challenges, supply chain constraints, and opportunities before procurement begins
- Strengthens Transparency and Trust:** Open and well-documented engagement fosters confidence among stakeholders, reinforcing transparency, and fairness in procurement

Common EME Approaches

Market Dialogues	Information Tools	Collaborative Platforms
Market sounding sessions	Advance contracting notice	Project roadshows
Feedback on specifications	Request for information	Webinars and virtual briefings
Workshops and roundtables	Q&A portal	Innovation calls and challenges

Merit Point Criteria – Knowledge Materials

MERIT POINT CRITERIA

Advancing quality, sustainability, and value for money in ADB-financed projects

What is Merit Point Criteria

Merit Point Criteria (MPC) is a structured approach to bid evaluation used to compare and rank bids. It assigns weights and scores to criteria that are important to the borrower and rewards bidders with approaches that deliver value for money.

Why MPC

- Emphasizes Quality:** Focuses on value for money and fit for purpose procurement by evaluating bids on technical merit as well as cost.
- Spotlights Solutions:** Rewards quality and innovation, encouraging stronger, more competitive bids.
- Supports Fair Competition:** Establishes well-defined and consistent quality standards that level the playing field.
- Enhances Transparency:** Provides clarity in evaluations, strengthening trust among stakeholders.
- Aligns with ADB Priorities:** Advances climate resilience, sustainability, gender inclusion, and innovation.

Applying predefined, technical scoring to bid evaluation ensures consistent and transparent assessments and strengthens the integrity and credibility of the procurement process.

How MPC Works

MPC uses both technical and financial weightings to provide a balanced and transparent evaluation process. These weightings are published in the bidding documents. How evaluation criteria and their weightings are applied depends on procurement risk and contract value.

Procurement risk is assessed across five dimensions: **borrower's procurement capacity, market conditions, contract complexity, contract size, and implementation environment.** In high risk, high value contracts, technical criteria carry a greater weighting in the evaluation. A high value contract is defined as one exceeding \$10 million.

Notes: In this publication, "\$" refers to United States dollars.

Procurement Snapshot

EARLY MARKET ENGAGEMENT
Advancing market readiness, competition, and transparency in ADB-financed projects

What is Early Market Engagement?
Early Market Engagement (EME) is a transparent and structured way to engage with suppliers before bidding. It allows bidders to assess capacity, define requirements, and identify risks and opportunities in projects on health, competitive, and aligned with market conditions.

Why EME?

- Improves Accuracy:** Refines technical specifications, budgets, and timelines, ensuring project expectations align with what the market can deliver.
- Enhances Competition:** Alerts potential bidders, leading to more competitive and inclusive procurement.
- Stimulates Innovation:** Allows suppliers to share emerging technologies and practices that improve sustainability and enhance development outcomes.
- Identifies Risks and Opportunities:** Helps anticipate potential delivery challenges, supply chain constraints, and opportunities for government buyers.
- Strengthens Transparency and Trust:** Open and well-documented engagement fosters confidence among stakeholders, reinforcing transparency, and fairness in procurement.

Common EME Approaches

Reaction	Information	Collaborative
Open	Open	Open
Market sounding sessions	Advance contracting notices	Project roadshows
Feedback on specifications	Requests for information	Webinars and virtual briefings
Workshops and roundtables	Q&A portal	Innovation calls and challenges

LOCAL PARTICIPATION
Advancing job creation, skills development, and economic growth in ADB-financed projects

What is Local Participation?
Local Participation refers to the meaningful, inclusive, and sustained engagement of local labor in project implementation. This approach rewards contractors that create local jobs and invest in skills development, fostering sustainable livelihoods and strengthening long-term development outcomes.

Why Local Participation?

- Community Ownership:** Strengthens community ownership and support for the project.
- Economic Empowerment:** Reduces poverty and improves local livelihoods.
- Capacity Building:** Develops local skills so communities can manage and sustain development outcomes beyond the project completion.
- Sustainable Growth:** Fosters inclusive, resilient, and sustainable economic growth.
- Partnerships:** Promotes inclusive participation and partnership among communities, governments, and contractors.

Local Labor

- Unskilled:** No formal qualifications or work experience.
- Semi-skilled:** Vocational training or on-the-job experience.
- Skilled:** Certified professionals.

Diagram: A circular flow diagram with 'Local Labor' at the center, surrounded by 'Community', 'Partnership', 'Sustainability', and 'Capacity'. Arrows indicate a clockwise cycle between these elements.

MERIT POINT CRITERIA
Advancing quality, sustainability, and value for money in ADB-financed projects

What is Merit Point Criteria?
Merit Point Criteria (MPC) is a structured approach to bid evaluation used to compare and rank bids, while balancing quality and cost. It assigns weights and scores to criteria that are important to the borrower and awards bidders with approaches that deliver value for money.

Why MPC?

- Emphasizes Quality:** Focuses on value for money and fit for program procurement by evaluating bids on technical work as well as cost.
- Spotlights Solutions:** Rewards quality and innovation, encouraging stronger, more competitive bids.
- Supports Fair Competition:** Establishes well-defined and consistent quality standards that level the playing field.
- Enhances Transparency:** Provides clarity in evaluations, strengthening trust among stakeholders.
- Aligns with Development Priorities:** Advances climate resilience, sustainability, and innovation.

How MPC Works
MPC uses both technical and financial weightings to provide a balanced and transparent evaluation process. These weightings are published in the bidding documents. These evaluation criteria and their weightings are applied across the procurement risk and contract value.

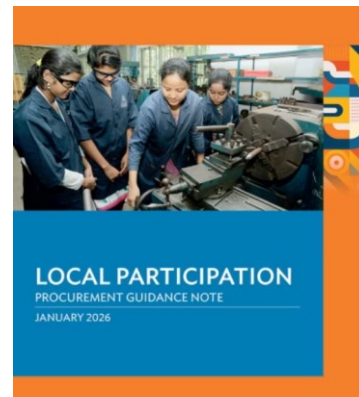

Procurement risk is assessed across five dimensions: borrower's procurement capacity, market conditions, contract complexity, contract size, and implementation environment. In high-risk, high-value contracts, technical criteria carry a greater weighting in the evaluation. A high-value contract is defined as one exceeding \$10 million.

Applying professional, technical scoring to bid evaluation ensures consistent and transparent assessments and strengthens the integrity and credibility of the procurement process.

Consultants to Register in CMS (cms.adb.org)

Welcome to the Asian Development Bank's Consultant Management System

Consultant Management System (CMS) is an integrated web-based system that supports the ADB's consulting services recruitment, from advertising the opportunity to awarding consulting contracts. This portal will enable users to work with the different facilities available in CMS.

Consultants create and update their profile, search opportunities, send Expressions of Interest (EOIs), respond to Non-Committal Inquiries (NCIs), and prepare and submit proposals. Login to the system by typing in your registered email address and password.

Since CSRN is now integrated in CMS, consultants are encouraged to complete their full registration to help facilitate EOI submission by tagging project and consulting experiences entered in their profile.

[Click here to know who can register as consultants in CMS.](#)
By using this service, you are accepting the [CMS Terms and Conditions](#).

ADB Project Team Members can access all CMS functions like creating a selection, advertising opportunities, sending Non-Committal Inquiries (NCIs), distributing Request for Proposals (RFPs), sending Notice to Proceed (NTPs), and approving requests, even while working outside of the ADB network. Login to the system by typing in your ADB Self-Service Username and Password.

Executing Agencies (EAs) can access Consulting Services Recruitment Notice (CSRN) to post consulting opportunities for ADB-financed projects. Login to the system by typing in your registered Username and Password.

To obtain an EA account, email your ADB Project Officer and copy csrn@adb.org with the following details:

- | | |
|---|--|
| 1. Email address of the agency representative | 3. Name and address of the agency |
| 2. Full name of the agency representative | 4. Duration of the recruitment for the project |

Consulting Services Recruitment Notice (CSRN)

The Consulting Services Recruitment Notice provides detailed information on the consulting services required for ADB-financed or administered projects. The CSRN includes the terms of reference and is posted on ADB's website for at least one month for firms for EA-administered projects, 15 days for firms for ADB-administered projects or 7 days for individual consultants before shortlisting.

This will provide consultants sufficient time to prepare EOIs that are more specific and focused on the project's requirements.

ADB

Solving Complex
Challenges Together

Tips for winning ADB-financed assignments

Solving Complex Challenges Together

- Collect relevant business intelligence – network!
- Focus on performance and reputation for successful work
- Express interest
- Understand the country, project, and client requirements
- Position yourself to your competitive advantage
- Study the bidding documents and understand the selection method and evaluation criteria
- Engage partnership with firms likely to be shortlisted
- Prepare a responsive and strong technical proposal
- Seek clarifications in writing
- Be ready for possible bid extensions or amendments

What Not To Do

Solving Complex Challenges Together

- Failure to disclose conflict of interest (e.g., employees from EA included in a proposal)
- Firm or JV partners not from an ADB member country
- Submitting proposal late
- Failure to respond to client requirements
- Conditional bids
- Incomplete/noncompliant bids, e.g., missing bid security, letter of bid not signed, JV agreement missing, bid envelopes not properly marked, etc.
- Integrity violations in the bidding process

When in doubt, always seek written clarification

Debriefing and Complaints

Debriefing:

- Unsuccessful bidders may request debriefing from the procuring entity (the EA or ADB). If they are not satisfied with the explanation given, they may submit a complaint.
- Debriefings are an excellent learning opportunity for future bids!

Complaints:

- Bidders may file complaint directly with ADB and may copy ADB on correspondence with EAs.
- Complaints to ADB should be submitted through online form:
<https://www.adb.org/forms/complaints>

How to report fraud:

- www.adb.org/site/integrity/how-to-report-fraud

ESF Requirements

Solving Complex Challenges Together

16. Documents Comprising the Technical Proposal

- 16.1 The Bidder shall furnish a Technical Proposal including a statement of work methods, equipment, personnel, and schedule as well as the bidder's **environmental** and social management plan (Bidder's ESMP), and other **environmental** and social (E&S) management documents required in the BDS, commensurate with the proposed scope of works; and any other information as stipulated in Section 4 (Bidding Forms), in sufficient detail to demonstrate the adequacy of the Bidders' proposal to meet the work requirements and the completion time.

Sample Text

Solving Complex Challenges Together

Procurement of Works: Standard Bidding Document for Single-Stage, Two-Envelope Bidding Procedure Without Prequalification, for projects with MPC and ESF

(v) **Bidder's Environmental and Social Management Plan and other E&S management documents, as may be relevant** ³²

The Bidder shall submit a bidder's Environmental and Social Management Plan (Bidder's ESMP) and other E&S management documents, such as SEAH management plan, H&S management plan, as may be relevant, commensurate with the risks and impacts of the proposed works and activities as described in the project ESIA, ESMP, LMP, Land Acquisition Plan (LAP) and other E&S assessment and management documents. These strategies and plans shall describe in detail the actions, materials, equipment, management processes, and others that will be implemented by the Contractor, and its subcontractors to avoid, minimize, and/or mitigate environmental and social risks associated with implementing the projects activities throughout the project cycle.

In developing these strategies and plans, the Bidder shall have regard to the E&S provisions of the contract and E&S risks, including those as may be more fully described in Section 6 (Works' Requirements).

The proposal shall also include details in relation to in-house policies and procedures acceptable to the Employer for E&S management such as:

- Availability of the valid International Organization for Standardization (ISO) certification or internationally recognized equivalent (equivalency to be demonstrated by the Bidder), and applicable to the worksite:
[such as], Quality management certificate ISO 9001, Environmental management certificate ISO 14001, Health and safety management certificate ISO 45001
- Grievance management for both contractor staff and any issues arising between contractor staff and nearby community members
- Performance monitoring system for contractor staff/ subcontractors/ suppliers/suppliers
- Existence of an Ethics Charter.
- Existence of a system for monitoring compliance with E&S commitments for the Bidder's Subcontractors and all its partners.
- Existence of official company procedures for the management of the following relevant points:
 - E&S resources and facilities and E&S monitoring system;
 - Project Areas management information (base camps, quarries, burrow pits, storage areas);
 - Health and Safety on worksites policy and related guidance;
 - Labor Management System;
 - Local recruitment and E&S training of local staff, subcontractors, and/or local partners;
 - Community stakeholder engagement practice;
 - Traffic management practice;
 - Hazardous products management practice;
 - Waste management practice;
 - Protection of water resources;
 - Biodiversity protection practices;
 - Site rehabilitation and revegetation practice;
 - Local cultural heritage protection practice;
 - Erosion and sedimentation practices; and
 - Control of infectious and communicable diseases (HIV/AIDS, malaria, COVID-19, and others)
- Personnel management system: HR policies and procedures, including documented worker grievance mechanisms and evidence of effective implementation (e.g., records of grievances)

COFINANCING

ADB BUSINESS
OPPORTUNITIES
SEMINAR SERIES 2026
PEOPLE. PARTNERSHIPS. POSSIBILITIES.

ADB

Solving Complex
Challenges Together

COFINANCING

OFFICIAL - multilateral and bilateral development agencies funded by sovereign states. It mobilizes funding for grants, loans, and technical assistance in ADB developing member countries. WB, AIIB, Bilateral agencies: AFD etc.

COMMERCIAL - Facilitates investment, trade, and capital flows into developing member countries. Both private and public institutions provide this type of cofinancing. It is usually sourced from financial markets and priced at commercial terms.

PRIVATE SECTOR - Partnerships with socially responsible companies, foundations, and philanthropic institutions are also important.

OFFICIAL COFINANCING

Solving Complex Challenges Together

Multilateral partners including global funds committed about 50% or \$3.1 billion to 45 projects in 2024. The [World Bank](#) committed \$960 million to 5 projects. [Asian Infrastructure Investment Bank](#) supported 5 projects amounting to \$947.2 million.

ADB BUSINESS
OPPORTUNITIES
SEMINAR SERIES 2026
PEOPLE. PARTNERSHIPS. POSSIBILITIES.

Solving Complex
Challenges Together

Importance of MPC

- **Elevates Quality** (as part of VfM and fit-for-purpose approach) by evaluating bids based on operational performance, lifecycle value, and technical merit, not just upfront costs.
- **Encourages stronger bids** by signaling to the market that quality will be rewarded, resulting in better solutions, not just cheaper ones.
- **Supports fair competition** by encouraging all suppliers to meet clearly defined quality standards, leveling the playing field.
- **Improves transparency and objectivity**, reducing subjectivity in evaluations enhancing trust among stakeholders.
- **Aligns with ADB's priorities**, such as climate resilience, sustainable infrastructure, gender inclusion, and innovation.

2.1.4 Technical Scoring

NOTE

The criteria and weightings shown under Technical Scoring are intended to illustrate a generic methodology. The actual criteria and weighting to be used may need to be adjusted to take into account the specific features of the project. The factors listed here are for example purposes. It is recommended that maximum number of factors are maintained at five. For further guidance on technical factors refer to ADB guidance on Merit Point Criteria available at the ADB website

The evaluation approach shall be based on a scoring methodology as per the principles spelled out below:

Technical Factors ¹	Weightings (1)	Scores (2)	Weighted Score (1) x (2)
1. Approach and Methodology	50-90...%	(max = 100)	T1
2. Key Personnel Qualifications	0-20...%	(max = 100)	T2
3. E&S Requirements	0-20...%	(max = 100)	T3
4. Sustainability Requirements	0-25...%	(max = 100)	T4
TOTAL	100%		T

Evaluation of the Technical Factors

[The below given MPC criteria are examples and should be tailored by the Employer as per the requirements of the relevant bidding package. In designing the MPC criteria, the Employer should also take into account Part E and, if applicable, make the necessary linkage with the KPIs and the performance damages to be applicable during implementation.]

The number of points to be assigned for each sub-factor mentioned above shall be broken down as follows:

Technical Factors	Weightings (1)	Scores (2)	Weighted Score (1) x (2)
1. Approach and Methodology	...%	(max = 10)	T1
	Sub-Factor Weightings (1)	Score (2)	Weighted Score (1) x (2)
(i) Construction Management Strategy is clear and complete: supporting documentation provided, organization described, resources mobilized, list of activities, risks, and assumptions	...%	(max = 10)	
(ii) Construction methods for the key construction activities are clear and well-articulated with the construction management strategy	...%	(max = 10)	
(iii) Construction Schedule is detailed, realistic and in line with the Works' Requirements and proposed methodology	...%	(max = 10)	
(iv) Quality Assurance and Quality Control	...%	(max = 10)	
(v) Anticipated Risks Evaluation: the main risks have duly	...%	(max = 10)	

2. Key Personnel Qualifications ^a	...%	(max = 100)	T2
	Sub-Factor Weightings (1)	Score (2)	Weighted Score (1) x (2)
(i) Personnel and Organizational chart are clear and relevant to perform the works	...%	(max = 10)	
(ii) Project Manager <ul style="list-style-type: none"> General qualifications. The staff must be a licensed professional in the assigned position. Total work experience. Demonstrate <i>minimum</i> _ [insert number of years] years in a similar position. Experience in similar work. Demonstrate <i>minimum</i> _ [insert number of years] years in similar work or comparable projects. 	...%	(max = 10)	
(iii) Site engineer	...%	(max = 10)	
(iv) Material engineer	...%	(max = 10)	
(v) Contract specialist	...%	(max = 10)	
(vi) Environmental specialist	...%	(max = 10)	
(vii) Social specialist	...%	(max = 10)	
(viii) H&S officer	...%	(max = 10)	
(ix) Labor/HR specialist	...%	(max = 10)	
(x) SEAH focal point	...%	(max = 10)	
(xi) [others]	...%	(max = 10)	
Subtotal Score T2			

^aIndividuals required under this table should be considered depending on the size, complexity and requirement for the subject contract package and should be consistent with Section 6.

3. E&S Requirements	...%	(max = 10)	T3
	Sub-Factor Weightings (1)	Score (2)	Weighted Score (1) x (2)
(i) E&S Approach & Methodology	...%	(max = 10)	
(ii) In-house Policies & Procedures	...%	(max = 10)	
Subtotal Score T3		100%	

4. Sustainability Requirements ^a	...%	(max = 10)	T4
	Sub-Factor Weightings (1)	Score (2)	Weighted Score (1) x (2)
(i) Local Jobs Creation and Local skills development ^b	...%	(max = 10)	
(ii) other sustainability requirements	...%	(max = 10)	
Subtotal Score T4		100%	

^a Maximum 25%

^b Maximum 15%

Merit Point Criteria: Procurement Guidance Note

Business Guide | January 2026

 Download

This guidance note provides support to borrowers and grant recipients in developing and applying merit point criteria (MPC) on projects financed by an Asian Development Bank (ADB) loan or grant, in accordance with the ADB Procurement Policy and Procurement Directive for ADB Borrowers.

It outlines the purpose and benefits of MPC along with practical approaches on design, bid evaluation, and contract management. MPC provides a structured, principles-based approach to evaluating bids beyond price, helping ensure procurement outcomes that are fit for purpose, deliver value for money, and support the project's development objectives.

MPC Stakeholder Roles

Solving Complex Challenges Together

Table 1: Roles and Responsibilities of Key Stakeholders

Stakeholder	Role and Responsibilities
Borrower	<ul style="list-style-type: none"> • Primary responsibility: Responsible for the overall procurement process, including designing, implementing, and documenting the MPC approach. • Design of criteria: Develops the main criteria, subcriteria, and scoring methodology based on the contract's technical requirements and risk profile. • Evaluation process: Establishes and manages the evaluation committee, ensures members' independence, and maintains confidentiality during evaluation. • Evaluation guide or manual: Prepares an internal evaluation guide or manual detailing the process, roles, and decision-making authority, and conflict-of-interest management. • Documentation and reporting: Ensures that all evaluation records, score sheets, and narrative notes are complete, transparent, and defensible for audit and review by ADB. • Accountability: Signs the bid evaluation report and recommendation for award, and submits these to ADB for prior or post-review, as applicable. • Monitoring and reporting on performance: Once the contract is awarded, ensures that the contractor performs in accordance with contract requirements and regularly reports performance results to ADB.
Bidder	<ul style="list-style-type: none"> • Compliance and understanding: Responsible for preparing bids in accordance with the criteria and requirements disclosed in the bidding documents. • Transparency and fairness: Avoids collusion, misrepresentation, or other forms of misconduct that compromise the integrity of the evaluation. • Demonstration of merit: Provides complete, verifiable evidence supporting claims related to experience, technical approach, innovation, or safeguards. • Engagement during clarification: Responds to clarifications if sought by the borrower during evaluation but are not permitted to modify their bid. • Performance accountability: Once awarded, delivers the commitments (e.g., quality measures, innovation, safeguards) that contributed to a high MPC score.
ADB	<ul style="list-style-type: none"> • Oversight and compliance: Ensures that the borrower's procurement process, including the use of MPC, complies with the Procurement Directive for ADB Borrowers. • Review and no-objection: For contracts subject to prior review, reviews key documents such as the bidding documents, including evaluation criteria, and bid evaluation report for procedural compliance before issuing a no-objection to contract award. • Guidance and capacity building: Provides technical guidance, training, and tools to help borrowers apply MPC consistently and effectively across projects. • Post-review: For contracts under post-review, examines the bidding process including evaluation after award to ensure proper application of MPC and compliance with ADB's procurement policy and directive. • Policy updates: Monitors lessons learned from projects using MPC and updates procurement guidance, templates, and training materials accordingly.

MPC = merit point criteria; ADB = Asian Development Bank.

MPC Quantitative Criteria

Solving Complex Challenges Together

Quantitative Criteria

- 3.6 Quantitative criteria can be used within a technical evaluation when an objective and verifiable assessment is feasible and relevant to outcomes. These criteria, which are commonly applied to goods and works, translate qualitative intent into measurable targets (e.g., efficiency, emissions, resource use), reduce evaluator discretion, and allow for direct comparison across bids. Quantitative criteria are most effective when the metric, unit, measurement boundary (what is in and out), and calculation method are clearly defined in the bidding documents, and when the same definitions carry forward into contract KPIs.

Example of using Quantitative Criteria

For example, bidders may be required to state projected greenhouse gas emissions for construction activities, expressed in tons of CO₂. In such cases, the borrower would disclose a baseline KPI, for example, an expected monthly CO₂ total derived from market sounding or past projects. Each technical bid would then be evaluated against this baseline, either as a percentage improvement over the KPI (higher improvement earns more points) or using a simple proportional rule that awards the maximum points to the lowest credible CO₂ figure, and scales the others accordingly.

- 3.7 To make the criterion defensible, the bidding documents should require a clear calculation method (e.g., fuel and electricity consumption multiplied by published emission factors), specify the data sources, and state how results will be verified (e.g., using fuel logs, utility bills, calibrated meters, or third-party

MPC Qualitative Criteria

Solving Complex Challenges Together

Qualitative Criteria

Qualifications and Experience

- 3.8 Qualifications and experience are generally assessed at the qualification stage (typically on a pass/fail basis) to confirm baseline capability. However, certain criteria can also be further elaborated upon to form more detailed criteria within the MPC evaluation. MPC related to experience and qualifications should focus

Merit Point Criteria: Procurement Guidance Note

on how well the bidder will perform, considering aspects such as quality, approach, risk management, and value. If any experience-related elements are included in the MPC, they must be clearly delineated from qualification criteria and considered to assess past performance (e.g., proven delivery on closely analogous contracts, evidence provided in completion/taking-over certificates, client evaluations, compliance with requirements, timely completion, and defect-liability records). This separation avoids duplication, as prequalification confirms eligibility and capacity while MPC distinguish the quality of the proposed solution.

This guidance note provides practical and comprehensive directions on conducting bid evaluation and preparing bid evaluation reports for submission to the Asian Development Bank (ADB).

It outlines the required procedures, key principles, and documentation standards involved in evaluating bids for contracts financed wholly or partly by an ADB loan, grant, or ADB-administered funds. Designed to support transparent, fair, and efficient procurement, the guidance note serves as a valuable reference for project executing and implementing agencies, procurement specialists, and all stakeholders involved in ADB-financed project procurement.

MPC Bid Evaluation Guide

Solving Complex Challenges Together

E Technical Scoring Using the Merit Point Criteria Evaluation Method

- 2.41 This step of technical evaluation using the MPC method involves using a scoring system to assess the quality, capability, and appropriateness of each bidder's proposal to deliver a contract and meet its requirements. The evaluation should be carried out strictly in accordance with the criteria and weightings set out in the bidding documents. When bidding documents set a minimum technical passing score from the total available points, a bid must achieve at least that score to be considered responsive and to advance to the financial evaluation stage.
- 2.42 In the case of the single-stage one-envelope approach, since both technical and price components are visible upon opening of the bids, the evaluation team must ensure strict objectivity, and avoid biased technical scoring based on available price information. Members should be reminded to score technical criteria independently of cost attractiveness. Alternatively, the following mitigation measures may be implemented by borrowers:
- **Separate subgroups for technical and price assessments.** While these teams evaluate in parallel, they also evaluate independently and submit separate reports. The groups include:
 - bid opening members who are independent from the evaluators;
 - technical evaluators who focus on technical scoring and are not made aware of price bids; and
 - price bid evaluators who review costs and commercial compliance, and are not made aware of technical bids.

- **Sequential evaluation.** Where full segregation of teams is not practical, the evaluation proceeds sequentially. Technical scores must be completed, recorded, and formally locked (signed and dated) prior to the commencement of any financial evaluation. Documentation timestamps should be maintained to demonstrate the proper sequence of activities.
- **Blind scoring.** Redacted copies of bids with all pricing or cost-related information removed can be distributed to the technical evaluators.
